PROCUREMENT PLAN (Textual Part)

Project information: [Mongolia] [COVID-19 emergency response and health system preparedness project] [P-173779]

Project Implementation agency: [Ministry of Health]

Date of the Procurement Plan: [25 March 2020]

Period covered by this Procurement Plan: [Apr-Jun 2020]

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers” dated July 2016 (Revised in November 2017 and August 2018) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: shall be used for all contracts subject to international competitive procurement and those contracts as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the Procurement Regulations, when approaching the national market (as specified in the Procurement Plan tables in STEP), the country’s own procurement procedures may be used.

When the Borrower uses its own national open competitive procurement arrangements as set forth in the Law on Public Procurement of Goods, Works and Services, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations.

When other national procurement arrangements other than national open competitive procurement arrangements are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

Leased Assets as specified under paragraph 5.10 of the Procurement Regulations: Leasing may be used for those contracts identified in the Procurement Plan tables. *“Not Applicable”*

Procurement of Second Hand Goods as specified under paragraph 5.11 of the Procurement Regulations – is allowed for those contracts identified in the Procurement Plan tables *“Not Applicable”*

Domestic preference as specified under paragraph 5.51 of the Procurement Regulations (**Goods and Works**).

Goods: Not applicable (most if the Goods are not manufactured in country);

Works: Not applicable (no works planned under this Project).

Hands-on Expanded Implementation Support (HEIS) as specified under paragraphs 3.10 and 3.11 of the Procurement Regulations is Applicable. Under HIES the Project will receive the bank-facilitated procurement (BFP). BFP activities will include the following:

1. Conduct extensive market engagement and survey to identify available stock of the agreed list of critical medical consumables and equipment needed under this COVID10 response project (attached) in the quantities therein specified;
2. Assist [the Implementing Entity] in (i) negotiating prices, delivery terms, and other contract conditions with identified suppliers;
3. Draft final award letters and/or contracts adapted to specific market conditions, on a fit-for-purpose basis and ensuring consistency with Bank’s procurement framework;
4. Provide additional hands-on support in contracting to outsource logistics.

Other HEIS activities are as follows:

5. Draft technical requirements and specifications, as requested by the [Implementing Entity];
6. Assist [the Implementing Entity] in drafting procurement documents; and
7. Provide advice on evaluation procedures, participate as observers during negotiations, by only clarifying matters of the Bank Procurement Regulations.

Other Relevant Procurement Information.

Given the nature of the Project, the procurement approach shall prioritize fast track emergency procurement for the required goods, works and services that include the following measures:

- Direct Contracting and/or Limited Competition with identified manufacturers of equipment;
- Use of CQS, RFQ or National Open/Limited Competitive procurement procedures as appropriate and agreed with the Bank in the Procurement Plan.
- Considering existing framework agreements with international agencies like UNICEF, WHO, UNOPS and other UN agencies for procurement of medicines, medical supplies and commodity equipment for emergency requirements where the terms offered are more beneficial (such as delivery times);
- Increasing advance payments to 40% when supported by an advance payment guarantee;
- Waiving the conditions for bid securities and replacing them with Bid Securing Declarations;
- Maximizing the use of direct payments to foreign suppliers;
- Allowing submission of bids using emails in encrypted files where it is not feasible to receive bids in hardcopy.

All procurements under this project will be subject to Post Review (there will be no Prior Review).

Thresholds for fast track emergency procurement under the Project are:

- Increased threshold for goods for shopping of US\$500,000;
- Increased threshold for National Procurement of U\$1,000,000 and reduced bidding time to 7-14 days;
- Use of CQS rather than QCBS for larger contract below (should read 'above'?) US\$500,000.

PROCUREMENT PLAN (Textual Part)

Project information:

Country: Bolivia

Project name: Bolivia Urban Resilience Project

P-number: P165861

Project Implementation Agencies: Municipality of Santa Cruz (GAMSC) and Municipality of La Paz (GAMLPL)

Date of the Procurement Plan: September 09, 2021

Period covered by this Procurement Plan: 18 months

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers”, dated July 2016, revised November 2017 and August 2018” (“Procurement Regulations”) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: shall be used for all contracts subject to international competitive procurement and those contracts as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the Procurement Regulations, when approaching the national market (as specified in the Procurement Plan tables in STEP), the country’s own procurement procedures acceptable for the Bank by the may be used.

When the Borrower uses its own national open competitive procurement arrangements, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions.

- a. open advertising of the procurement opportunity at the national level;
- b. the procurement is open to eligible firms from any country;

- c. the request for bids/request for proposals document shall require that Bidders/Proposers submitting Bids/Proposals present a signed acceptance at the time of bidding, to be incorporated in any resulting contracts, confirming application of, and compliance with, the Bank's Anti-Corruption Guidelines, including without limitation the Bank's right to sanction and the Bank's inspection and audit rights;
- d. contracts with an appropriate allocation of responsibilities, risks, and liabilities;
- e. publication of contract award information;
- f. rights for the Bank to review procurement documentation and activities;
- g. an effective complaints mechanism; and
- h. maintenance of records of the Procurement Process.

When other national procurement arrangements other than national open competitive procurement arrangements are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

Leased Assets as specified under paragraph 5.10 of the Procurement Regulations: Leasing may be used for those contracts identified in the Procurement Plan tables. *Not Applicable.*

Procurement of Second Hand Goods as specified under paragraph 5.11 of the Procurement Regulations: *Not Applicable.*

Domestic preference as specified under paragraph 5.51 of the Procurement Regulations (***Goods and Works***): *Not Applicable.*

Hands-on Expanded Implementation Support (HEIS) as specified under paragraphs 3.10 and 3.11 of the Procurement Regulations may be Applicable.

Other Relevant Procurement Information.

Procurement activities will be undertaken by GAMSC for Part 1 and 3.1; and by the GAML P for Parts 2 and 3.2.

Procurement of Goods, Works and Non-Consulting Services. According to the Project Procurement Strategy for Development (PPSD), the open international competitive bidding approach should be applied when the Procurement Plan establishes it, while for small contracts the open national competitive bidding approach is supported by the availability of bidders in

the local market. For Works and Goods the Borrower is able to specify detailed requirements to which bidders respond by offering bids; the Request for Bids or the Request for Quotations would be the selection methods for these contracts.

Procurement of Consulting Services. Technical Assistance, designs, supervision services, and other studies: Considering that these will be small and medium magnitude contracts, the suitable market approach would be an open competition in the international or national market or direct market approach, while the Quality-Cost- Based Selection or Direct Selection (when a sole firm with needed capabilities is identified and justified) would be the selection methods.

Project implementation support personnel. Individuals contracted to support project implementation (project staff), other than individual consulting positions identified in the Legal Agreement, may be selected by the Borrower according to their personnel hiring procedures for such activities, as reviewed and found acceptable by the Bank and described in the POMs.

1.0 PROJECT OVERVIEW

Competitiveness and Financial Inclusion (CAFI), aims to provide more opportunities for women in the private sector through the following interventions: (i) focusing on women owned MSMEs for rapid disbursements during shocks. Women-owned MSMEs are particularly vulnerable to climatic shocks and require targeted support. Research in Lesotho has shown that shocks disproportionately increase the work burden of women, who, in addition to being more likely to be self-employed or employed in the informal sector, are also tasked with walking long distances to collect water for their families in droughts, growing/providing food, covering educational costs/needs, and generally sustaining the family. In rural areas, men are more likely to leave their villages in search of alternate income sources, thereby giving women the full burden of family caretaking. Thus, when climatic shocks occur, a loss of income for the self-employed women can have large and catastrophic effects on families and communities, emphasizing the need for rapid support to women-owned MSMEs; (ii) focusing on women-owned start-ups and women-owned MSMEs to assist them in launching businesses, adopting new digital technologies, and improving managerial practices. This supports gender transformation within the MSME space.

The proposed project has adopted a selective approach by targeting interventions that link closely to business expansion and resilience and job creation, specifically those related to supporting entrepreneurship, MSMEs, and high potential value chains. The proposed interventions are targeted at increasing financial inclusion and resilience as well as strengthening the support for MSMEs and entrepreneurship along the high potential value chains. Under increasing financial inclusion and resilience, the proposed interventions focus on strengthening the delivery of G2B services, increasing access to finance for MSMEs with a focus on ensuring the

inclusion of women- owned MSMEs and enhancing the resilience of the business sector from climate and other shocks. Support for MSMEs and entrepreneurship is focused on enhancing the scope and quality of business support services, access to early-stage finance and improving the overall competitiveness and climate resilience of horticulture and export manufacturing value chains. Based on the experience of the PSCED and PSCEDII projects, institutional, legal, and regulatory reforms pertaining to access to finance, investment policy and business environment reforms, while critical for overall competitiveness, have proven challenging and unnecessarily prolonged. These reforms will be supported through a parallel technical advisory support program. The project interventions proposed therefore target market and coordination failures through direct support to entrepreneurs and firms while leveraging private sector service delivery capacity to augment limited public sector capacity. Although the tourism value chain has not been explicitly targeted, entrepreneurs and existing MSMEs in the sector will be able to fully benefit from the project interventions.

1.1 Project Description

The purpose of this project is to increase access to business support services and financial products targeted at MSMEs and entrepreneurs, especially women and youth. The project has three components that will support the Government’s efforts to expand the private sector in Lesotho.

- Component 1 will enhance financial inclusion by strengthening the delivery of efficient and reliable government-to-business (G2B) digital services to facilitate the establishment and operation of new businesses and reduce the time and cost of regulatory compliance which in turn will enhance access to finance and the competitiveness of MSMEs. It will also provide support for firms to be more resilient to shocks from climate, pandemics, and other natural disasters. The component will include activities that support (i) optimizing the outcomes of investments in G2B digital systems and processes made under the PSCEDII project, to strengthen inter-operability, efficiency, and impactful service delivery for businesses, particularly those receiving support under Component 2, (ii) improving financial access through upgrading the security and reliability of credit infrastructure and expanding access to digital financial services, and (iii) instruments to expand financial resilience for businesses to cope with disasters and other shocks to the economy. These instruments will be particularly beneficial to the private sector. The component will finance technical assistance, goods, training and capacity building programs, and recurrent expenditures, including operating costs.
- Component 2 aims to strengthen the nascent entrepreneurial ecosystem and access to early-stage finance for startups and youth owned businesses, support the digitization of MSMEs, and facilitate private investment in high-potential value-chains including encourage upgrading of skills and adoption of sustainable production practices by businesses to enhance productivity and green growth. The component will include activities that support (i) establishing an Entrepreneurship Hub and Seed Financing Facility to increase the quality and scope of integrated startup business support services and increase access to early-stage financing, (ii) scaling the current Lesotho Enterprise Assistance Program (LEAP) focusing on supporting MSMEs to adopt digital technologies that allow them to transact in the digital economy and upgrade their capabilities, and (iii) facilitating investment into productive value chains that are linked to

local MSMEs. The component will finance technical assistance, goods, training, recurring expenditures including operating costs, grants, and investments in a “seed financing facility.”

- Component 3 will provide support for the management and implementation of project-associated activities. Activities to be financed include salaries of project management unit (PMU) staff/consultants in areas of project management, project coordination, fiduciary specialists (e.g., procurement, financial management), monitoring and evaluation (M&E) specialist, a dedicated environment, and social safeguards (E&S) specialist, project communication, and citizen engagement. This component will also cover modest office equipment and independent audits and learning/training for the PMU and beneficiary agencies, through the official closing date of the project. It is expected that all consultant terms of reference (TORs) will clearly stipulate knowledge transfer and hands on training to ministry staff. Special attention will be devoted to promoting equal participation of women in all decision-making bodies under the project and contributing to tackling barriers in recruitment, retention, and promotion.

1.2 Project Development Objectives

The project development objective (PDO) is to increase access to business support services and financial products targeted at MSMEs and entrepreneurs, especially women and youth.

The proposed project supports results in two areas:

- (i) Improving financial inclusion and resilience through improvements in government to business services, government supported financial products that increase MSME creation, growth, and resilience to climatic and other shocks; and

- (ii) Direct support for entrepreneurship and MSMEs to increase start-up creation and growth and the capabilities of MSMEs to grow and participate in the value chains of high potential export industries.

1.3 Results Indicators

The project's achievement of the PDO will be measured via the following key results indicators:

1. Number of enterprises benefitting from private sector initiatives of the program (Of which are women-owned, of which are youth-owned);
2. Value of financing (seed funding, grants, partial credit guarantee, MSME resilience funds) accessed by enterprises through the program (Of which are women-owned);
3. Percentage of enterprises supported by the program with increased revenue (Of which are women-owned, of which are youth-owned);
and
4. Percentage of enterprises supported by the program with increased employment (Of which are women-owned, of which are youth-owned).

There are also indicative intermediate indicators which will be used to measure the performance of the project, and these are:

- Firms benefiting from private sector initiatives (CRI, Number) (Of which are women-owned, and of which are youth-owned).
- Percent change in the number of enterprises accessing supported G2B systems;
- Number of key G2B systems upgraded with the support from the program;
- Percentage of women-owned enterprises recorded as being creditworthy in the credit bureau;
- Number of additional enterprises covered by the partial credit guarantee (PCG) scheme;
- Number of MSMEs registered for coverage in MSME Resilience Fund database;
- Number of startups and innovative SMEs supported through entrepreneurship hub support programs;
- Number of startups and innovative SMEs supported through entrepreneurship hub support programs of which are women-owned;
- Number of enterprises accessing early-stage finance;
- Number of entrepreneurship hub and LEAP program supported enterprises that adopted new digital technologies;
- Number of LEAP fund supported enterprises with 25% or greater increase in revenues one year after grant support; and
- Number of supported enterprises in targeted value chains with increased value of exports.

1.4 High Level Statement of Requirement

The implementation of the Competitiveness and Financial Inclusion Project requires procurement of consulting and non-consulting services, goods, and works under the project components. Consulting services will be needed to provide capacity building and technical advisory services as well as

management assistance to both PMU and beneficiary agencies. Procurement of consulting services will be needed to enhance G2B digital services to more effectively serve MSMEs, access to financial services, strengthening the resilience of MSMEs to Climatic Disasters and shock scaling-up support for Entrepreneurship and MSME's and expanding SME participation in high potential value chains. Procurement of works will be needed to support the refurbishment of Mahobong Incubation Hub as well as partitioning of PMU office. Procurement of goods will be needed to provide ICT equipment to support implementation of Component 1 system upgrades including the business registration and licensing system at OBFC, the LRA customs system, the MCC construction permitting system to mention a few. Table 1 below provides a summary of the estimated costs of procurement package per component, works, good and consulting services included.

CHAPTER 2

2.0 OVERVIEW OF COUNTRY, BORROWER AND MARKET PLACE

2.1 Operational Context

This section provides an overview of the context in which the project will be implemented and the conditions under which the procurement process will take place. It is essentially based on a simplified Governance, Economic, Sustainability and Technological (GEST) analysis as suggested in the procurement guidance: Project Procurement Strategy for Development Short Form Guidance (World Bank:2017).

2.1.1 Governance Aspects

Lesotho's private sector is largely concentrated in two sectors - mining and textiles/apparel manufacturing - and economic diversification has proven challenging due to a lack of competitiveness. The two sectors account for 84 percent of all formal sector employment and over two-thirds of all exports. Both sectors have experienced challenges in recent years. Textile and apparel exports have been declining due to competitiveness challenges and Kenya has overtaken Lesotho as the leading apparel exporter to the United States under the African Growth and Opportunity Act (AGOA). Total employment in the export manufacturing sector dropped from a peak of 43,500 in February 2020 to a low of 31,000 in April 2020 before rebounding to 39,000 in September 2020.¹ It was reported that an additional 6,000 workers had been laid off in 2021. Job losses in the textile/manufacturing sector have had a significant impact on women and on widening gender gaps in labour market outcomes in Lesotho. Women comprise 80 percent of the approximately 40,000 textile workers in Lesotho and an increasing

¹ LNDC survey of 64 firms in eight industrial estates, November 2020; most of these factory workers are women

proportion of those who migrate to South Africa for jobs in the textile industry.² The pandemic has exposed the underlying challenges that are stifling the export competitiveness of the manufacturing sector as well as exposing the vulnerable position of women workers in the sector, who suffer from occupation segregation across the entire spectrum of labour market opportunities occupying lower-skilled jobs compared to men, even in sectors such as manufacturing where they predominate. Lesotho's mining sector is entirely dependent on diamond exports which have faced declining demand in recent years.

Lesotho's business environment is still weak despite recent reforms, with political instability, tax rates and practices of the informal sector emerging as the top three constraints for firms. The Second National Strategic Development Plan (NSPD II) (2019-2023) identified an "uncompetitive business environment" as one of the key binding constraints on the growth of private enterprises, adversely affecting both FDI and local micro, small, and medium enterprises (MSMEs). Recent reforms include new legislation for business registration and licensing and secured lending as well as starting adoption of digital systems and procedures in trade facilitation, land administration, and construction permits, all supported under the World Bank's Second Private Sector Competitiveness and Economic Diversification Project (PSCED2), which closes in June 2022. However, weak regulations and inadequate institutional capacity hinder the effective implementation of these reforms necessary for meaningful impact. Lesotho's ranking in the Global Competitiveness Index dropped from 123 to 131 out of 141 countries (from 2014 to 2019), and the Logistics Performance Index ranking also dropped from 133 to 139. In the most recent Enterprise Survey, the top constraints faced by firms are (in order of severity): (i) **political instability**, (ii) **tax rates**, (iii) **practices of the informal sector**, (iv) **access to finance**, (v) **crime**, (vi) **theft and disorder**, (vii) **access to land**, (viii) **electricity (power supply)**, (ix) **corruption** (x) **tax administration**, and (xi) **customs and trade**

regulations.³ These challenges have manifested in different ways. For example, insolvency takes 2.6 years with a recovery rate of 28 cents per dollar compared to 2 years and 43 cents of recovery for the rest of the SACU region⁴ and the onerous licensing regulations have left local wool and mohair farmers with just one broker through whom they can sell their production.

2.1.2 Economic Aspects

Despite being a lower-middle income country, Lesotho experiences persistently high levels of unemployment, informality, inequality, and poverty, which have been further exacerbated by the Covid-19 pandemic. GDP growth has steadily worsened over the past decade, from a peak of 6.3 percent in 2012 to -11.1 percent in 2020, resulting in a 12 percent decline in GDP per capita from 2016 to 2020. Lesotho's poor economic performance has been the result of compounding factors including declining revenues from the Southern African Customs Union (SACU)⁵, recurrent climate related shocks that have drained fiscal resources⁶, a high public sector wage bill that has inhibited spending on development objectives, and contraction of key economic sectors (manufacturing and tourism) due to the Covid-19 pandemic. Unemployment is at 22.5 percent⁷, and while the poverty rate in Lesotho fell from 56.6% to 49.7% between 2002 and 2017, economic vulnerability persists with more than 75% of the population either poor or vulnerable to poverty, driven in large part by exposure to climatic shocks. Declines in remittances due to Covid-19 related border restrictions have further exacerbated poverty. Although income and other measures of inequality have fallen, Lesotho remains one of the most unequal countries in the world.⁸ Overall, Lesotho's economic and social development is not commensurate with the country's lower-middle-income-status.⁹

The public sector has a disproportionate role in the economy, crowding out private participation and resulting in a weak and largely informal private sector. The government has been the main driver of economic activity, with public spending accounting for 60 percent of GDP and with public sector

⁵ SACU revenues fell from 30% of GDP in FY2012/13 to 17.7% of GDP in FY2017/18 and are expected to decline further to 15.2% of GDP in FY 2019/20.

⁶ The average annual cost of disaster response is estimated at US\$19.3 million, or 1.6 percent of the total budget expenditure in the 2019/20 fiscal year.

investment levels averaging around 29 percent of GDP since 2010, both figures amongst the highest in the world. The government's contribution to GDP now far exceeds that of the textile and apparel industry, which is the largest private sector industry in Lesotho. Lesotho's public sector wage bill (as a percentage of GDP) is one of the highest in the world and has crowded out private sector employment. Public sector workers earn an average monthly salary that is approximately seven times higher than the minimum wage of a skilled worker in the textile sector.¹⁰ The recent Mid-Term Budget Review projects the compensation of employees to account for 45.9 percent of total government expenditures for 2020/21.

Core inflation, which excludes the CPI suppliers with extreme price changes, however, decelerated from 4.2 percent in June 2021 to 3.9 percent in July 2021. The decline was broad-based but major contributors were food and non-alcoholic beverages, transport, housing, water, electricity, gas and other fuels and alcohol and tobacco components. The disinflation during the review period reflected declining international food prices due to better cereal production from the United States and Argentina and cancelled grain import orders from China. In addition, the exchange rate appreciation of South African Rand against the US. Dollar contributed to falling domestic prices, amid favourable harvest conditions, domestic availability of grain and limited food import demand. (*Central Bank of Lesotho Monthly Economic Review (July 2021)*).

2.1.3 Sustainability Aspects

Sustainable procurement is a process which incorporates sustainability considerations throughout the procurement process in order to achieve optimal value for money in delivering development objectives. (*Sustainable Procurement an introduction for practitioners to sustainable procurement in World Bank IPF projects November 2016*). The United Nations Environment Programme (UNEP) defines Sustainable Public Procurement

¹⁰ Lesotho Poverty Assessment. World Bank (2019)

(SPP) as “a process whereby organisations meet their needs for goods, services, works and utilities in a way that achieves value for money on a whole life basis in terms of generating benefits not only to the organisation, but also to society and the economy, whilst minimising damage to the environment” (*United Nations Environment Programme, 2015*).

The project is supporting broad reforms on financial inclusion and the private sector. Such efforts are meant to strengthen access to finance, create jobs, and support export-led growth. Sustainability will be supported through three main avenues, system-level interventions, infrastructure development, and skills development/capacity building.

- a) **System-level Interventions will Promote Structural Reform.** System-level interventions include investments to enhance the interoperability of government IT systems that facilitate private sector activity, implementation of a government payment gateway to support G2B digital payments, investments to strengthen credit infrastructure, and the establishment of a private sector window within the contingency fund and procurement of sovereign insurance (which will be co-financed on a sliding basis, so the cost is increasingly transferred to the budget over the life of the project).
- b) **Establishment of Infrastructure:** The project will support the establishment of a sustainable entrepreneurship hub, seed financing facility, infrastructure for the horticulture incubator program. This infrastructure will exceed the life of the project, enabling activities to continue.
- c) **Technical Assistance will Build Skills Amongst the Workforce and Government Capacity.** Technical assistance will be provided to the Government to address deficiencies and build interoperability and strengthen disaster risk financing. For the workforce, skills development initiatives will build technical, supervisory and management capacity in high potential sectors and capacity of MSMEs

and entrepreneurs. Building capacity at the government level will enable line ministries and agencies to continue project activities after the completion of the project. Skills development is intended to equip the workforce with the skills required at the labour market, thereby enabling them to find employment.

2.1.4 Technological Aspects

Digital transformation can foster economic growth, reduce poverty, increase productivity and create jobs. However, its potential is underutilised in Lesotho. Whereas good progress has been made in improving digital infrastructure, adoption and use of digital technology is lagging. Around two thirds of the population are not regularly using the internet, pointing to a wide digital divide. As a result, the ability of the government to take advantage of the internet connectivity and digital channels of service delivery for COVID-19 response is limited. Adoption and use of digital technology should be accelerated to meet the needs under the pandemic, but also for long-term recovery and development. In 2018, approximately two-thirds of the population were not using the internet regularly even though 97 percent of the population was covered by a 3G network and 72 percent by the 4G network signal. Lesotho ranked 133 on the 2017 ITU ICT Development Index, behind South Africa (92), Botswana (105) and Namibia (118). This ranking was driven by limited use of, and demand placed on the extensive broadband infrastructure. Digital public platforms such as digital ID systems and digital financial services are key for improving efficiency, quality and inclusiveness of the public and private services. Though several G2B services have been developed and adopted with success, the government may need to consider adopting more coordinated and strategic approach towards advancing digital government. Investments in technology may need to be put on shared interoperable infrastructure and services that can be leveraged across various government entities. Legal and regulatory gaps especially concerning cybersecurity, electronic transactions and e-commerce should be fixed. A road map for adopting electronic payments across all government services

should be developed and the digital financial services market further enhanced.

Lesotho is characterised with private sector that makes limited use of digital technologies. In the private sector, digital technology can change the way economies of scale are achieved, particularly through e-commerce and digital payments. The digital economy may provide the better matching of buyers and sellers in a competitive marketplace. The digital economy offers potential for enhanced service delivery in the public sector, but the Lesotho government's efforts in this field appear fragmented and slow moving. Improved digital infrastructure can only achieve the desired transformational impact if combined with a capable public sector, investments in digital skills and literacy, increased access to digital financial services, and ramped up support for digital start-ups and existing businesses.

Though Lesotho is characterised with weak business environment induced by weak government regulations and policies and inadequate institutional capacity to support implementation of reforms that curtail the weak environment, the success of the PSECDP II in implementing reforms supporting private sector development is an indication of the willingness of the country to eliminate these constraints and enhance its rating. The environment within which the CAFI project will be implement is deemed favourable and pose no potential risk that may affect the efficiency and the effectiveness of the project implementation. As mentioned above, the low level of inflation and stable exchange rate will support efficient procurement of both goods and services that would create value for money. Nevertheless, the project encompasses enormous digital transformation that may call for project implementing agencies to prepare accurate technical specifications to ensure relevant purchase of equipment and technology to meet the project development objectives.

2.2 Assessment of Borrower Capability and Project Implementation Unit (PIU)

The Project governance is an “oversight function that is aligned with the organization's governance model and encompasses the project life cycle,” this is according to *A Guide to the Project Management Body of Knowledge (PMBOK® Guide)* – Fifth Edition (Project Management Institute, 2013, p. 34). There are two critical elements in this statement that need to be emphasised:

- *Alignment with organization's governance:* There needs to be an understanding of the project's environment to ensure that there is a right fit with the established Project's governance. This alignment is a crucial factor and has been considered when defining (1) the **project governance framework**, (2) **roles and responsibilities** and (3) **stakeholder engagement and communication**.

The project governance structure is similar to the one used in the implementation of PSCEDP II, which has proven to be effective. The PSCEDP II structure has maintained constant flow of information from the Project Management Unit to all key stakeholders. The proposal is therefore to adopt a strengthened version of the PSCEDP II governance structure (to match the project size) as it ensures that all key stakeholders that are critical for the successful implementation of the project are represented; The Department of Planning under the Ministry of Trade and Industry (MTI) will remain the implementing agency for the CAFI project as MTI already has extensive experience in implementing WB-financed projects. Critical to the governance structure are the following:

a) **Project Steering Committee**

The Steering Committee will provide advice, ensures delivery of the project outputs and the achievement of project outcomes. The committee is responsible for policy decisions to support the project approvals and implementations, review project progress and facilitates for implementation by the PIUs. The steering committee helps to steer the project through from start to completion. The committee:

- Reports to the stakeholders.
- Consists of representatives of key Stakeholder Ministries (Trade and Industry, Finance, Development Planning, Agriculture and Food Security, Tourism, Environment and Culture etc.), relevant State-Owned Enterprises (Lesotho National Development Corporation, Basotho Enterprise Development Corporation and Lesotho Tourism Development Corporation), Maseru City Council and critical regulators (Central Bank of Lesotho, Land Administration Authority and Lesotho Revenue Authority);
- Reports to GoL (Ministry of Finance, Ministry of Trade and Industry and others) and WB on project implementation status;
- Coordinate other ministries around project implementation;
- The Principal Secretary of the Ministry of Trade and Industry shall chair the Steering Committee; and
- The Steering Committee receives reports from the Project Manager.

b) Client/Contracting Authorities

- The contracting authority is the Ministry of Trade and Industry.
- Signs all contracts with private entities to implement the project (works, services, goods);
- Authorise payments to all private entities that have been contracted.
- Report to GoL (Ministry of Finance and others) and WB on project implementation status; and
- Coordinate other ministries around project implementation.

c) Project Management Unit (PMU)/ Project Implementation Unit

- As the frontline actor, PIU plans, executes, monitors, administers and manages the project representing the project implementing agency (MTI);
- Reporting to the Ministry of Trade and Industry and Stakeholder in the format agreed with the Ministry of Development Planning;
- Establish financial accounting and control systems and ensure accurate and timely report submissions and funds flow from WB and onwards to the implementing agencies. Financial status and forecast, disbursements;
- Procurement and contracting of private entities;
- All contracts management (works, services, goods);
- Supervise, coordinate and monitor the work of PIUs for implementation of project activities; and
- Contribute to institutional analysis if necessary and requested.

c) Project Manager (PM)

The Project Manager is responsible for the day-to-day implementation of the project through performing the following:

- Reporting to MTI and the Steering Committee;
- Financial status and forecast, disbursements;
- Procurement and contracting of private entities;
- Manage Human Resources of the Project;
- Oversee contracts negotiations;
- Manage the assets of the project;
- All contracts management (works, services, goods);
- Physical monitoring of works (technical, E&S etc...); and
- All other duties as stipulated in the Terms of Reference.

A further assessment of the Procurement Capability within the Ministry of Trade and Industry (PMU) has been done. The Ministry through the PMU/PIU

has over the past fifteen years successfully implemented similar projects including: a) The First Private Sector Competitiveness and Economic Diversification Project (PSCEDP I) b) The Second Private Competitiveness and Economic Diversification Project (PSCEDP II) and c) PSCEDP II - Additional Financing (on-going).

Procurement Risk Assessment: The procurement risk assessment has taken into considerations the Strengths, Weaknesses, Opportunities and Threats of the operational context of the implementing agencies. The project will be implemented by the same Project Management Unit (PMU) that is currently implementing the World Bank financed Second Private Sector Competitiveness and Economic Diversification Project (PSCEDP II) under MTI. The PSCEDP II PMU has a good track record of many years and has established project implementation capacity as well as working relationships with key agencies and Ministries across the Government. The PSCEDP II is ending in June 2022 thereby allowing the PMU to be available and ready for CAFI project implementation from the outset of the project. The PMU will be responsible for all fiduciary aspects of the project including FM and procurement activities. The MTI and its PMU, having prior experience of working on PSCED and PSCED II projects, are expected to implement the project smoothly. However, the fact that there will be more project beneficiaries under each component and subcomponent, could pose coordination risk due to the complexity of the project. Based on the existing procurement capacity within the MTI/PMU and taking into consideration one additional Procurement Officer to be recruited by the Project the procurement risk is rated **Moderate**. This rating has also considered the fact that the current project does not have any IPF component involving complex or high value contracts. It is also expected that all the procurement activities envisaged under the new project (CAFI) will be simple and small value contracts. Taking all these circumstances into consideration, the four major capacity limitations or risks identified at the moment are: (i) lack of prior experience of implementing IPF procurement procedures; (ii) coordination challenge as implementation of components and subcomponents involve many beneficiaries; (ii) Implementation capacity

gap within the different beneficiaries and (iii) lack of practices on good contracts implementation management.

2.3 Project Procurement Unit Structure

The Procurement Unit within the Project Management Unit (PMU) is staffed with qualified procurement professionals i.e. The Procurement Manager holds MSc Degree in Supply Chain Management with more than ten (10) years’ experience in procurement, while the Procurement Officer has bachelor’s degree in economics with seven years’ experience.

TABLE 2: PIU Procurement Staff

Supply Chain Staff			
Position	Qualifications	Experience	Experience working on Bank financed Projects procurement
Procurement Manager	MSc in Supply Chain, BA Degree in Business Administration, Chartered Institute of Procurement and Supply (Professional Diploma Level 6)	Over 10 years’ experience in procurement.	The Procurement Manager has held a senior procurement management positions since 2017. She managed and administered procurement services under the Lesotho government’s capital projects and donor funded projects including AfDB and World Bank supported projects.
Procurement Officer	BA Economics and Chartered Institute of Procurement and Supply (Diploma, level 4)	Over 7 years’ experience in procurement.	The Procurement Officer has over 7 years’ experience working on GoL capital projects that are supported by development partners including AfDB and the World Bank. In addition, the officer has worked as a Procurement Officer for the World Bank financed PSCEDP since 2021.

2.4 Market Analysis

Supplier Preferencing

Account attractiveness	HIGH	Development Nurture client Expand business Seek new opportunities	Core Cosset client Defend vigorously High service & response
	LOW	Nuisance Give low attention Lose without pain	Exploitable Drive premium price Seek short term advantage Risk losing customer
		LOW	HIGH
		Relative value of the business	

The objective of market research and analysis is to develop a good understanding of the market sectors that have been identified as having the potential to bid for the goods, services, and/or works required by the Project. This is to ensure the eventual Procurement Approach maximizes the likelihood of the right suppliers participating, and the right supplier being selected thereby minimizing failed procurement processes due to no bids, or the wrong types of bids.

Supplier Preferencing identifies the approaches suppliers use based on their segmentation of customers. The table below provides a view of a supplier's likely approach to the project in each category.

Summary of Procurement Market Analysis for the Project:

Considering the local, Regional, and international market situations and the nature and value of the procurement activities under this project, the market risk is low and favourable. Conducting further detail market research for other innovative market approaches and selection methods is not proportional. Therefore, the default selection methods are fit-for-purpose as indicated in table 6, Chapter 6 of this PPSD.

Procurement Risk Mitigation Measures: The MTI will have overall responsibility of procurement under the project. Based on the above preliminary procurement implementation risks identification, the mitigation measures may also include: (i) provision of reorientation/training to the PMU on Bank's procurement procedures and contract management, including use of STEP platform; (ii) putting in place simple, but efficient, procurement and contract management mechanism (tracking system);(iii) Develop Project Operational Manual/Project Procurement Strategy for Development (PPSD) that would assist the practitioners on procurement routines and (iv) strengthen the PMU based on the needs of the new project. More frequent World Bank implementation support missions with the aim of providing closer support and monitoring the performance of PMU and its Procurement team's performance would also add value.

Record Keeping: All records pertaining to award of tenders, including bid notification, register pertaining to sale and receipt of bids, bid opening minutes, bid evaluation reports and all correspondence pertaining to bid evaluation, communication sent to/with the World Bank in the process, bid securities, and approval of invitation/evaluation of bids by the management would be retained by the Procurement Unit and also uploaded in the STEP for Post ante review and independent procurement audit, as necessary.

Operational Context, SWOT Analysis:

According to CIPS (2012) Strengths, weaknesses, opportunities, and threats (SWOT) analysis is a technique of corporate appraisal, used to assess the internal resources of an organisation (or function or project) to cope with and/or capitalise on factors in the external environment in which it operates. This tool will be used to assess the PMU's capability. A summary of the strengths, weaknesses, opportunities, and threats regarding the capacity of the PMU is presented as follows:

STRENGTHS

The Project Management Unit (PMU) has extensive experience in executing projects funded by the World Bank and the African Development Bank (AfDB) and has both tangible and non-tangible resources to execute projects. The unit already has some human capital with relevant skills set to execute the project and the Project Manager has successfully managed the PSCEDP I and PSCEDP II and PSCEDP II - Additional Financing. The Project Manager is supported by an experienced competent fiduciary management team that has more than 10 years' experience. The project also has experience in stakeholder and private sector engagements and administration of matching grants. The PMU already has office space, furniture and ICT equipment which are in good condition to start the new project. The responsible Ministry also has prior operational experience in implementation of World Bank financed projects.

WEAKNESSES

The procurement staff lacks operational capacity to administer procurement of multiple packages at the same time in a timely manner. The operational capacity is limited by under-staffing of the Procurement Unit.

OPPORTUNITIES

The Project has tools and systems in place that enables procurement to be carried out effectively, efficiently, and economically. All procurements under the project will be carried out in accordance with the World Bank's Procurement Regulations for Investment Project Financing Recipient's-Procurement in investment Project Financing Goods, Works, Non-Consulting and Consulting services. The project will also be subject to the guidelines on preventing and combating fraud and corruption in projects Financed by IBRD Loans and IDA Credit and grants. The Systematic Tracking Exchange Procurement (STEP) system will be used to track all procurement planning, execution, and contract management. The PMU will also recruit additional procurement staff to strengthen the capacity of the Procurement Unit.

THREATS

The main threat is **political instability**, which may hinder implementation of important policies and regulations. The governing coalition remains fragile with considerable risk of frequent change in administration during project implementation. Political instability can also deter new international investors and experienced service providers. Limited availability of service providers can in turn delay procurement processes and may lead to selection of inexperienced consultants.

<p>Strength:</p> <ol style="list-style-type: none"> 5. PIU's Prior experience of similar projects implementation 6. Well-functioning PMU having necessary facilities and motivated team 7. - Awarding contracts to qualified, experienced, capable bidders so that 90 percent of contracts are executed within original allotted time; and
- Contracts are completed with not more than 15 percent cost overruns by carrying out robust design at bidding stage.

CHAPTER 6

6.0 PROCUREMENT APPROACH OPTIONS AND RECOMMENDATIONS

This procurement strategy/approach is designed based on the project requirements, technical solutions, and market information, institutional capacity and experience of the Ministry of trade and Industry (MoTI). The Market approach and selection method proposed for each package has taken into considerations values, complexities, local market capacity and institutional experiences of MoTI to achieve better Value for Money (VfM) while supporting the project achievement of objectives its objectives. The project has no high value and complex contract packages as such. However, the PPSD has focused on separate packages for consultancy services and works using both international and national approach to markets with the objectives of fostering competitions to enable the PIU get best of what the market can offer. For certain unique packages, where open competition may not be the best-fit approach, Direct Selection (DS) has been proposed with clear justifications on why DS is found to be fit-for-purpose as against the default open competitive market approaches.

The following activities are proposed for **Direct Selection** market approach for the reasons as indicated in the below table:

9. Contract Management Plan (CMP)

As the project at hand (CAFI) doesn't involve any high value and complex contract, the Contract Management Plan (CMP) being outlined below may not need to be applied fully. However, the basic ones that would help the CMU manage its contracts (Works, Goods, Non-Consultancy Services or Consultancy services) with better efficiency to achieve its intended objectives may be adopted. The primary objective of any CMP is achievement of designed quality, agreed delivery timelines and perform within the contract ceiling amount. Assuring sustainability objectives in terms of environmental, social, and economic compliance are also sustainability dimension to be achieved through appropriate and proportional CMP. The Key contract management tools are all around establishing clear communication lines and having defined roles and responsibilities in the contract implementations. We declare and warrant that we, along our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not), consultants and personnel, are not subject to, and are not controlled by any entity or individual that is subject to, a temporary suspension, early temporary suspension, or debarment imposed by a member of the World Bank Group, including, inter alia, a cross-debarment imposed by the World Bank Group as agreed with other international financial institutions (including multilateral development banks), or through the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement. Further, we are not ineligible under the laws or official regulations of *[Insert name of Employer as per bidding document]* or pursuant to a decision of the United Nations Security Council.

- d. temporary suspension or early temporary suspension in connection with an ongoing World Bank Group sanctions proceeding.

For avoidance of doubt, the foregoing effects of ineligibility do not extend to a sanctioned firm's or individual's execution of its ongoing Bank-financed contracts (or its ongoing sub-agreements under such contracts) that are not the subject of a material modification, as determined by the Bank.

To:

We, along with our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not) consultants and personnel, acknowledge and agree to abide by the World Bank's policy regarding Fraud and Corruption (corrupt, fraudulent, collusive, coercive, and obstructive practices), as set out and defined in the World Bank's Anti-Corruption Guidelines¹ in connection with the procurement and execution of the contract (in case of award), including any amendments thereto.

We declare and warrant that we, along our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not), consultants and personnel, , are not subject to, and are not controlled by any entity or individual that is subject to, a temporary suspension, early temporary suspension, or debarment imposed by a member of the World Bank Group, including, inter alia, a cross-debarment imposed by the World Bank Group as agreed with other international financial institutions (including multilateral development banks), or through the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement. Further, we are not ineligible under the laws or official regulations of *[Insert name of Employer as per bidding document]* or pursuant to a decision of the United Nations Security Council.

For avoidance of doubt, the foregoing effects of ineligibility do not extend to a sanctioned firm's or individual's execution of its ongoing Bank-financed contracts (or its ongoing sub-agreements under such contracts) that are not the subject of a material modification, as determined by the Bank.

We shall permit, and shall cause our sub-contractors, sub-consultants, agents (whether declared or not), personnel, consultants, service providers or suppliers, to permit the Bank to inspect⁴ all accounts, records, and other documents relating to the procurement process and/or contract execution (in the case of award), and to have them audited by auditors appointed by the Bank.

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers” (July 2016, Revised November 2017 and August 2018) (“Procurement Regulations”) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

When the Borrower uses its own national open competitive procurement arrangements as set forth in Public Procurement Rules 2004 Revised 2020, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions:

- 1) The eligibility of bidders shall be as defined under Section III of the Procurement Regulations. Accordingly, no bidder or potential bidder shall be declared ineligible for contracts financed by the Bank for reasons other than those provided in Section III of the Procurement Regulations.
- 2) For national open competitive procurement, only the model procurement documents acceptable to the World Bank, shall be used.

- 3) The request for bids/request for proposals document shall require that Bidders/Proposers submitting Bids/Proposals present a signed acceptance (in the form attached) at the time of bidding, to be incorporated in any resulting contracts, confirming application of, and compliance with, the Bank's Anti-Corruption Guidelines, including without limitation the Bank's right to sanction and the Bank's inspection and audit rights.
- 4) *Procurement Documents include provisions, as agreed with the Bank, intended to adequately mitigate against environmental, social (including sexual exploitation and abuse and gender-based violence), health and safety ("ESHS") risks and impacts*

- 6) No preference of any kind shall be given to national bidders in the bidding process.
- 7) Procurement methods that use two-envelope process and rated criteria shall be subject to Bank's prior concurrence

When other national procurement arrangements (other than national open competitive procurement) are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

We declare and warrant that we, along our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not), consultants and personnel, are not subject to, and are not controlled by any entity or individual that is subject to, a temporary suspension, early temporary suspension, or debarment imposed by a member of the World Bank Group, including, inter alia, a cross-debarment imposed by the World Bank Group as agreed with other international financial institutions (including multilateral development banks), or through the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement. Further, we are not ineligible under the laws or official regulations of *[Insert name of Employer as per bidding document]* or pursuant to a decision of the United Nations Security Council.

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers” (July 2016, revised November 2017 and August 2018) (“Procurement Regulations”) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: shall be used for all contracts subject to international competitive procurement and those contracts as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the Procurement Regulations, when approaching the national market (as specified in the Procurement Plan tables in STEP), the country’s own procurement procedures may be used.

When the Borrower uses its own national open competitive procurement arrangements as set forth in the *National Procurement Act 2018*, No. 12 of 2018, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions.

National preferences	Eligibility: Eligibility to participate in a procurement process for and to be awarded a Bank financed contract shall be as defined under paragraphs
----------------------	---

	<p>3.21-3.23 of the Procurement Regulations; accordingly, no bidder or potential bidder shall be declared ineligible for contracts financed by the Bank for reasons other than those provided in the said paragraphs. Foreign bidders shall be eligible to participate in bidding under the same conditions as national bidders. No domestic preference shall be granted in bid evaluation on the basis of bidder's nationality, origin of goods or services, and/or preferential programs.</p>
<p>Registration of bidders as condition for bidding</p>	<p>Registration of bidders: Registration shall not be used to assess bidders' qualifications. A foreign bidder shall not be required to register as a condition for submitting its bid, and a foreign bidder recommended for contract award shall be given a reasonable opportunity to register, with the reasonable cooperation of the Recipient, prior to contract signing.</p>
<p>Procurement documents</p>	<p>Procurement Documents: Templates of procurement documents, including contract forms, acceptable to the Association shall be used for all procurement financed by the Project.</p>
<p>Document Fees</p>	<p>Bidding Document Fees: A fee for bidding documents if applied must be reasonable and is to be used to offset the actual costs associated with reproduction of large bidding documents and associated plans and drawings. It is not to be used to generate revenue, or to limit or restrict participation in procurement processes. Bidding document fees are not to be charged for the procurement of consulting services (firms and individual), non-consulting services, or goods.</p>
<p>Fraud and Corruption</p>	<p>Fraud and Corruption: The procurement documents shall require that bidders submitting bids present a signed acceptance at the time of bidding, to be incorporated in any resulting contracts, confirming application of, and compliance with, the Bank's Anti-Corruption Guidelines, including without limitation the Bank's right</p>

	to sanction and the Bank’s inspection and audit rights.
Negotiations and cancellation of procurement process	Cancellation of all bids: All bids (or the sole bid if only one bid is received) shall not be rejected, the procurement process shall not be cancelled, and new bids shall not be solicited without the Bank’s prior written concurrence.
Complaints Handling	Complaints Review Mechanism: The Recipient shall establish and implement an effective, fair and timely complaints review mechanism allowing bidders to complain and to have their complaints handled in a timely manner. Until an adequate complaints review mechanism (as assessed by the Bank) is established the Bank’s review mechanism as set out in the Procurement Regulations will apply.
Contract Award Notice	Publication of Contract Award Notice: For purposes of Article 36(5) of the Act, within one month from award, a notice of all procurement contract awards shall include, at a minimum as relevant and applicable for each procurement method (a) the name of each bidder that submitted a bid; (b) bid prices as read out at bid opening; (c) evaluated prices of each bid that was evaluated; (d) the names of bidders whose bids were either rejected as nonresponsive or not meeting qualification criteria, or not evaluated, with the reasons thereof; and (e) the name of the winning bidder, the final total contract price, as well as the duration and a summary of the scope of the contract.

When other national procurement arrangements other than national open competitive procurement arrangements are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

PROCUREMENT PLAN - Textual Part

Project information: Sint Maarten Emergency Recovery Project (P167339)

Project Implementation Agency: NRPB

Date of the Procurement Plan: April 29, 2021

Period covered by this Procurement Plan: From April 2021 to March 2022

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers” (July 2016) (“Procurement Regulations”) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: Shall be used for all contracts subject to international competitive procurement and those contracts as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the Procurement Regulations, when approaching the national market (as specified in the Procurement Plan tables in STEP), the country’s own procurement procedures may be used.

When the Borrower uses its own national open competitive procurement arrangements as set forth in the National Procurement Legislation such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions:

1. The request for bids/request for proposals document shall require that Bidders/Proposers submitting Bids/Proposals present a signed acceptance at the time of bidding to be incorporated in any resulting contracts, confirming application of, and compliance with, the Bank’s Anti-Corruption Guidelines, including without limitation the Bank’s right to sanction and the Bank’s inspection and audit rights. The Bank’s Anti-Corruption Guidelines and Sanctions Framework shall be incorporated into the national bidding documents by adding a page entitled “Letter of Acceptance of the World Bank’s Anti-Corruption Guidelines and Sanctions Framework”.
2. Contracts with an appropriate allocation of responsibilities, risks, and liabilities between the Borrower and the contractors/suppliers/consultants.

3. Rights for the Bank to review procurement documentation and activities. In accordance with the Procurement Regulations, each bidding document and contract shall include provisions stating the Bank's policy to sanction firms or individuals, found to have engaged in fraud and/or corruption as defined in the Procurement Regulations. In accordance with the Procurement Regulations, each bidding document and contract financed out of the proceeds of the Financing Agreement shall provide that bidders, suppliers, contractors and their subcontractors, agents, personnel, consultants, service providers, or suppliers shall permit the Bank to inspect all accounts, records and other documents relating to the bid submission and performance of the contract and to have said accounts and records audited by auditors appointed by the Bank. Acts intended to materially impede the exercise of the Bank's inspection and audit rights provided for in the Procurement Regulations constitute an obstructive practice as defined in the Regulations.
4. No bids shall be rejected solely because they fall below or exceed the estimated cost. All bids (including in the case when less than two bids are received) shall not be rejected, the procurement process shall not be cancelled, and new bids shall not be solicited without the Bank's prior written concurrence. The Bidding Documents template to be used under "national open competitive procurement arrangements" are subject to prior written concurrence by the Bank.

When other national procurement arrangements other than national open competitive procurement arrangements are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

Leased Assets as specified under paragraph 5.10 of the Procurement Regulations: Not Applicable.

Procurement of Second-hand Goods as specified under paragraph 5.11 of the Procurement Regulations: Not Applicable

Ce texte ainsi que les tableaux du plan de passation des marchés présents dans STEP constituent le plan de passation des marchés du projet. Les conditions suivantes s'appliquent à toutes les activités de passation de marchés du plan de passation de marchés. Les autres éléments du plan de passation des marchés tels que requis au paragraphe 4.4 du Règlement de passation des marchés sont énoncés dans STEP.

Les Dossiers types de passation des marchés publics de la Banque devront être utilisés pour tous les contrats soumis à la concurrence internationale, ainsi que pour tous les autres contrats soumis à cette obligation telle que spécifiée dans les tableaux du plan de passation des marchés de STEP.

Procédures nationales de passation des marchés : En accord avec le paragraphe 5.3 du Règlement de passation des marchés, dans le cas où la procédure de passation des marchés se fera au niveau national (telle que spécifiée dans les tableaux du plan de passation des marchés inclus de STEP), les procédures nationales de passation des marchés du Niger pourront être utilisées.

Si l'Emprunteur utilise ses propres procédures d'appel d'offres national ouvert telles qu'énoncées dans la Loi N°2011-37 du 28 Octobre 2011 portant principes généraux, contrôle and régulation des marchés publics et des délégations de service public au Niger et le Décret N° 2016-641/PRN/PM du 21/Décembre 2016 portant Code des marchés Publics et des Délégations de Service Public, ces arrangements sont soumis aux dispositions du paragraphe 5.4 du Règlement de passation des marchés et aux conditions qui suivent.

Les dispositions à respecter pour un appel d'offres/à propositions ouvert national sont les suivantes :

- b. Les documents de passation des marchés incluent des dispositions, convenues avec la Banque, destinées à atténuer de manière adéquate les risques et impacts environnementaux et sociaux (y compris l'exploitation et les abus sexuels et la violence basée sur le genre), l'hygiène et la sécurité (« ESHS ») ;
- c. les droits de la Banque d'examiner le dossier et les activités de passation des marchés ;
- d. l'existence d'un mécanisme efficace d'examen des plaintes ; et
- e. la gestion et l'archivage des dossiers relatifs au Processus de la Passation des Marchés.

Les autres modalités nationales de passation des marchés (autres que sous forme d'appel d'offres/à propositions national ouvert) qui pourraient être appliquées par l'Emprunteur (appel d'offres limité/restreint, demande de prix/consultation de fournisseurs, entente directe) doivent être conformes avec les Principes Fondamentaux de Passation des Marchés de la Banque et garantir que les Directives de la Banque contre la corruption, son Cadre de Sanctions et les recours contractuels visés dans l'Accord Juridique s'appliquent.

Procurement

General

1. Procurement for the project would be carried out in accordance with the World Bank's "Guidelines: Procurement of Goods, Works, and Non-Consulting Services under IBRD Loans and IDA Credits & Grants" dated January 2011 (revised July 2014); and "Guidelines: Selection and Employment of Consultants under IBRD Loans and IDA Credits & Grants by World Bank Borrowers" dated January 2011 (revised 2014); and the provisions stipulated in the Loan Agreement. The World Bank Guidelines on Preventing and Combating Fraud and Corruption in Projects Financed by IBRD Loans and IDA Credit and Grants dated October 15, 2006 and revised on January 2011, would also apply.

Procurement arrangements and capacity assessment

2. The RGA, under the MCTI, would be the main implementing agency. This agency has already implemented the RECRP. A PIU would be established, which would report directly to the Director General of RGA. The PIU would be responsible for all procurement procedures under the project, supported from at least one full-time procurement officer for all procurement. The PIU Director and technical staff have some experience in World Bank procurement, but this is rather limited. A procurement officer experienced in WB procurement would be hired for the needs of the project, and would work in close coordination with the PIU team. The PIU would be supported also by a procurement assistant, as needed. In addition, technical staff from relevant departments within RGA which might be called on sitting in evaluation committee would be trained on their specific role and general principles of Bank procurement rules.

3. A detailed Project Operational Manual (POM) has been prepared based on previous versions used for RECRP and it was reviewed by the Bank. It would be further revised before the project starts. The manual includes procurement methods to be used in the project along with their step-by-step explanation as well as the standard and sample documents to be used for each method, and service standards, responsibilities and accountability of PIU staff and management for carrying out the activities. The procurement staff and all potential members of tender (or bid evaluation) committees would attend the project launch workshop that would be organized by the Bank staff following the signing of the loan agreement. Further, the Bank team would help the project coordinator identify suitable training courses for the PIU existing team.

4. **Risk Mitigation:** The following measures were agreed to mitigate the risks and maintain the implementing team's capacity.

Table 2: Summary Risk Assessment

Risk	Mitigation
<ul style="list-style-type: none"> Limited procurement capacity of the PIU and insufficient knowledge of Bank's procurement and consultant guidelines may delay selection/bidding process and contract management 	<ul style="list-style-type: none"> RGA will hire a PIU procurement expert with experience in World Bank financed projects/international procurement. Selection of the procurement expert is a condition of effectiveness.
<ul style="list-style-type: none"> Unsatisfactory quality of technical designs/ToRs may lead to delays in contract implementation and to contract amendments 	<ul style="list-style-type: none"> Preparation of draft technical specifications /terms of reference before project effectiveness, at least for the contracts for which the selection process is to take place in the first 12 months of the project implementation; Close involvement of Bank technical expert in the review of the TOR/ TS and designs; Bank prior review of critical packages/ assignments.
<ul style="list-style-type: none"> PIU might be initially overwhelmed with the number of the consultants and/or size of contracts to procure and implement 	<ul style="list-style-type: none"> Recruitment of key staff after loan signing so that ToRs, technical specifications and bidding documents can be prepared early on. Strengthening PIU's procurement, technical and contract administration capacity via workshops. The packages in the procurement plan will be sequenced and phased to allow sufficient time for bidding, evaluation and Bank review.
<ul style="list-style-type: none"> The public officials/technical staff, who will be involved in project procurement through tender committees, may not be familiar with the applicable procurement procedures, and may slow down the procurement process 	<ul style="list-style-type: none"> Technical staff from relevant departments within RGA will be previously trained on their specific role and general principles of Bank procurement rules; Operations Manual will set out the service standards, responsibilities and accountability of PIU staff, technical staff management for carrying out the activities. Furthermore, the Bank team will help the project coordinator identify suitable training courses for the PIU team; The order for appointment of evaluation committees shall specify the timeframe by which the evaluation committee should complete evaluation and recommendation of award;

Risk	Mitigation
<ul style="list-style-type: none"> Insufficient technical capacity within the supervision or other departments on RGA may cause contract supervision delays related to implementation and poor quality of goods, works and services. 	<ul style="list-style-type: none"> Adequate consulting services and technical assistance, training, knowledge exchange would be provided under the project Component D, as needed; Intensive and close supervision by Bank technical team and procurement accredited staff in particular;
<ul style="list-style-type: none"> Insufficient knowledge of the latest Procurement and Consultants Guidelines (January 2011) 	<ul style="list-style-type: none"> PIU staff, and especially the Procurement Expert would attend procurement training organized by the Bank The Bank's Procurement Specialist assigned to the project has provided the PIU with a full set of the relevant, most recent procurement documents, including but not limited to standard and sample bidding documents, proposal formats, evaluation report documents, etc.

The Procurement Plan

5. The Borrower, at appraisal, finalized the procurement plan for project implementation, prepared during preparation phase, which provides the basis for procurement methods. It includes the Bank review requirements and thresholds. The procurement plan would be reviewed and agreed between the Borrower and the Bank during negotiations. It would be available as a separate project document at the office of the PIU, and on the Bank's external website. The Procurement Plan would be updated in agreement with the Bank as required to reflect the actual project implementation needs.

Procurement of Goods, Works and Non-Consulting Services

6. The following methods may be used for procurement of goods, works and non-consulting services as agreed in the procurement plan: International Competitive Bidding (ICB), National Competitive Bidding (NCB), Shopping (S), and Direct Contracting (DC).

Procurement of Works

7. Works procured under this project would include construction and rehabilitation of buildings and putting up concrete markers on part of or all the territory of the country, for the leveling grid stabilization. Procurement will be done using the Bank's Standard Bidding Documents (SBD) for all ICB and NCB packages. Prequalification would not be used at all, regardless of the size of civil works contracts. Minor works, as relevant, could use Invitation to Quote (ITQ) for Works acceptable to the Bank for contracts less than or equal to EUR 85,000.

Procurement of Goods and Non-Consulting Services

8. Goods and non-consulting services to be procured would include IT systems, furniture, IT equipment (hardware and software), purchase of vehicles for motorized levelling, measurements for the REC, gravity meter equipment, measurement of altitude differences and grid stabilization, data acquisition and improvement. Procurement for all ICB procedures would be done using the Bank's SBDs. Smaller value contracts, as needed, would be procured using harmonized NCB documents for Goods or shopping using ITQ (June 2011), depending on the cost estimate for the package. The standard documents for supply and installation of information systems would be used for the procurement of the software development phases and roll out. Software maintenance for the control center will be procured through direct contracting considering the equipment already in use works with particular software (provided only by one supplier) and any new software would require changes of the whole equipment which is not feasible and costly.

Selection of Consultants

9. Consultant services will include preparation of quality assurance system and data manual, data verification and analysis and modeling, preparation of corporate and business planning, individual consultants for entering of backlog data, map conversion and utility map conversion, capacity building, awareness raising and knowledge transfer, updating the ICT strategy. Multiple individual consultants/technical staff will be hired under the project for the entry of data.
