1. Project Overview

Country:	Lao People's Democratic Republic
Full Project Name:	Lao PDR Covid-19 Response Project Additional Financing
Total Finance (\$):	US\$ 33 million, in which: - IDA loan 6606 US\$ 18 million - IDA loan 6946 US\$10 million - HEPR Trust Funds no. B5890 US\$ 3 million - HEPR Trust Fund no. B5891 US\$2 million
Project Number:	P173817 and P175771
Implementing Agency	Ministry of Health, Department of Planning and Corporation
Summary of Project Development Objectives	The project development objective (PDO) is to respond to the COVID-19 outbreak and strengthen national systems for public health emergency preparedness in Lao PDR.

1.1. Scope of Project

The AF would support the costs of expanding activities of the Lao PDR COVID-19 Response Project (P173817 and P175771) under the COVID-19 Strategic Preparedness and Response Program (SPRP) using the Multiphase Programmatic Approach (MPA), approved by the Board on April 2, 2020, and the vaccines AF to the SPRP approved on April 6, 2020, and the vaccines AF to the SPRP approved on October 13, 2020¹. The primary objectives of the AF are to enable affordable and equitable access to COVID-19 vaccines and help ensure effective vaccine deployment in Lao PDR through vaccination system strengthening, and to further strengthen preparedness and response activities under the parent project. The Lao PDR COVID-19 Response Project in an amount of US\$ 18 million IDA – was approved on April 2, 2020 prepared under the SPRP. The additional financing of IDA US\$10 million loan, IDA of US\$3 million grant for Covid-19 vaccine deployment, and US\$ 2 million to Strengthen Health Facility and Lifeline Infrastructure for HEPR. This AF is being provided mainly to assist the safe and effective deployment of vaccines in Lao PDR.

1.2. Major Procurement Activities

The AF financing will be predominantly allocated to vaccine deployment (51.6% of AF) and vaccine procurement (33.3% of the AF). The AF will also include support staff for the project operation, and monitoring. It also comprises technical assistant of the medical waste management, water treatment, quality and safety of isolation facilities and health facilities.

¹ The Bank approved a US\$12 billion WBG Fast Track COVID-19 Facility (FTCF or “the Facility”) to assist IBRD and IDA countries in addressing the global pandemic and its impacts. Of this amount, US\$6 billion came from IBRD/IDA (“the Bank”) and US\$6 billion from the International Finance Corporation (IFC). The IFC subsequently increased its contribution to US\$8 billion, bringing the FTCF total to US\$14 billion. The Additional Financing of US\$12 billion (IBRD/IDA) was approved on October 13, 2020 to support the purchase and deployment of vaccines as well as strengthening the related immunization and health care delivery system.

Procurement methods shall be used under the AF are Direct Selection, and Request for Quotations.

2. Overview of Marketplace

Experience from the parent project shows that the largest packages were goods and most bidders were local and there was no interest from foreign bidders because of the country lockdown due to the COVID crisis. However, under the AF, the largest contract will be the procurement of the COVID vaccine, which will be not available at the suppliers in the country. The procurement of vaccines can possibly be done in ways such as a bilateral contract between the government, procuring directly from manufacturers, procuring through cost-sharing of COVAX facility by contracting with UNICEF who has the expertise in procuring vaccine and vaccine logistic management. Most of the key options were to be procured by using the Direct Selection Method to shorten the time and process of procurement in order to respond to urgency.

3. Procurement Risk Analysis

The main procurement under the AF devoted to the procurement of Covid-19 vaccine. The funding goes to this procurement item as high as 5 million. Initially, the decision on the vaccine type to be procured is Johnson and Johnson, with potentially arranged through cost-sharing of the Covax facility. With such decision imposes, it must be taken into account the risk of the vaccine supply doses will not being offered to the Government of Laos. In addition, there is the possibility of the government potentially encountering delayed delivery given the limited number of vaccine suppliers in the marketplace which can affect the national vaccine deployment plan. Besides, there is the need to pay attention to the arrangement of procurement, logistic arrangement, timeline of vaccine delivery as well as the efficiency and economical choice of the vaccine supplier in terms financial spending.

Nevertheless, any of the vaccine types that has passed WHO EUL is technically acceptable under this WB financing.

From the above analysis, procurement risk should be manageable.

Key risks identified and proposed risk mitigation measures are shown in Table 1 below.

4. Procurement Objective

4.1. General Procurement Objectives

The main procurement objectives for the project in the selection of contractors, suppliers and consultants for the supply of works, goods and equipment and consultancy services are:

- i) Obtain value for money in the extension of existing contracts to cover Project financing
- ii) Greater transparency in the selection process for all packages in a timely manner for contractors, suppliers and consultants that have sufficient capacities and qualifications to successfully execute works, supply of goods and equipment and perform consultancy services as required;
- iii) Timely acquisition of goods and services (efficiency) to support the delivery of services specifically the attainment of the Universal Health coverage

4.2. Specific Procurement Objectives

The specific procurement objectives under the projects are:

- (i) Effectively manage the procurement process and arrangement in order to get the medical supplies and Covid-19 vaccine in timeliness of need;
- (ii) Efficiently utilize the fund available by knowing the availability of vaccine stock in the country and the type of vaccine that is going to be needing. Timely procure medical equipment supplies and COVID-19 vaccine.
- (iii) Ensure timely supply and availability of equipment and supplies for logistics of vaccine distribution.

5. Recommended Procurement Arrangements for the Project

Procurement under the AF will be carried out in accordance with the World Bank's Procurement Regulations for IPF Borrowers for Goods, Works, Non-Consulting and Consulting Services, dated November 2020. As with the parent project, the AF will be subject to the World Bank's Anticorruption Guidelines, dated October 15, 2006, revised in January 2011, and as of July 1, 2016. The Project will use the Systematic Tracking of Exchanges in Procurement (STEP) to plan, record and track procurement transactions.

The major planned procurement under this AF will include: (i) additional capacity support of national, subnational and on site cold chain management; including equipment and supplies of cold rooms, vaccine containers, vaccine carriers, ice lined refrigerators (ILR) and transporting vehicles including refrigerator (temperature

controlled vehicle) this is to support the logistic arrangement of vaccines and ensuring that vaccines will be delivered to the vaccination site safely with proven control of the quality; (ii) technical assistance for production of mass media and communication campaigns including procuring camcorders and computers for production of media; ; (iii) supplies of Covid-19 Vaccine and vaccination support equipment. It will also include consultancy and non-consultant services such as (iv) works to improve isolation facilities in the 3 southern provinces; waste management and quality and safety of isolation facilities.

The current demand for COVID-19 vaccines exceeds the supply in the market which makes it more difficult for client countries to negotiate terms and conditions. Procurement of vaccines will therefore follow Direct Selection from (i) purchase through COVAX (specify whether AMC or self-financing) or (ii) direct purchase from manufacturers. Contracts for vaccines purchase financed by the Bank will be subject to the Bank's technical prior review irrespective of value and procurement approach.

Options considered under the project include, among others, (i) streamlined competitive procedures with shorter bidding time, (ii) use of framework agreements including existing ones, (iii) procurement from UN Agencies enabled and expedited by Bank procedures and standard agreements, (iv) increased thresholds for Requests for Quotations and national procurement, and (v) Hands-on Expanded Implementation Support (HEIS).

5.1. Procurement Approach

Procurement arrangements are defined based on the current context and the market analysis described above.

For Goods

Based on the analysis in the above sections, there will be 20 goods packages to be procured (14 packages under Initial Financing-IF and 6 packages under AF). The amount is estimated at US\$ 20.3 million. 6 packages under IF had been completed by applying RFQ methods, while AF packages are ongoing using the Direct Selection market approach.

The largest goods package is the procurement of COVID-19 vaccine, with the amount of US\$ 5. million. This is expected to be directly purchased with potentially arranged through cost-sharing of the Covax facility, instead of through direct purchase Sinopharm (by using the bilateral negotiation) as mentioned in the initial PPSD. Furthermore, goods packages including Computer and Camcorder, Covid-19 Waste Management Equipment, Equipment for vaccine cold chain container and vehicle for vaccine delivery will purchased through Direct Selection method.

For Works

There is a total of 5 works packages, four under the IF and another under AF. Under the IF only one Improvement of isolation facilities would be procured through RFQ method. However, due to the pandemic situation and urgent requirements, there will be additional 4 works packages including 1 Improvement/renovation of the Quarantine facility for Champassak provinces, 3 Construction of isolation and lab facilities for Champassak, Sekong and Attapeu Provinces and Infectious Waste Disposal. All those works contracts will be procured using the DS method.

For Consultant services

14 Procurement for Consulting Services packages is foreseen involving of 11 packages under IF and 3 packages under AF. Most of the packages will be done through DS approaches.

For detail please see procurement plan in below section (section 7)

6. Summary of PPSD to be inform the Bank's Preparation of the PAD

The procurement will be carried out in accordance with the World Bank Procurement Regulations for Borrowers under Investment Project Financing (IPF) dated July 1, 2016, revised November 2020 and per the provisions stipulated in the Financing Agreement. Since the RFQ method will be used for the procurement of some goods packages as the government standard Harmonized Bidding Documents and Request for Quotations for goods shall be applied. Most of the works and consulting services shall be conducted through a Direct Selection method, which will be completed much faster than other competitive approaches to support the emergency response project.

The Covid-19 Procurement Committee of the MOH as per decree no 025/MOH dated 13 April 2020 will support some of the procurement packages. New procurable activities will include small packages of goods and consulting services. The procurement approach and methods of each package are shown in Procurement plan (section 7) below.

7. Procurement Plan

Based on the PPSD a procurement plan for the project has been developed with a total of 40 packages including 20 goods, 6 works and 14 consulting services packages. The detailed procurement plan is available as a separate project document, which will be updated at any time as needed to reflect the current status of the implementation of each package or to add new packages as needed.

Component C: Institutional	107.6m	This component aims to strengthen capacities of institutions at various levels (e.g., national, selected states)

Strengthening and Project Management		to modernize their work for the longer-term on integrated multi-sectoral planning, information management, and building systems for improving land and water management and sustainable agricultural productivity in northern Nigeria.
Component D: Contingency Emergency Response Components (CERC):	0m	This will finance a Contingency Emergency Response Component (CERC) for landscape and community resilience in response to extreme weather, land movement events and other emergencies.

LIST OF PROCUREMENT ACTIVITIES

The project is designed as framework project and therefore investments and the participating states (the major investments will be implemented by the participating states) are not fully known yet. In the table below are the activities that already known, and implementation can commence immediately. The PPSD will be updated during implementation as the investments and participating states become more defined. These investments include gully erosion control, rehabilitation of irrigation and dams.

Strategic Assessment of Operating Context and Borrower Capability

Operational Context

Nigeria experiences a diverse climate that ranges from arid in the north to tropical in much of the country and is listed among the countries most exposed to climate risks. The country faces a high water-scarcity hazard level, with droughts expected to occur on average every five years, with potential increased frequency due to climate change. Focusing on drylands management, ACRoSAL will be implemented in the states of northern Nigeria. The agricultural sector is the major economic driver of northern Nigeria. Many projects and initiatives have been undertaken in northern Nigeria over the past decades to combat the growing crisis of desertification. The FGN is thus increasingly moving toward an integrated and multisectoral approach to address the challenges of dryland management.

(a) Governance Aspects: There are security challenges in almost all the states in the northern Nigeria where the project will be implemented. The Government of Nigeria is making some progress in addressing these security challenges. The security situation may reduce the interest of major players, especially for Component A to participate in the procurement process and those that choose to participate may add a premium to the bid prices to take of the additional security arrangement they want to put in place during contract execution in case of an award.

(b) Economic Aspects: Nigeria has just come out of an economic recession because of CIVID 19 pandemic and a fall in crude oil price in the world market. The country is contending with high inflation and exchange rate volatility. The high inflation and exchange rate volatility has made the prices of the major construction materials such as iron rods and cement to be volatile. Substantial proportion of the Component consist of civil works with locally available inputs (labour and materials). The effect of the exchange volatility will be minimal since bidders expecting to incur expenditures in other currencies for inputs to the Works supplied from outside the country can quote for such inputs in up to three different foreign currencies in their

bids. Serious bottleneck exists in the main seaport where goods to be imported from abroad will be discharged. This has led to delay in the custom clearance of good from the port with the resulting demurrage payment and delay in contract execution. The government is working on policy that will remove the bottlenecks.

(c) Sustainability Aspects: The government environmental and social standards requires that Environmental and Social Impact Assessment be carried on all major works project before the commencement of such works. ESIA will apply to this project and will be reflected in the solicitation documents and contracts for civil works under the project.

(d) Technological Aspects: Kaduna, Niger, Kogi, Jigawa, Borno, Kano and Gombe States that will likely participate in the project have an e-Procurement system which is being used in some of the MDAs. Sokoto State is in the final stages of their e-Procurement implementation. The systems so deployed will be used for procurement under the project. This will further improve value for money, transparency, economy, efficiency, effectiveness, integrity, and openness of procurement process under the project. The country is covered substantially by GSM, part of which is through extensive fiber optic cabling leading to increased networking and internet availability. The availability of reasonable internet access will facilitate the use of the World Bank Systematic Tracking of Exchanges in Procurement (STEP) which is mandatory requirement in the processing all procurement activities under the World Bank Procurement Regulations.

Key Conclusions: The security challenges in the country especially in the northern states that will participate in the project may reduce the participation of foreign firms and firms from other parts of the in the procurement process for the project. The current high inflation and exchange rate volatility in the country will affect the costing of the various procurement packages in the project. The use of eProcurement for by the participating states and the FPMU will improve value for money, transparency, economy, efficiency, effectiveness, integrity, and openness of procurement process under the project

Assessment of Borrower previous Experience, Capability and Project Implementation Unit (PIU)

The project will be implemented using the existing NEWMAP PMUs at both Federal and State levels that are implementing NEWMAP and the NEWMAP AF that will close on June 30, 2022. The implementation arrangement is similar to that of NEWMAP. Each state will be responsible for the procurement of its own activities including contract management and administration. The FPMU and the states that are implementing NEWMAP have experience in World Bank Procurement Regulations. The procurement officers have received sufficient training in procurement under World Bank funded project. The gaps that were observed in the implementation of NEWMAP especially in contract management will be addressed under ACRE SAL. Training will be provided on contract management, application of price adjustment, contract monitoring and supervision as soon as the project is effective.

Market Analysis

The summary of the procurement activities under the project are as follows

- **Civil works:**
 - o gully erosion control,
 - o flood and sedimentation control,
 - o construction of firebreaks,
 - o rehabilitation and construction of small dams,
 - o small scale irrigation infrastructure,
 - o small buildings

There are several players both national and international in the marketplace for these activities. International open competitive procurement approach will be used for high value, high risk gully erosion control and construction of dams and firebreaks. The other low value, low risk procurement will follow national open competition or limited competition as may be appropriate.

- **Goods:**
 - o fire control equipment,
 - o vehicles,
 - o farm inputs (seeds, fertilizers),
 - o post-production equipment,
 - o computers, furniture

They are locally available and be supplied by several suppliers and the procurement approach will be national open/limited completion as may be appropriate.

The approach for the procurement of farm inputs (seeds, fertilizer) will limited competition between the well-known producers/suppliers of these goods.

- **Consulting services:**

The major consulting services includes engineering design and supervision of the major civil works like gully erosion control and rehabilitation of dams. The firms that offer this service are available in the local and international markets. Due to the criticality of this consulting assignment to the overall delivery of the major works contracts, the procurement will be designed to attract best consulting firms to express interest in this assignment.

Procurement Risk Analysis

Market /Contract Title Description	Risk Description	Description of Mitigation	Risk Owner
Construction of shovel ready gully erosion control site	Designs may no longer be valid by the contracts during contract execution	A consultant will be hired to update the design before the commencement of	State PMU and World Bank

		the procurement process	
	Expansion of the gullies between bidding and contract signature	Provisions for physical contingencies will be made in the signed contract.	State PMUs
	Expansion of gullies during construction due to poor drainage resulting from construction of the works	Proper drainage on the site must be maintained during construction and the Contractor shall be held responsible for any flood damage to life and properties due to his work in this Contract. The Contractor shall allow in his rates, inter alia, for all costs to maintain or divert flow in drains, ditches, open channels and watercourses during construction and other drainage work. No claims for additional payment will be considered in this regard.	Contractor
Construction supervision consultancy	Poor supervision of the works contracts		
Procurement of goods to be imported from outside the country (delfino ploughs, tractors, etc)	Delay in port clearance	All the necessary documentation and waivers will be processed speedily	PMUs
General (for all contracts)	High inflation and exchange rate volatility	Price adjustment to be applied to most even if their duration is less than 18 months.	PMUs

Procurement Objective

- To a minimum of 8 qualified consultants to participate in the selection process for the engineering design and supervision consultancy for the major works contracts.
- To take advantage of the dry season for the construction contracts by aligning the commencement of the works with the dry season in the project areas.
- Value for money and integrity in the procurement process using electronic procurement system.
- To have not less than six qualified firms submit bids for the major works contracts.

Summary of PPSD to be inform the Bank's preparation of the PAD

The project is designed as framework project and therefore investments and the participating states (the major investments will be implemented by the participating states) are not fully known yet.

The security challenges in the country especially in the northern states that will participate in the project may reduce the participation of foreign firms and firms from other parts of the in the procurement process for the project. The current high inflation and exchange rate volatility in the country will affect the costing of the various procurement packages in the project. The use of eProcurement for by the participating states and the FPMU will improve value for money, transparency, economy, efficiency, effectiveness, integrity, and openness of procurement process under the project. The FPMU and the states that are implementing NEWMAP have experience in World Bank Procurement Regulations. The procurement officers have received sufficient training in procurement under World Bank funded project. The gaps that were observed in the implementation of NEWMAP especially in contract management will be addressed under ACRoSAL. A sufficiently large numbers of firms are available locally and international for most of the procurement packages under the project, therefore competitive procurement can readily be used to achieved value for value during procurement implementation. The design of the gully erosion sites already cleared under NEWMAP that will be transferred to project will be updated prior to the launching of the procurement processes for the construction of such sites.

The PPSD will be regularly updated as there are clear pictures on the participating states and the procurement activities that will be implemented by the states and the FPMU.

We, along with our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not) consultants and personnel, acknowledge and agree to abide by the World Bank's policy regarding Fraud and Corruption (corrupt, fraudulent, collusive, coercive, and obstructive practices), as set out and defined in the World Bank's Anti-Corruption Guidelines² in connection with the procurement and execution of the contract (in case of award), including any amendments thereto.

We declare and warrant that we, along our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not), consultants and personnel, are not subject to, and are not controlled by any entity or individual that is subject to, a temporary suspension, early temporary suspension, or debarment imposed by a member of the World Bank Group, including, inter alia, a cross-debarment imposed by the World Bank Group as agreed with other international financial institutions (including multilateral development banks), or through the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement. Further, we are not ineligible under the laws or official regulations of *[Insert name of Employer as per bidding document]* or pursuant to a decision of the United Nations Security Council.

We confirm our understanding of the consequences of not complying with the World Bank's Anti-Corruption Guidelines, which may include the following:

- a. rejection of our Proposal/Bid for award of contract;

¹[Drafting note: This document shall be signed by bidders/proposers/consultants and submitted as part of their bids/proposals. In addition, this document shall be signed by the winning bidder/consultant and incorporated as part of the contract.]

²*Guidelines on Preventing and Combating Fraud and Corruption in Projects Financed by International Bank for Reconstruction and Development Loans and the International Development Agency Credits and Grants*, dated October 15, 2006, and revised in January 2011 and July 2016, as they may be revised from time to time.

- b. in the case of award, termination of the contract, without prejudice to any other remedy for breach of contract; and
- c. sanctions, pursuant to the Bank's Anti-Corruption Guidelines and in accordance with its prevailing sanctions policies and procedures as set forth in the Bank's Sanctions Framework. This may include a public declaration of ineligibility, either indefinitely or for a stated period of time, (i) to be awarded or otherwise benefit from a Bank-financed contract, financially or in any other manner;³ (ii) to be a nominated⁴ sub-contractor, sub-consultant, consultant, manufacturer or supplier, or service provider of an otherwise eligible firm being awarded a Bank-financed contract; and (iii) to receive the proceeds of any loan made by the Bank or otherwise to participate further in the preparation or implementation of any Bank-financed project.

We understand that we may be declared ineligible as set out above upon:

- a. completion of World Bank Group sanctions proceedings according to its prevailing sanctions procedures;
- b. cross-debarment as agreed with other international financial institutions (including multilateral development banks);
- c. the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement; or
- d. temporary suspension or early temporary suspension in connection with an ongoing World Bank Group sanctions proceeding.

For avoidance of doubt, the foregoing effects of ineligibility do not extend to a sanctioned firm's or individual's execution of its ongoing Bank-financed contracts (or its ongoing sub-agreements under such contracts) that are not the subject of a material modification, as determined by the Bank.

We shall permit, and shall cause our sub-contractors, sub-consultants, agents (whether declared or not), personnel, consultants, service providers or suppliers, to permit the Bank to inspect⁵ all accounts, records, and other documents relating to

Preamble

In accordance with paragraph 5.9 of the “World Bank Procurement Regulations for IPF Borrowers” (July 2016 and revised November 2017) (“Procurement Regulations”) the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to prepare, clear and update Procurement Plans and conduct all procurement transactions for the Project.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: shall be used for all contracts subject to international competitive procurement and those contracts as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the Procurement Regulations, when approaching the national market (as specified in the Procurement Plan tables in STEP), the country’s own procurement procedures may be used.

When the Borrower uses its own national open competitive procurement arrangements as set forth in the Borrower’s Public Procurement Law No 10/010 of April 27, 2010 (PPL) and the Manual of Procedures of the PPL as per Borrower’s Decree No 10/22 of June 2, 2010, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions.

- (a) **Standard Bidding Documents:** All standard bidding documents to be used for the Project under NCB shall be found acceptable to the World Bank before their use during the implementation of Project;
- (b) **Eligibility:** Eligibility of bidders and acceptability of their goods and services shall not be based on their nationality and/or their origin; and association with a national firm shall not be a condition for participation in a bidding process. Therefore, except for the ineligibility situations referred to in paragraphs 1.10(a) (i) and 1.10(a) (ii) of the Procurement Guidelines, the eligibility of bidders must be based solely on their qualification, experience and capacity to carry out the contract related to the specific bidding process;
- (c) **Advertising and Bid Preparation Time:** Bidding opportunities shall be advertised at least in a national newspaper of wide circulation and on the website of the Recipient's Procurement Regulator (*Autorité de Régulation des Marchés Publics*) and bidders should be given at least 30 days from the date of invitation to bid or the date of availability of the bidding documents, whichever is later;
- (d) **Criteria for Qualification of Bidders:** Qualification criteria shall only concern the bidder's capability and resources to perform the contract taking into account objective and measurable factors. Such criteria for qualification of bidders shall be clearly specified in the bidding documents;
- (e) **Bid Evaluation and Contract Award:** A contract shall be awarded to the substantially responsive and lowest evaluated bidder provided that such bidder meets the qualification criteria specified in the bidding documents. No scoring system shall be allowed for the evaluation of bids, and no "blanket" limitation to the number of lots which can be awarded to a bidder shall apply. The criteria for bid evaluation and the contract award conditions shall be clearly specified in the bidding documents;
- (f) **Preferences:** No preference shall be given to domestic/regional bidders; to domestically/regionally manufactured goods; and to bidders forming a joint venture with a national firm or proposing national sub-contractors or carrying out economic activities in the territory of the Recipient;
- (g) **Publication of Contract Award:** Information on all contract awards shall be published in at least a national newspaper of wide circulation or in the Recipient's Procurement Regulator (*Autorité de Régulation des Marchés Publics*) web-site;
- (h) **Fraud and Corruption:** In accordance with the Procurement Guidelines, each bidding document and contract shall include provisions stating the World Bank's policy to sanction firms or

individuals found to have engaged in fraud and corruption as set forth in the Procurement Guidelines;

- (j) **Requirement for administrative documents and/or tax clearance certificate:** The bidding documents shall not require foreign bidders to produce any administrative or tax related certificates prior to confirmation of awarding a contract; and
- (k) **Modifications of a Signed Contract:** Any change in the contract amount which, singly or combined with all previous changes, increases the original contract amount by fifteen (15) percent or more must be done through an amendment to the signed contract instead of signing a new contract.

When other national procurement arrangements other than national open competitive procurement arrangements are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

We, along with our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not) consultants and personnel, acknowledge and agree to abide by the World Bank's policy regarding Fraud and Corruption (corrupt, fraudulent, collusive, coercive, and obstructive practices), as set out and defined in the World Bank's Anti-Corruption Guidelines² in connection with the procurement and execution of the contract (in case of award), including any amendments thereto.

We declare and warrant that we, along our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not), consultants and personnel, are not subject to, and are not controlled by any entity or individual that is subject to, a temporary suspension, early temporary suspension, or debarment imposed by a member of the World Bank Group, including, inter alia, a cross-debarment imposed by the World Bank Group as agreed with other international financial institutions (including multilateral development banks), or through the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement. Further, we are not ineligible under the laws or official regulations of *[Insert name of Employer as per bidding document]* or pursuant to a decision of the United Nations Security Council.

- b. in the case of award, termination of the contract, without prejudice to any other remedy for breach of contract; and
- c. sanctions, pursuant to the Bank's Anti-Corruption Guidelines and in accordance with its prevailing sanctions policies and procedures as set forth in the Bank's Sanctions Framework. - d. temporary suspension or early temporary suspension in connection with an ongoing World Bank Group sanctions proceeding.

For avoidance of doubt, the foregoing effects of ineligibility do not extend to a sanctioned firm's or individual's execution of its ongoing Bank-financed contracts (or its ongoing sub-agreements under such contracts) that are not the subject of a material modification, as determined by the Bank.

PROCUREMENT PLAN

(Mandatory Requirement)

Project information:

Country: Bhutan

Project Name: COVID-19 Emergency Response and Health Systems Preparedness Project

P-number: P173787

Project Implementation agency: Ministry of Health (MoH)

Period covered by this Procurement Plan: Entire Project Period

Preamble

In accordance with paragraph 5.9 of the World Bank Procurement Regulations for IPF Borrowers, July 2016, revised November 2017 and August 2018 (“Procurement Regulations”), the Bank’s Systematic Tracking and Exchanges in Procurement (STEP) system will be used to record all procurement actions for the Project, including preparing, updating and clearing its Procurement Plan, and seeking and receiving the Bank’s review and No-objection to procurement actions as required.

This textual part along with the Procurement Plan tables in STEP constitute the Procurement Plan for the Project. The following conditions apply to all procurement activities in the Procurement Plan. The other elements of the Procurement Plan as required under paragraph 4.4 of the Procurement Regulations are set forth in STEP.

The Bank’s Standard Procurement Documents: The Bank’s Standard Procurement Documents (SPDs) shall be used for all contracts subject to international competitive procurement and those contract as specified in the Procurement Plan tables in STEP.

National Procurement Arrangements: In accordance with paragraph 5.3 of the World Bank Procurement Regulations, when approaching the national market, as agreed in the Procurement Plan, the country’s own procurement procedures may be used.

When the Borrower uses its own national open competitive procurement arrangements as set forth in Procurement Rules and Regulations, 2019, such arrangements shall be subject to paragraph 5.4 of the Procurement Regulations and the following conditions:

- 1) At the Borrower’s request, the Bank may agree to the Borrower’s use, in whole or in part, of its electronic procurement system, provided that the Bank is satisfied with the adequacy of such system.

- 2) Procurement shall be open to eligible bidders as defined under Section III of the Procurement Regulations. Accordingly, no bidder or potential bidder shall be declared ineligible for contracts financed by the Bank for reasons other than those provided in Section III of the Procurement Regulations.
- 3) The request for bids/request for proposals document shall require that Bidders/Proposers submitting Bids/Proposals present a signed acceptance (in the form attached) at the time of bidding, to be incorporated in any resulting contracts, confirming application of, and compliance with, the Bank's Anti-Corruption Guidelines, including without limitation the Bank's right to sanction and the Bank's inspection and audit rights.
- 4) Procurement Documents include provisions, as agreed with the Bank, intended to adequately mitigate against environmental, social (including sexual exploitation and abuse and gender-based violence), health and safety ("ESHS") risks and impacts.
- 5) The Bank shall have the right to review procurement documentation and activities.

When other national procurement arrangements (other than national open competitive procurement) are applied by the Borrower, such arrangements shall be subject to paragraph 5.5 of the Procurement Regulations.

As per paragraph 5.4 of the Procurement Regulations, the "*Letter of Acceptance of the World Bank's Anticorruption Guidelines and Sanctions Framework*" as attached to this document shall form part of the Model Bidding Documents.

Leased Assets: Not Applicable.

Procurement of Second-Hand Goods: *as specified under paragraph 5.11 of the Procurement Regulations* – is allowed for those contracts identified in the Procurement Plan tables - **Not Applicable**"

Domestic preference *as specified under paragraph 5.51 of the Procurement Regulations (Goods and Works).* Specify for each

Goods: [is not applicable/is applicable for those contracts identified in the Procurement Plan tables];

Works: [is not applicable/is applicable for those contracts identified in the Procurement Plan tables]

Hands-on Expanded Implementation Support (HEIS): *as specified under paragraphs 3.10 and 3.11 of the Procurement Regulations* is Applicable.

Bank's Procurement Prior Review Thresholds: As this is an emergency response project, there will be no prior review for all procurement during the immediate response period. The project will also have increased

threshold for Request for Quotations (RFQ) and national procurement, as applicable in emergency projects.

Procurement under Retroactive Financing: Contracts that were procured during the period January 1, 2020 and prior to signing of the Financing Agreement will be eligible for the World Bank's retroactive financing, if: (i) the procurement procedures, including advertising, are consistent with Sections I, II and III of the Procurement Regulations; and (ii) the contractor/supplier/consultant has explicitly agreed to comply with the relevant provisions of the World Bank's Anti-Corruption Guidelines, including the World Bank's right to inspect and audit all accounts, records, and other documents relating to the project that are required to be maintained pursuant to the Financing Agreement. However, there are practical limits to the application of the Anti-Corruption Guidelines in the case of unsuccessful bidders for these retroactively financed contracts. Accordingly, the waiver of paragraph 6 (requiring that the Anti-Corruption Guidelines be applied to all procurement) and paragraphs 9(d) and 10 (requiring agreement by bidders and contractors to comply with the Anti-Corruption Guidelines) of the Anti-Corruption Guidelines, as requested by the Global MPA, will apply to the project.

We, along with our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not) consultants and personnel, acknowledge and agree to abide by the World Bank's policy regarding Fraud and Corruption (corrupt, fraudulent, collusive, coercive, and obstructive practices), as set out and defined in the World Bank's Anti-Corruption Guidelines² in connection with the procurement and execution of the contract (in case of award), including any amendments thereto.

¹[Drafting note: This document shall be signed by bidders/proposers/consultants and submitted as part of their bids/proposals. In addition, this document shall be signed by the winning bidder/consultant and incorporated as part of the contract.]

²*Guidelines on Preventing and Combating Fraud and Corruption in Projects Financed by International Bank for Reconstruction and Development Loans and the International Development Agency Credits and Grants*, dated October 15, 2006, and revised in January 2011 and July 2016, as they may be revised from time to time.

We declare and warrant that we, along our sub-contractors, sub-consultants, service providers, suppliers, agents (whether declared or not), consultants and personnel, are not subject to, and are not controlled by any entity or individual that is subject to, a temporary suspension, early temporary suspension, or debarment imposed by a member of the World Bank Group, including, inter alia, a cross-debarment imposed by the World Bank Group as agreed with other international financial institutions (including multilateral development banks), or through the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement. Further, we are not ineligible under the laws or official regulations of *[Insert name of Employer as per bidding document]* or pursuant to a decision of the United Nations Security Council.

We confirm our understanding of the consequences of not complying with the World Bank's Anti-Corruption Guidelines, which may include the following:

- a. rejection of our Proposal/Bid for award of contract;
- b. in the case of award, termination of the contract, without prejudice to any other remedy for breach of contract; and
- c. sanctions, pursuant to the Bank's Anti-Corruption Guidelines and in accordance with its prevailing sanctions policies and procedures as set forth in the Bank's Sanctions Framework. This may include a public declaration of ineligibility, either indefinitely or for a stated period of time, (i) to be awarded or otherwise benefit from a Bank-financed contract, financially or in any other manner;³ (ii) to be a nominated⁴ sub-contractor, sub-consultant, consultant, manufacturer or supplier, or service provider of an otherwise eligible firm being awarded a Bank-financed contract; and (iii) to receive the proceeds of any loan made by the Bank or otherwise to participate further in the preparation or implementation of any Bank-financed project.

We understand that we may be declared ineligible as set out above upon:

- a. completion of World Bank Group sanctions proceedings according to its prevailing sanctions procedures;
- b. cross-debarment as agreed with other international financial institutions (including multilateral development banks);

³ For the avoidance of doubt, a sanctioned party's ineligibility to be awarded a contract shall include, without limitation, (i) applying for pre-qualification or initial selection), expressing interest in a consultancy, and bidding, either directly or as a nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider, in respect of such contract, and (ii) entering into an addendum or amendment introducing a material modification to any existing contract.

⁴A nominated sub-contractor, nominated consultant, nominated manufacturer or supplier, or nominated service provider (different names are used depending on the bidding document) is one which has been: (i) included by the bidder in its pre-qualification or initial selection application or bid because it brings specific and critical experience and know-how that allow the bidder to meet the qualification requirements for the particular bid; or (ii) appointed by the Borrower.

- c. the application of a World Bank Group finding of non-responsibility on the basis of Fraud and Corruption in connection with World Bank Group corporate procurement; or
- d. temporary suspension or early temporary suspension in connection with an ongoing World Bank Group sanctions proceeding.

For avoidance of doubt, the foregoing effects of ineligibility do not extend to a sanctioned firm's or individual's execution of its ongoing Bank-financed contracts (or its ongoing sub-agreements under such contracts) that are not the subject of a material modification, as determined by the Bank.

We shall permit, and shall cause our sub-contractors, sub-consultants, agents (whether declared or not), personnel, consultants, service providers or suppliers, to permit the Bank to inspect⁵ all accounts, records, and other documents relating to the procurement process and/or contract execution (in the case of award), and to have them audited by auditors appointed by the Bank.

We agree to preserve all accounts, records, and other documents (whether in hard copy or electronic format) related to the procurement and execution of the contract.
