for Cox's Bazar District (HGSP)

P-number: P171648

Project Implementation agency: Ministry of Health and Family Welfare (MoHFW)

Period covered by this Procurement Plan: Entire Project Period

Preamble

In accordance with paragraph 5.9 of the World Bank Procurement Regulations for IPF Borrowers, July 2016, revised November 2017 and August 2018 ("Procurement Regulations"), the Bank's Systematic Tracking and Exchanges in Procurement (STEP) system will be used to record all procurement actions for the Project, including preparing, updating and clearing its Procurement Plan, and seeking and receiving the Bank's review and No-objection to procurement actions as required.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank's Standard Procurement Documents: The Bank's Standard Procurement Documents (SPDs) shall be used for goods, works and non-consulting services where international competition is required and for all consulting services, including their respective forms of contract.

National Procurement Arrangements: In accordance with paragraph 5.3 of the World Bank Procurement Regulations, when approaching the national market, as agreed in the Procurement Plan, the country's own procurement procedures may be used. These procurement procedures shall be consistent with the Bank's Core Procurement Principles and ensure that the Bank's Anti-Corruption Guidelines and Sanctions Framework and contractual remedies set out in its Legal Agreement apply.

When the Borrower uses its own national open competitive procurement arrangements as set forth in the Public Procurement Act 2006 and the Public

Procurement Rules 2008, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions:

- i. Lottery in award of contracts shall not be allowed;
- ii. Bidders' qualification[s]/experience requirement[s] shall be mandatory;
- iii. Bids shall not be rejected based on percentage above or below the estimated cost;
- iv. Model Bidding Documents agreed with the Bank shall be used for all national open competitive procurement;
- v. The eligibility of bidders shall be as defined under Section III of the World Bank Procurement Regulations for IPF Borrowers: accordingly, no bidder or potential bidder shall be declared ineligible for contracts financed by the Bank for reasons other than those provided in Section III of the Procurement Regulations.
- vi. The request for bids/request for proposals document shall require that Bidders/Proposers submitting Bids/Proposals present a signed acceptance (in the form attached) at the time of bidding, to be incorporated in any resulting contracts, confirming application of, and compliance with, the Bank's Anti-Corruption Guidelines, including without limitation the Bank's right to sanction and the Bank's inspection and audit rights.
- vii. Procurement Documents include provisions, as agreed with the Bank, intended to adequately mitigate against environmental, social (including sexual exploitation and abuse and gender-based violence), health and safety ("ESHS") risks and impacts

When other national procurement arrangements (other than national open competitive procurement) are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

As per paragraph 5.4 of the Procurement Regulations, the "*Letter of Acceptance of the World Bank's Anticorruption Guidelines and Sanctions Framework*" as attached to this document shall form part of the Model Bidding Documents.

Leased Assets: Not Applicable.

Procurement of Second Hand Goods: Not Applicable.

Domestic preference: as specified under paragraph 5.51 of the Procurement Regulations (**Goods and Works**) as follows:

Goods: Applicable;

Works: Not applicable.

Hands-on Expanded Implementation Support (HEIS): Not Applicable.

Bank's Procurement Prior Review Thresholds: contracts at or above the thresholds set out in table 1 below are subject to the Bank's procurement prior review.

Table 1: Procurement Prior Review Thresholds (US\$ millions)

Type of procurement	High risk	Substantial risk	Moderate risk	Low risk
Works (including turnkey, supply & installation of plant and equipment, and PPP)	5	10	15	20
Goods, information technology and non-consulting services	1.5	2	4	6
Consulting services: firms	0.5	1	2	4
Consulting services: Individual	0.2	0.3	0.4	0.5

Notes:

1. These thresholds apply to all procurement activities regardless of their procurement/selection methods. There is no automatic requirement to undertake prior review for direct selection for value less than these

thresholds. Consultant services covers a range of services that are of an advisory or professional nature.

2. In addition to the provisions of Table 1 above, and irrespective of the contract value, the following procurement activities are subject to the Bank's procurement prior review:
 - (a) procurement processes involving contract negotiations, as described in Section VI, paragraphs 6.34-36, of the Procurement Regulations;
 - (b) competitive dialogue;
 - (c) sustainable procurement;
 - (d) selection of probity assurance providers, as described in Section III, paragraph 3.3 of the Procurement Regulations; and
 - (e) best and final offer.
3. The determination of whether a contract meets the procurement prior review threshold is based on the estimated value of the contract or the package -when the selection document contains more than one lot/slice-, including all taxes and duties payable under the contract.

Fraud and Corruption (F&C) Checklist: Fraud and Corruption (F&C) checklist, as developed and provided by the Bank, shall be properly filled in during the evaluation and be attached with the evaluation report in case of contracts following national competitive procurement and request for quotations.

¹[Drafting note: This document shall be signed by bidders/proposers/consultants and submitted as part of their bids/proposals. In addition, this document shall be signed by the winning bidder/consultant and incorporated as part of the contract.]

We, along with our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not) consultants and personnel, acknowledge and agree to abide by the World Bank's policy regarding Fraud and Corruption (corrupt, fraudulent, collusive, coercive, and obstructive practices), as set out and defined in the World Bank's Anti-Corruption Guidelines² in connection with the procurement and execution of the contract (in case of award), including any amendments thereto.

We declare and warrant that we, along our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not), consultants and personnel, are not subject to, and are not controlled by any entity or individual that is subject to, a temporary suspension, early temporary suspension, or debarment imposed by a member of the World Bank Group, including, inter alia, a cross-debarment imposed by the World Bank Group as agreed with other international financial institutions (including multilateral development banks), or through the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement. Further, we are not ineligible under the laws or official regulations of *[Insert name of Employer as per bidding document]* or pursuant to a decision of the United Nations Security Council.

We confirm our understanding of the consequences of not complying with the World Bank's Anti-Corruption Guidelines, which may include the following:

- a. rejection of our Proposal/Bid for award of contract;
- b. in the case of award, termination of the contract, without prejudice to any other remedy for breach of contract; and
- c. sanctions, pursuant to the Bank's Anti-Corruption Guidelines and in accordance with its prevailing sanctions policies and procedures as set forth in the Bank's Sanctions Framework. This may include a public declaration of ineligibility, either indefinitely or for a stated period of time, (i) to be awarded or otherwise benefit from a Bank-financed contract, financially or in any other manner;³ (ii) to be a nominated⁴ sub-contractor, sub-consultant, consultant, manufacturer or supplier,

²*Guidelines on Preventing and Combating Fraud and Corruption in Projects Financed by International Bank for Reconstruction and Development Loans and the International Development Agency Credits and Grants*, dated October 15, 2006, and revised in January 2011 and July 2016, as they may be revised from time to time.

³ For the avoidance of doubt, a sanctioned party's ineligibility to be awarded a contract shall include, without limitation, (i) applying for pre-qualification or initial selection), expressing interest in a consultancy, and bidding, either directly or as a nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider, in respect of such contract, and (ii) entering into an addendum or amendment introducing a material modification to any existing contract.

⁴A nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider (different names are used depending on the bidding document) is one which has been: (i) included by the bidder in its pre-qualification or initial selection application or bid because it brings specific and critical experience and know-how that allow the bidder to meet the qualification requirements for the particular bid; or (ii) appointed by the Borrower.

or service provider of an otherwise eligible firm being awarded a Bank-financed contract; and (iii) to receive the proceeds of any loan made by the Bank or otherwise to participate further in the preparation or implementation of any Bank-financed project.

We understand that we may be declared ineligible as set out above upon:

- a. completion of World Bank Group sanctions proceedings according to its prevailing sanctions procedures;
- b. cross-debarment as agreed with other international financial institutions (including multilateral development banks);
- c. the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement; or
- d. temporary suspension or early temporary suspension in connection with an ongoing World Bank Group sanctions proceeding.

For avoidance of doubt, the foregoing effects of ineligibility do not extend to a sanctioned firm's or individual's execution of its ongoing Bank-financed contracts (or its ongoing sub-agreements under such contracts) that are not the subject of a material modification, as determined by the Bank.

We shall permit, and shall cause our sub-contractors, sub-consultants, agents (whether declared or not), personnel, consultants, service providers or suppliers, to permit the Bank to inspect⁵ all accounts, records, and other documents relating to the procurement process and/or contract execution (in the case of award), and to have them audited by auditors appointed by the Bank.

We agree to preserve all accounts, records, and other documents (whether in hard copy or electronic format) related to the procurement and execution of the contract.

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers” (July 2016, revised November 2017 and August 2018) (“Procurement Regulations”) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: shall be used for all contracts subject to international competitive procurement and those contracts as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the Procurement Regulations, when approaching the national market (as specified in the Procurement Plan tables in STEP), the country’s own procurement procedures may be used.

When the Borrower uses its own national open competitive procurement arrangements as set forth in **the Procurement Directives of the Federal and Regional Governments of Ethiopia**, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions.

For national open competitive procurement the following requirements apply:

- b. the procurement is open to eligible firms from any country;
- c. the request for bids/request for proposals document shall require that Bidders/Proposers submitting Bids/Proposals present a signed acceptance at the

- d. Procurement Documents include provisions, as agreed with the Bank, intended to adequately mitigate against environmental, social (including sexual exploitation and abuse and gender-based violence), health and safety ("ESHS") risks and impacts;
- e. contracts with an appropriate allocation of responsibilities, risks, and liabilities;
- f. publication of contract award information;
- g. rights for the Bank to review procurement documentation and activities;
- h. an effective complaints mechanism; and
- i. maintenance of records of the Procurement Process.

When other national procurement arrangements other than national open competitive procurement arrangements are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

PROCUREMENT PLAN - Textual Part

Project information: Fiscal Management Improvement Project (P172352)

Project Implementation Agency: Ministerio de Hacienda Costa Rica

Date of the Procurement Plan: March 27, 2021

Period covered by this Procurement Plan: From March 2021 to July 2022

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers” (July 2016) (“Procurement Regulations”) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: Shall be used for all contracts subject to international competitive procurement and those contracts as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the Procurement Regulations, when approaching the national market (as specified in the Procurement Plan tables in STEP), the country’s own procurement procedures may be used.

When the Borrower uses its own national open competitive procurement arrangements as set forth in the National Procurement Legislation such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions:

1. The request for bids/request for proposals document shall require that Bidders/Proposers submitting Bids/Proposals present a signed acceptance at the time of bidding to be incorporated in any resulting contracts, confirming application of, and compliance with, the Bank’s Anti-Corruption Guidelines, including without limitation the Bank’s right to sanction and the Bank’s inspection and audit rights. The Bank’s Anti-Corruption Guidelines and Sanctions Framework shall be incorporated into the national bidding documents by adding a page entitled “Letter of Acceptance of the World Bank’s Anti-Corruption Guidelines and Sanctions Framework”.
2. Contracts with an appropriate allocation of responsibilities, risks, and liabilities between the Borrower and the contractors/suppliers/consultants.

3. Rights for the Bank to review procurement documentation and activities. In accordance with the Procurement Regulations, each bidding document and contract shall include provisions stating the Bank's policy to sanction firms or individuals, found to have engaged in fraud and/or corruption as defined in the Procurement Regulations. In accordance with the Procurement Regulations, each bidding document and contract financed out of the proceeds of the Financing Agreement shall provide that bidders, suppliers, contractors and their subcontractors, agents, personnel, consultants, service providers, or suppliers shall permit the Bank to inspect all accounts, records and other documents relating to the bid submission and performance of the contract and to have said accounts and records audited by auditors appointed by the Bank. Acts intended to materially impede the exercise of the Bank's inspection and audit rights provided for in the Procurement Regulations constitute an obstructive practice as defined in the Regulations.
4. No bids shall be rejected solely because they fall below or exceed the estimated cost. All bids (including in the case when less than two bids are received) shall not be rejected, the procurement process shall not be cancelled, and new bids shall not be solicited without the Bank's prior written concurrence. The Bidding Documents template to be used under "national open competitive procurement arrangements" are subject to prior written concurrence by the Bank.

When other national procurement arrangements other than national open competitive procurement arrangements are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

Leased Assets as specified under paragraph 5.10 of the Procurement Regulations: Not Applicable.

Procurement of Second-hand Goods as specified under paragraph 5.11 of the Procurement Regulations: Not Applicable

Domestic preference as specified under paragraph 5.51 of the Procurement Regulations (Goods and Works).

Period covered by this Procurement Plan: February 2020 to February 2021

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers” (July 2016) (“Procurement Regulations”) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: shall be used for all contracts subject to international competitive procurement and those contracts as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the Procurement Regulations, when approaching the national market (as specified in the Procurement Plan tables in STEP), the country’s own procurement procedures may be used.

When the Borrower uses its own national open competitive procurement arrangements as set forth in the *National Procurement Act 2018*, No. 12 of 2018, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions.

----------------------	--

	<p>be declared ineligible for contracts financed by the Bank for reasons other than those provided in the said paragraphs. Foreign bidders shall be eligible to participate in bidding under the same conditions as national bidders. No domestic preference shall be granted in bid evaluation on the basis of bidder's nationality, origin of goods or services, and/or preferential programs.</p>
<p>Registration of bidders as condition for bidding</p>	<p>Registration of bidders: Registration shall not be used to assess bidders' qualifications. A foreign bidder shall not be required to register as a condition for submitting its bid, and a foreign bidder recommended for contract award shall be given a reasonable opportunity to register, with the reasonable cooperation of the Recipient, prior to contract signing.</p>
<p>Procurement documents</p>	<p>Procurement Documents: Templates of procurement documents, including contract forms, acceptable to the Association shall be used for all procurement financed by the Project.</p>
<p>Document Fees</p>	<p>Bidding Document Fees: A fee for bidding documents if applied must be reasonable and is to be used to offset the actual costs associated with reproduction of large bidding documents and associated plans and drawings. It is not to be used to generate revenue, or to limit or restrict participation in procurement processes. Bidding document fees are not to be charged for the procurement of consulting services (firms and individual), non-consulting services, or goods.</p>
<p>Fraud and Corruption</p>	<p>Fraud and Corruption: The procurement documents shall require that bidders submitting bids present a signed acceptance at the time of bidding, to be incorporated in any resulting contracts, confirming application of, and compliance with, the Bank's Anti-Corruption Guidelines, including without limitation the Bank's right to sanction and the Bank's inspection and audit rights.</p>

Negotiations and cancellation of procurement process	Cancellation of all bids: All bids (or the sole bid if only one bid is received) shall not be rejected, the procurement process shall not be cancelled, and new bids shall not be solicited without the Bank’s prior written concurrence.
Complaints Handling	Complaints Review Mechanism: The Recipient shall establish and implement an effective, fair and timely complaints review mechanism allowing bidders to complain and to have their complaints handled in a timely manner. Until an adequate complaints review mechanism (as assessed by the Bank) is established the Bank’s review mechanism as set out in the Procurement Regulations will apply.
Contract Award Notice	Publication of Contract Award Notice: For purposes of Article 36(5) of the Act, within one month from award, a notice of all procurement contract awards shall include, at a minimum as relevant and applicable for each procurement method (a) the name of each bidder that submitted a bid; (b) bid prices as read out at bid opening; (c) evaluated prices of each bid that was evaluated; (d) the names of bidders whose bids were either rejected as nonresponsive or not meeting qualification criteria, or not evaluated, with the reasons thereof; and (e) the name of the winning bidder, the final total contract price, as well as the duration and a summary of the scope of the contract.

When other national procurement arrangements other than national open competitive procurement arrangements are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

Project Procurement Strategy for Development

April 18, 2022

I. Project overview

Country:	The Republic of Tajikistan
Full Project Name:	Technical Assistance for Financing Framework for Rogun Hydropower Project
Total Finance (\$):	US\$15,000,000
Project number:	P178819
Project Development Objective	The development objective is to improve the readiness of Rogun hydropower project to raise a financing package required for completion of construction

II. Project Description

The TA Project will help to: (a) strengthen technical, environmental and social aspects of the Rogun hydropower plant construction project (Rogun HPP Project); (b) develop the commercial framework of the Rogun HPP Project; and (c) strengthen the institutional capacity of the Project Management Group for Energy Facilities Construction under the President of the Republic of Tajikistan Rogun (Rogun PMG), which is the implementing entity for Rogun HPP Project. The TA Project would be implemented during the period of April 2022 and April 2031. The TA Project will have the following key components:

Component 1: Improvement of the dam safety of Rogun HPP Project (estimated cost of about US\$6.3 million). This component will finance: (a) the panel of experts (POE) for the dam safety, which will carry out due diligence and ensure international quality standards in the design and construction of Rogun HPP Project; provide high level and professional independent advice and guidance to support objectivity and credibility in the development and implementation of designs and in the construction of the project; share technical expertise and knowledge and so contribute to dialogue amongst the various stakeholders; and (b) technical and engineering studies that may be required for improvement of technical aspects of the Project.

Component 2: Strengthening of environmental and social (E&S) performance of Rogun HPP Project (estimated cost of about US\$5.2 million). This component will finance the following: (a) update of E&S instruments for Rogun HPP Project to align them with the requirements of the World Bank's Environmental and Social Framework (ESF); assistance to Rogun PMG in developing a Contractor Management Plan that will include the details of how Rogun PMG will supervise the E&S performance of its contractors; recommendations on modification of existing contractors, to

include relevant E&S requirements to comply with the applicable E&S standards and requirements; (d) E&S panel of experts; and (e) design of local community benefit-sharing program.

Component 3: Development of the commercial framework for Rogun HPP Project (estimated cost of US\$2 million). This component will finance: (a) preparation of a macroeconomically sustainable Project construction completion schedule taking into account the existing and projected macro-fiscal framework of the country; (b) prepare a Project financing plan taking into account the updated Project construction completion schedule; (c) transaction advisory service to help the Government draft, negotiate, and sign long-term PPAs for sale of Rogun electricity; and (d) technical and engineering studies that may be required for strengthening o

Component 4: Strengthening of institutional capacity of Rogun PMG and other technical assistance (estimated cost of US\$1.5 million). This component will finance: (a) strengthening of Rogun PMG team to implement the TA Project; (b) capacity building for Rogun PMG and Rogun JSC staff in dam safety, operation and management of hydro facilities, and project management; (c) Purchase of Information and Communication Technologies (ITC) and office equipment for Rogun PMG; (d) TA Project audits; and (e) incremental operating costs of Rogun PMG.

III. Strategic Assessment of Country, Borrower and Marketplace

a. Operational context

Governance aspects. Government of the Republic of Tajikistan established the Rogun Open Joint Stock Company to own and operate the Rogun Hydropower Project (HPP). By the executive order of the President (No. 1361, dated October 26, 2012), Rogun PMG was established. It is the implementing entity for the construction of the Project. The HPP is being constructed on the Vakhsh River about 110 kilometers east of Dushanbe and about 70 kilometers upstream of the Nurek HPP. The dam will be 335 meters high and the facility will have generation capacity of 3,780 MW. This large hydropower project of 3,780 MW located on the Vakhsh cascade has the potential to generate a multitude of benefits for Tajikistan and the broader Central Asia (CA) region. For Tajikistan, the project could provide reliable electricity to meet growing domestic electricity demand at affordable costs.

The legal and regulatory framework to be applicable to the key aspects of the TA Project is clear and well-defined. The World Bank Procurement Regulations applicable to the project take precedence over any conflicting regulations from the national public procurement laws. This has been enabled in the Constitution of the Republic of Tajikistan. The current Law on Public Procurement of Goods, Works and Services was adopted in March 2006 and was amended on April 16, 2012. The Government is working on preparation of a new PPL based on the UNCITRAL Model Law 2011 and the principles of the WTO GPA, and, in parallel, on the development of secondary legislation and standard bidding documents to be in line with the new draft

PPL. The licensing framework for provision of technical consulting services is clear. In addition, the consultants will be required to comply with the requirements of the World Bank's relevant Environmental and Social Standards (ESS) as detailed in the relevant E&S documents prepared as well as the requirements of the local legislation related to labor policies.

Economic aspects. In 2021, Tajikistan's per capita income (GNI, Atlas method) was about US\$1,100, which is slightly above the lower-middle-income threshold. The poverty rate fell from 17.8 percent in 2015 to about 13.9 percent in 2021. Tajikistan's economy relies heavily on primary commodity production and exports, with limited economic diversification. Domestic investment and consumption depend heavily on migrant remittances, which are about a third of GDP, thus leaving the economy highly vulnerable to external shocks. Sanctions on the Russian economy have exposed this vulnerability since Russia is the largest employer of Tajik migrant workers and is among the largest trading partners. Reforms aimed at private sector growth, public sector efficiency, and greater inclusion are vital to further economic development.

Sustainability aspects. There are no issues with the sustainability aspects of the TA Project-financed activities since they only include advisory services and technical assistance for the needs of PMG. The proposed TA Project would contribute to strengthening the sustainability of the Rogun HPP Project by introducing requirements for good-practice E&S standards; robust criteria for E&S performance of the existing and new contractors; and design of community benefit sharing program that would contribute to equitable development and sustainable socio-economic growth at the local and national levels.

Technological aspects. The assessments and studies under the TA Project will be relying on methodologies (such as hydropower planning, probable maximum flood modelling, least-cost system planning with economic optimization), which are considered to be standard for the hydropower sector and overall electricity industry. Therefore, there are no issues or risks to the grant-financed activities from technology-driven change or deployment of untested methods for technical studies.

Key Conclusion. No major issues expected given that the grant would be financing primarily consulting services.

b. Client Capability and PMG Assessment

Experience. Rogun PMG will be responsible for the implementation of the Project. PMG staff consists of 34 persons. In its procurement activities, it is guided by the developed regulations, instructions, the Public Procurement Law of the Republic of Tajikistan, and the Rules for International Tender for Construction of Rogun Project. Rogun PMG has significant experience in implementing projects funded by the state budget including preparation of bidding documents for works and goods contracts, evaluation of bids, contract negotiations, and contract management. Rogun HPP team and the Resettlement Unit will be involved in reviewing the relevant documents,

reports, and outputs to be produced by the consultants to be hired by Rogun PMG. They would be involved in reviewing and approving the contractual, technical, environmental and social recommendations and advice to be provided by the consultants that would be hired by Rogun PMG , con. In addition to its primary function, Rogun PMG is also responsible for coordination of the activities with various ministries, departments and international financial organizations in the implementation of the state policy of the Republic of Tajikistan related to issues related to the construction of energy facilities and their upgrade in accordance with the programs of socio-economic development of the Republic of Tajikistan.

The activities of the Rogun PMG related to procurement process include, among other things, the following:

- Coordination of activities with ministries and departments, enterprises, institutions of Tajikistan and other international financial organizations related to the construction of energy facilities.
- Ensuring, together with the authorized state bodies, the organization of the work of tender commissions related to the construction of power facilities.
- Development and preparation of documentation for procurement of goods, works, consulting and non-consulting services for the construction of power facilities.
- Monitoring the use of funds attracted and allocated by the Government of the Republic of Tajikistan for the implementation of projects for the construction of energy facilities.
- Coordination and provision of working conditions for international and domestic specialists, consultants, experts in the preparation and implementation of projects.
- Together with the authorized state bodies, organizing meetings with representatives of international organizations and, based on their results, providing information to the President of the Republic of Tajikistan.

However, Rogun PMG does not have experience in implementation of projects financed by IFIs including the World Bank. It currently has one procurement consultant with experience in procurement in World Bank financed projects - CASA-1000 and Rural Electrification Project. The consultant will continue providing support to the Rogun PMG under her current financing until Rogun PMG selects a procurement specialist funded by the TA Project to carry out the required functions till the end of the TA Project. Her performance to date has been satisfactory. The procurement specialist will receive the required training to further strengthen the capacity in World Bank's procurement rules and policies.

Contract management capacity. Contract management is the responsibility of the relevant staff (director, manager, technical experts, etc.). Rogun PMG maintains an Excel file to track key contract dates. PMG has experience in managing contracts for similar projects such as pre-contract works on Rogun HPP Project that involved management of several

civil works contractors, construction of electricity transmission line projects for evacuation of electricity from Rogun HPP Project. In general, Rogun PMG will benefit from further training in contract management.

Complaint management and dispute resolution systems. Rogun PMG will follow the requirements of The World Bank Procurement Regulations for IPF Borrowers (Nov 2020) in handling the complaints under consulting and goods contracts. Specifically, if a complaint is received, consistent with the requirements of an RFP or a request for bids, then Rogun PMG will respond to the complaint by ensuring the following minimum information is provided: (a) statement of issues; (b) facts and evidence; (c) decision and reference to the basis for the decision; and (d) analysis. Rogun PMG will act consistent with the roles and responsibilities of the Borrower/Recipient as specified in the World Bank Procurement Regulations

Conclusions on PMG capacity. PMG has experience in implementing projects financed by the Government. However, it has no experience with the World Bank procurement procedures; have limited monitoring and contract management skills, as this function was mainly assigned to external consultants. The existing capacity is not sufficient to manage the growing volume of procurement activities across multiple projects running in parallel. Therefore, this will require further strengthening of PMG’s capacity to meet the TA Project needs.

c. Market analysis

Market sector dynamics. There are many specialized consulting firms that provide technical, economic analysis, environmental and social advisory, as well as financial and legal advisory services related to various aspects of hydropower projects and that have been very active in Tajikistan. These firms have been contracted to perform various large consulting assignments for new investment projects in the hydropower as well as rehabilitation projects; technical and economic assessments of new investments; feasibility studies; preparation of tender documentation; and preparation of environmental and social instruments/documents as required by various financial institutions; and financial and legal advisory for various project-level needs. Additionally, there have been strong interest from global individual experts to assume roles under the POE for dam safety and E&S issues. This has been demonstrated during implementation of techno-economic assessment studies (TEAS) for the Project as well as engagement of those experts for the needs of Nurek Hydropower Rehabilitation Project.

Procurement risk analysis

Keeping in view the nature of the consulting contracts to be procured under the TA Project, the main risks associated with the implementation of the TA Project and the proposed mitigation measures are described hereunder.

Risk Description	A	B	Overall I Risk	Description of proposed	Risk owner
------------------	---	---	----------------	-------------------------	------------

	Likelihood Rating	Impact Rating	Rating (A*B)	mitigation through the procurement process	
Lack of interest from reputable international consultants.	2	3	6	Procurement activities related to Rogun HPP that is a very large and complex project. Therefore, it is expected to generate significant interest from reputable international consultant. Moreover, competitive procurement is expected to be the main approach.	Rogun PMG
Issues with contract management due to limited familiarity of Rogun PMG staff with Procurement Regulations of the World Bank.	2	4	8	The TA Project would finance capacity building and training of the relevant staff in procurement and contract management.	Rogun PMG

IV. Procurement objectives

The main procurement objectives to be achieved are:

- Advance preparation of TOR to avoid delays in procurement;
- Monitoring of the procurement process so that the timing of each tender does not exceed the planned deadlines.

V. Recommended Procurement Approach for a Grant

Activity 1: Panel of Experts (POE) on Dam Safety

Selection method for all nine POE members: International Competitive Selection. Individual consultant contracts (time-based). The POE will be comprised of various experts and those will need to be hired under individual contracts because POE members will need to be internationally renowned experts in their respective fields and the experience and qualifications of the individuals are of paramount requirement. This cannot be achieved through hiring of a firm. We will invite those individual consultants that we deem

qualified to provide the required consulting services. The complete TOR will be sent with the invitation.

Estimated cost: The estimated cost of each POE member contract is presented in the Procurement Plan (PP) and is expected to range from US\$142,000 to US\$770,000

Duration of contract: The POE members will provide services during the period of May 2022 – April 2031.

Level of risk: Low.

Activity 2: Update of the environmental and social instruments of the Rogun HPP Project

Selection method: Quality and Cost Based Solution (QCBS). International Competitive.

Estimated cost: US\$4,000,000.

Duration of contract: June 2022 – June 2026.

Risk level: Medium.

Activity 3: POE on Social and Environmental Issues

Selection method for all three POE members: International Competitive Selection. Individual consultant contracts (time-based). The POE will be comprised of various experts and those will need to be hired under individual contracts because POE members will need to be internationally renowned experts in their respective fields and the experience and qualifications of the individuals are of paramount requirement. This cannot be achieved through hiring of a firm. We will invite those individual consultants that we deem qualified to provide the required consulting services. The complete TOR will be sent with the invitation.

Estimated cost: The estimated cost of each POE member contract is presented in the Procurement Plan (PP) and is expected to range from US\$300,000 to US\$574,000.

Duration of contract: The POE members will provide services during the period of May 2022 – May 2031.

Level of risk: Low.

Activity 4: Update of the Project implementation completion schedule

Selection method: Direct contract with joint venture of Tractebel-ELC (France-Italy).

The direct contracting is justified for the following reasons:

- a. The JV of Tractebel-ELC was selected in 2018 using international competitive process. The contract is financed by the Government. The consultant was hired to carry out update of the project implementation schedule, technical supervision of some construction activities and manage the interface among existing civil works contractors under Rogun HPP Project. The contract is still ongoing with the focus on technical supervision of construction works.
- b. The engagement of JV of Tractebel-ELC is justified because this assignment is related to ongoing services under the existing contract. The procurement is of both very low value and low risk.

Estimated cost: US\$100,000.

Duration of contract: May 2022 – July 2022.

Risk level: Low.

Activity 5: Preparation of a financing plan to complete construction of the Project

Selection method: Quality and Cost Based Solution (QCBS). International Competitive.

Estimated cost: US\$474,000.

Duration of contract: July 2022 – September 2022.

Risk level: Medium.

Activity 6: Financial and legal advisor to negotiate and sign long-term power purchase agreements

Selection method: Quality and Cost Based Solution (QCBS). International Competitive.

Estimated cost: US\$1,100,000.

Duration of contract: August 2022 – June 2023.

Risk level: Medium.

Activity 7: Update of economic analysis of the Project

Selection method: Direct contract with Poweren Consulting (UAE). This method is justified given that the Consultant has knowledge of the Project of exceptional worth to the needs of the assignment. The proposed consultant has previously completed a similar contract with the Borrower for detailed modelling of electricity sector, dispatch simulation, and valuation of economic costs and benefits of large hydro rehabilitation projects. The contract was under Nurek Hydropower Rehabilitation Project financed by the World Bank. Therefore, the Consultant can perform the task with much

greater speed and precision, which is of critical importance for the Rogun HPP. Without detailed and very rigorous updated economic analysis, based on the updated implementation schedule, it will be impossible to secure financing for the completion of the Rogun HPP. This, in turn, will create technical and safety risks. The performance of this consultant was satisfactory under the previous contract.

Estimated cost: US\$ 200,000.

Duration of contract: July 2022 - October 2022.

Risk level: Low.

Activity 8: Purchase of IT and office equipment for Rogun PIG

Selection method: Request for Quotation.

Estimated cost: US\$50,000.

Duration of contract: September 2022.

Risk level: Low.

Activity 9: Audit of the annual financial statements of the grant

Selection method: LCS. The audit firms will be selected from the World Bank's list of auditors eligible to carry out Project audits.

Estimated cost: US\$20,000 per year (needs to be carried out for each year during 10-year implementation period of the TA)

Duration of contract: Recurring.

Risk level: Low.

- The request for bids/request for proposals document shall require that bidders/proposers submitting bids/proposals present a signed acceptance at the time of bidding, to be incorporated in any resulting contracts, confirming application of, and compliance with, Bank Anti-Corruption Guidelines, including without limitation the Bank's right to sanction and the Bank's inspection and audit rights;
- Bidding documents, including contract forms, acceptable to the Bank shall be used. Bidding documents shall include provisions, as agreed with the Bank, intended to adequately mitigate against environmental, social, health and safety ("ESHS") risks and impacts.

1. Project Overview

Country:	Lao People's Democratic Republic
Full Project Name:	Lao PDR Covid-19 Response Project Additional Financing
Total Finance (\$):	US\$ 33 million, in which: - IDA loan 6606 US\$ 18 million - IDA loan 6946 US\$10 million - HEPR Trust Funds no. B5890 US\$ 3 million - HEPR Trust Fund no. B5891 US\$2 million
Project Number:	P173817 and P175771
Implementing Agency	Ministry of Health, Department of Planning and Corporation
Summary of Project Development Objectives	The project development objective (PDO) is to respond to the COVID-19 outbreak and strengthen national systems for public health emergency preparedness in Lao PDR.

1.1. Scope of Project

The AF would support the costs of expanding activities of the Lao PDR COVID-19 Response Project (P173817 and P175771) under the COVID-19 Strategic Preparedness and Response Program (SPRP) using the Multiphase Programmatic Approach (MPA), approved by the Board on April 2, 2020, and the vaccines AF to the SPRP approved on April 6, 2020, and the vaccines AF to the SPRP approved on October 13, 2020¹. The primary objectives of the AF are to enable affordable and equitable access to COVID-19 vaccines and help ensure effective vaccine deployment in Lao PDR through vaccination system strengthening, and to further strengthen preparedness and response activities under the parent project. The Lao PDR COVID-19 Response Project in an amount of US\$ 18 million IDA – was approved on April 2, 2020 prepared under the SPRP. The additional financing of IDA US\$10 million loan, IDA of US\$3 million grant for Covid-19 vaccine deployment, and US\$ 2 million to Strengthen Health Facility and Lifeline Infrastructure for HEPR. This AF is being provided mainly to assist the safe and effective deployment of vaccines in Lao PDR.

1.2. Major Procurement Activities

The AF financing will be predominantly allocated to vaccine deployment (51.6% of AF) and vaccine procurement (33.3% of the AF). The AF will also include support staff for the project operation, and monitoring. It also comprises technical assistant of the medical waste management, water treatment, quality and safety of isolation facilities and health facilities.

¹ The Bank approved a US\$12 billion WBG Fast Track COVID-19 Facility (FTCF or “the Facility”) to assist IBRD and IDA countries in addressing the global pandemic and its impacts. Of this amount, US\$6 billion came from IBRD/IDA (“the Bank”) and US\$6 billion from the International Finance Corporation (IFC). The IFC subsequently increased its contribution to US\$8 billion, bringing the FTCF total to US\$14 billion. The Additional Financing of US\$12 billion (IBRD/IDA) was approved on October 13, 2020 to support the purchase and deployment of vaccines as well as strengthening the related immunization and health care delivery system.

Procurement methods shall be used under the AF are Direct Selection, and Request for Quotations.

2. Overview of Marketplace

Experience from the parent project shows that the largest packages were goods and most bidders were local and there was no interest from foreign bidders because of the country lockdown due to the COVID crisis. However, under the AF, the largest contract will be the procurement of the COVID vaccine, which will be not available at the suppliers in the country. The procurement of vaccines can possibly be done in ways such as a bilateral contract between the government, procuring directly from manufacturers, procuring through cost-sharing of COVAX facility by contracting with UNICEF who has the expertise in procuring vaccine and vaccine logistic management. Most of the key options were to be procured by using the Direct Selection Method to shorten the time and process of procurement in order to respond to urgency.

3. Procurement Risk Analysis

The main procurement under the AF devoted to the procurement of Covid-19 vaccine. The funding goes to this procurement item as high as 5 million. Initially, the decision on the vaccine type to be procured is Johnson and Johnson, with potentially arranged through cost-sharing of the Covax facility. With such decision imposes, it must be taken into account the risk of the vaccine supply doses will not being offered to the Government of Laos. In addition, there is the possibility of the government potentially encountering delayed delivery given the limited number of vaccine suppliers in the marketplace which can affect the national vaccine deployment plan. Besides, there is the need to pay attention to the arrangement of procurement, logistic arrangement, timeline of vaccine delivery as well as the efficiency and economical choice of the vaccine supplier in terms financial spending.

Nevertheless, any of the vaccine types that has passed WHO EUL is technically acceptable under this WB financing.

From the above analysis, procurement risk should be manageable.

Key risks identified and proposed risk mitigation measures are shown in Table 1 below.

Table 1 - Procurement Related Risks and Mitigation Measures

4. Procurement Objective

4.1. General Procurement Objectives

The main procurement objectives for the project in the selection of contractors, suppliers and consultants for the supply of works, goods and equipment and consultancy services are:

- i) Obtain value for money in the extension of existing contracts to cover Project financing
- ii) Greater transparency in the selection process for all packages in a timely manner for contractors, suppliers and consultants that have sufficient capacities and qualifications to successfully execute works, supply of goods and equipment and perform consultancy services as required;
- iii) Timely acquisition of goods and services (efficiency) to support the delivery of services specifically the attainment of the Universal Health coverage

4.2. Specific Procurement Objectives

The specific procurement objectives under the projects are:

- (i) Effectively manage the procurement process and arrangement in order to get the medical supplies and Covid-19 vaccine in timeliness of need;
- (ii) Efficiently utilize the fund available by knowing the availability of vaccine stock in the country and the type of vaccine that is going to be needing. Timely procure medical equipment supplies and COVID-19 vaccine.
- (iii) Ensure timely supply and availability of equipment and supplies for logistics of vaccine distribution.

5. Recommended Procurement Arrangements for the Project

Procurement under the AF will be carried out in accordance with the World Bank's Procurement Regulations for IPF Borrowers for Goods, Works, Non-Consulting and Consulting Services, dated November 2020. As with the parent project, the AF will be subject to the World Bank's Anticorruption Guidelines, dated October 15, 2006, revised in January 2011, and as of July 1, 2016. The Project will use the Systematic Tracking of Exchanges in Procurement (STEP) to plan, record and track procurement transactions.

The major planned procurement under this AF will include: (i) additional capacity support of national, subnational and on site cold chain management; including equipment and supplies of cold rooms, vaccine containers, vaccine carriers, ice lined refrigerators (ILR) and transporting vehicles including refrigerator (temperature

controlled vehicle) this is to support the logistic arrangement of vaccines and ensuring that vaccines will be delivered to the vaccination site safely with proven control of the quality; (ii) technical assistance for production of mass media and communication campaigns including procuring camcorders and computers for production of media; ; (iii) supplies of Covid-19 Vaccine and vaccination support equipment. It will also include consultancy and non-consultant services such as (iv) works to improve isolation facilities in the 3 southern provinces; waste management and quality and safety of isolation facilities.

The current demand for COVID-19 vaccines exceeds the supply in the market which makes it more difficult for client countries to negotiate terms and conditions. Procurement of vaccines will therefore follow Direct Selection from (i) purchase through COVAX (specify whether AMC or self-financing) or (ii) direct purchase from manufacturers. Contracts for vaccines purchase financed by the Bank will be subject to the Bank's technical prior review irrespective of value and procurement approach.

Options considered under the project include, among others, (i) streamlined competitive procedures with shorter bidding time, (ii) use of framework agreements including existing ones, (iii) procurement from UN Agencies enabled and expedited by Bank procedures and standard agreements, (iv) increased thresholds for Requests for Quotations and national procurement, and (v) Hands-on Expanded Implementation Support (HEIS).

5.1. Procurement Approach

Procurement arrangements are defined based on the current context and the market analysis described above.

For Goods

Based on the analysis in the above sections, there will be 20 goods packages to be procured (14 packages under Initial Financing-IF and 6 packages under AF). The amount is estimated at US\$ 20.3 million. 6 packages under IF had been completed by applying RFQ methods, while AF packages are ongoing using the Direct Selection market approach.

The largest goods package is the procurement of COVID-19 vaccine, with the amount of US\$ 5. million. This is expected to be directly purchased with potentially arranged through cost-sharing of the Covax facility, instead of through direct purchase Sinopharm (by using the bilateral negotiation) as mentioned in the initial PPSD. Furthermore, goods packages including Computer and Camcorder, Covid-19 Waste Management Equipment, Equipment for vaccine cold chain container and vehicle for vaccine delivery will purchased through Direct Selection method.

For Works

There is a total of 5 works packages, four under the IF and another under AF. Under the IF only one Improvement of isolation facilities would be procured through RFQ method. However, due to the pandemic situation and urgent requirements, there will be additional 4 works packages including 1 Improvement/renovation of the Quarantine facility for Champassak provinces, 3 Construction of isolation and lab facilities for Champassak, Sekong and Attapeu Provinces and Infectious Waste Disposal. All those works contracts will be procured using the DS method.

For Consultant services

14 Procurement for Consulting Services packages is foreseen involving of 11 packages under IF and 3 packages under AF. Most of the packages will be done through DS approaches.

For detail please see procurement plan in below section (section 7)

6. Summary of PPSD to be inform the Bank's Preparation of the PAD

The procurement will be carried out in accordance with the World Bank Procurement Regulations for Borrowers under Investment Project Financing (IPF) dated July 1, 2016, revised November 2020 and per the provisions stipulated in the Financing Agreement. Since the RFQ method will be used for the procurement of some goods packages as the government standard Harmonized Bidding Documents and Request for Quotations for goods shall be applied. Most of the works and consulting services shall be conducted through a Direct Selection method, which will be completed much faster than other competitive approaches to support the emergency response project.

The Covid-19 Procurement Committee of the MOH as per decree no 025/MOH dated 13 April 2020 will support some of the procurement packages. New procurable activities will include small packages of goods and consulting services. The procurement approach and methods of each package are shown in Procurement plan (section 7) below.

7. Procurement Plan

Based on the PPSD a procurement plan for the project has been developed with a total of 40 packages including 20 goods, 6 works and 14 consulting services packages. The detailed procurement plan is available as a separate project document, which will be updated at any time as needed to reflect the current status of the implementation of each package or to add new packages as needed.

We declare and warrant that we, along our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not), consultants and personnel, are not subject to, and are not controlled by any entity or individual that is subject to, a temporary suspension, early temporary suspension, or debarment imposed by a member of the World Bank Group, including, inter alia, a cross-debarment imposed by the World Bank Group as agreed with other international financial institutions (including multilateral development banks), or through the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement. Further, we are not ineligible under the laws or official regulations of *[Insert name of Employer as per bidding document]* or pursuant to a decision of the United Nations Security Council.
