## 1.0 INTRODUCTION

1. **Overall Project Description:** The Infrastructure Development Investment Program for Tourism (IDIPT) targets enhanced economic growth and provision of livelihood opportunities for local communities through tourism and infrastructure development with a focus on preservation and development of natural and cultural heritage and incidental services. The Project will support the States of Himachal Pradesh, Punjab and Uttarakhand, to develop the tourism sector as a key driver for economic growth.
2. **Project Objectives:** As part of the Investment Program, the Project aims to enhance the tourism environment of States of Himachal Pradesh, Punjab and Uttarakhand through subprojects under 5 different components of the Investment Program as below
  - Component 1: Enhanced quality of natural and cultural attractions.
  - Component 2: Greater participation by local communities in tourism-related economic and livelihood activities.
  - Component 3: Improved basic urban infrastructure and incidental services at tourist destinations and gateways.
  - Component 4: Improved connectivity to tourist attractions.
  - Component 5: Strengthened capacity of sector agencies and local communities.
3. **Environmental Category:** The investment program uses a sector approach which requires preparation of an Environmental Assessment Review Framework (EARF) that sets out specific procedures to be followed for subprojects, and for implementation of the project as a whole. The EARF is in accordance with Government of India (the Government) rules and Asian Development Bank ADB) safeguards policies. The EARF reviews the types of subprojects anticipated under the project and summarizes potential environmental impacts. The EARF provides an overview of the regulations of the Government, as well as the states and ADB (as per its Safeguards Policy Statement, 2009 [SPS, 2009]) related to environmental assessment, specifically concerning project environmental classification, review and clearance requirements. In accordance to REA checklist prepared for all the subprojects falls under "Category B".
4. **Environmental performance indicators, if any:** Environmental Monitoring Results as per EMP.
5. **Overall project progress, agreed milestones and implementation schedules:** Nine following subprojects have been awarded. The required NOCs have already been taken prior to start of work and are part of IEE uploaded by ADB on their website. The construction work is in progress under subprojects (1-7) as per implementation schedule and requisite measures as per EMP is being monitored by Safeguard Specialists. Since HP-PCB is unable to conduct testing as per our time frame, private NABL laboratories were engaged for some projects and work is in process for baseline data collection. Details of the sub-projects progress are given in **Table 1**:

**Table 1: Project Progress Status**

Sr. No.	Name of project	Scope of work	REA Categorization / IEE Status (Approved Date)	Contract Signed/ NTP Date/ Completion Date	Project Progress (%) till December, 2016	Work Status/ Remarks
<b>WORK AWARDED &amp; ONGOING</b>						
1	Upgrading the Historic Urban Precincts & Creating a Heritage Circuit, Jwalaji Town (Package No. HPTDB/13/1)	<ul style="list-style-type: none"> <li>Community Hall.</li> <li>Multipurpose Parking.</li> <li>Tourist Reception Centre.</li> <li>Improvement of Gates, Paths.</li> <li>Restoration of ponds.</li> <li>Improvement of roads.</li> <li>Illumination.</li> <li>Provision of street furniture</li> <li>Improvement &amp; additional provision of toilet facilities.</li> <li>Drinking water facilities</li> <li>Rest sheds/ pause points where required.</li> <li>Landscaping area as to provide pleasant repose.</li> <li>Provision of directional, informative and instructive signages</li> </ul>	Environmental Category B  Approved on August, 2015  (Uploaded on ADB Website)	Contract signed on 23 <sup>rd</sup> Sept, 15  NTP Date- 7 <sup>th</sup> October, 2015  Completion date- 17 <sup>th</sup> October, 2017.	8.75	IEE and EMP is part of contract agreement   Barricading at Community Centre
2	Conserving Prominent Temple Precincts & Upgrading Urban Infrastructure for Tourism in Dharamshala, Mcleodganj (Package No. HPTDB/13/2)	<ul style="list-style-type: none"> <li>Bhagsu Cultural Centre</li> <li>Upgradation of Bhagsu Nag Temple precincts</li> <li>DC Office parking. Shopping Complex with DC Office Parking. Toilet Kacheri Road Dharamshala</li> <li>Upgradation of Aghanjar Mahadev Upgradation</li> <li>Chowks (Fuwara Chowk, Sheela Chowk, Secret Heart Chowk, Mcleodganj Chowk, Plaza near Hospital Dharamshala.</li> <li>Urban Element (Rain Shelter, benches, railing, compound wall, gate, signages, dustbins etc)</li> <li>Dhauladhar Convention Centre.</li> <li>M.C. Garden</li> <li>Tulip Garden</li> <li>Viewing Deck pause point 2 Nos. ## 5.0 APPROACH AND METHODOLOGY FOR ENVIRONMENTAL MONITORING OF THE PROJECTS

### A. Monitoring Basis

- To monitor project impact each worksite under each subproject has been selected as the ambient air/ambient noise sampling/ surface water monitoring locations. Water of natural source near to the subproject has been considered for the water sampling.
- Selection of environmental receptors /attributes for monitoring is based on the site location and anticipated impact due to construction activity.
- Environmental monitoring mechanism consist all three phases of project i.e. design, construction, operation and most of mitigation measures have been complied at design stage like storm water run-off, drainage etc. Further IEE defines overall monitoring mechanism.

### B. EMP Implementation arrangement for IDIPT, Himachal Pradesh

9. The following agencies shall be responsible for EMP implementation:

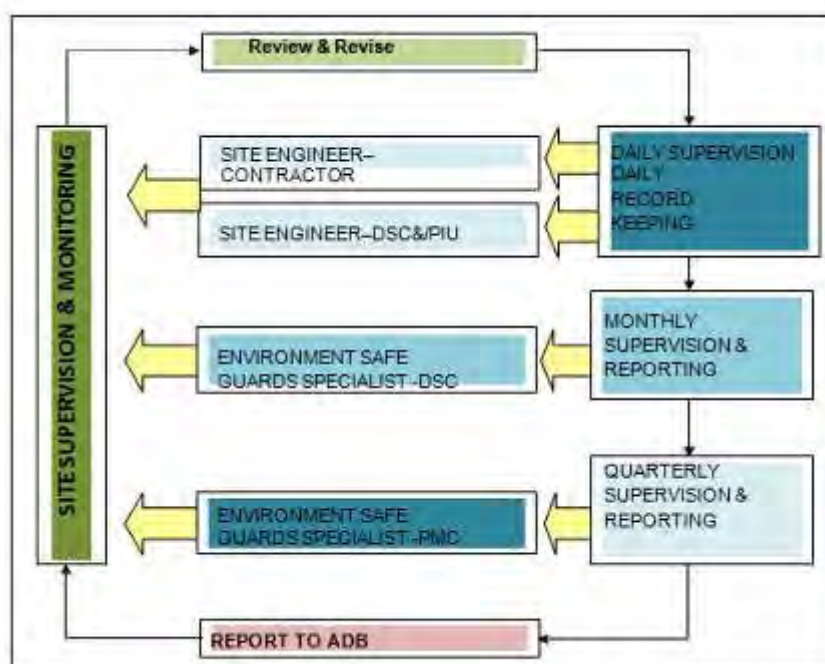

- The Department of Tourism and Civil Aviation (DoTCA), Government of Himachal Pradesh, is the Executing Agency.
- The implementing agency is the Himachal Pradesh Tourism Development Board (HPTDB).
- The Project Management Unit (PMU) has been established in Shimla for the overall project management and
- Project Implementation Unit (PIU) has been established in Dhaliyara at Distt. Kangra, Shimla and Kullu.
- Environmental Specialist has been deputed by the PMU, who will be responsible for implementation of the environmental safeguard provisions. The Project Management Consultants (PMC) and Design and Supervision Consultants (DSC) have been recruited to provide assistance to the PMU/PIUs in project implementation.
- Within the PMC team, an Environmental Specialist provides overall direction for management of environmental issues, and provides technical support to the PMU including implementation of the environmental safeguards according to ADB requirements, and assist in monitoring impacts and mitigation measures associated with subprojects.
- The Environmental Specialist of the DSC team is responsible for preparation of the Environmental assessment documents in line with the EARF and supervises the implementation of the EMP provisions in the subprojects. The DSC Safeguards specialist supports environmental management functions including updating IEEs with respect to sub-project Environmental Management Plans, and assist in monitoring impacts and mitigation measures associated with subprojects. He/she will be required to

include mitigation measures in designs where appropriate, and to specify other measures in construction contracts. Contractors will be required by their contracts to implement all specified mitigation, monitoring, and reporting assigned to contractors as presented in the EMP.

- The PMU, oversees the implementation of the environmental provisions related to subproject implementation, its responsibilities include preparation and updation of IEEs consistent with the ADBs Safeguards Policy Statement and the environmental compliance requirements of the Government of Himachal Pradesh and the Government of India. Environmental monitoring will be undertaken by the PMU supported by the DSC - Safeguards Specialist.
- The project includes upfront and on-going supervision and training assistance for environmental monitoring reporting in project management structures. The effective implementation of the measures proposed will be ensured through the building up of capacity towards environmental management within the PMU supplemented with the technical expertise of a Safeguards Specialist as part of the PMC/DSC.

10. The following diagram indicates the proposed monitoring mechanism for IDIPT, HP.

### C. Monitoring Quality Control

- Technical Specifications being followed.
- Safeguard file being maintained.
- Regular follow up of labour camps, drinking water quality, toilet cleanliness etc.
- Regular orientations.
- Constant Vigil.

## 6.0 MONITORING OF ENVIRONMENTAL RECEPTORS/ATTRIBUTES

### 11. Monitoring of environmental receptors/ attributes (e.g. ambient air, surface water, ground water, land, noise, hazardous/toxic wastes, etc.)

- Baseline environmental monitoring for parameters namely ambient air quality, ambient noise levels, and water quality carried out by the Project Management Unit prior to commencement of civil works. The environmental monitoring agency has been finalized by PMU, hence the environmental baseline monitoring data has been generated the subprojects.
- Standard methods of monitoring as per IEE shall be followed. The firm will be shortlisted who has certificate of NABL accredited laboratory and selection is in process.
- The monitoring frequency of ambient air quality, ambient noise levels and surface water quality shall be done at construction sites. (as per IEE)
- The monitoring frequency of ambient air quality, ambient noise levels and surface water quality during construction phase shall be quarterly except monsoon period at all construction sites. (as per IEE)
- The monitoring frequency of ambient air quality, ambient noise levels and surface water quality during post-construction phase may be once except monsoon period. (as per IEE)
- Reporting shall be given in tabular format with analysis as results obtained.
- Baseline results obtained for Shimla Mall Road Extension, Manali and Mandi sites are given at Anneure-36, Anneure-37 & Anneure-38 respectively. The analysis of the data is given in **Table 4, Table 5 & Table 6**.

**Table 4: Environmental monitoring analysis conducted at Shimla Mall Road extension  
Year 2014-2015**

Environmental Monitoring	Results (Average)	Analysis
Ambient Air (Tekka Bench)		
RSPM $\mu\text{g}/\text{m}^3$	46.1	Results are within prescribed limits
SO <sub>x</sub> $\mu\text{g}/\text{m}^3$	2.0	Results are within prescribed limits
NO <sub>x</sub> $\mu\text{g}/\text{m}^3$	9.9	Results are within prescribed limits

Ambient Noise (Day time) dB(A)	56	Results are within prescribed limits

**Year 2015-2016**

Environmental Monitoring	Results (Average)	Analysis
Ambient Air (Tekka Bench)		
RSPM $\mu\text{g}/\text{m}^3$	41.18	Results are within prescribed limits
SO <sub>x</sub> $\mu\text{g}/\text{m}^3$	2.0	Results are within prescribed limits
NO <sub>x</sub> $\mu\text{g}/\text{m}^3$	11.0	Results are within prescribed limits

**Table 5: Environmental monitoring analysis conducted at Manali Site  
November, 2016**

Environmental Monitoring	Results (Average)	Analysis
<b>Ambient Air Quality</b>		
PM10 $\mu\text{g}/\text{m}^3$	82.64	Results are within prescribed limits
PM2.5 $\mu\text{g}/\text{m}^3$	52.79	

SO <sub>x</sub> µg/m <sup>3</sup>	11.13	Results are within prescribed limits
NO <sub>x</sub> µg/m <sup>3</sup>	15.37	Results are within prescribed limits
<b>Ambient Noise Level</b>		
Ambient Noise (Day time) dB(A)	55.25	Results are within prescribed limits
<b>Water Quality</b>		
pH	7.39	Results are within prescribed limits
TSS, mg/l	11.9	Results are within prescribed limits
TDS, mg/l	76.0	Results are within prescribed limits
Total hardness (as CaCO <sub>3</sub> ), mg/l	162.0	Results are within prescribed limits
Oil & Grease, mg/l	1.3	Results are within prescribed limits
Total Coliform, MPN/100ml	<2	Results are within prescribed limits

**Table 6: Environmental monitoring analysis conducted at Mandi**  
November, 2016

Environmental Monitoring	Results (Average)				Analysis
	Chauhatta	Convention Centre	Bhimakali Temple	Tarna Mata	
<b>Ambient Air Quality</b>					
PM10 µg/m <sup>3</sup>	90.93	92.49	87.80	78.31	Results are within prescribed limits
PM2.5 µg/m <sup>3</sup>	55.70	58.81	53.12	50.56	
SO <sub>x</sub> µg/m <sup>3</sup>	14.59	15.62	12.71	9.43	Results are within prescribed limits
NO <sub>x</sub> µg/m <sup>3</sup>	20.49	22.34	17.52	11.21	Results are within prescribed limits
<b>Ambient Noise Level</b>					
Ambient Noise (Day time) dB(A)	68.15	64.35	63.3	55.9	Results are within prescribed limits

Environmental Monitoring	Results (Average) Vyas River near Victoria Bridge	Analysis
<b>Water Quality</b>		
pH	7.10	Results are within prescribed limits
TSS, mg/l	25.5	Results are within prescribed limits
TDS, mg/l	117.4	Results are within prescribed limits
Total hardness (as CaCO <sub>3</sub> ), mg/l	118.0	Results are within prescribed limits
Oil & Grease, mg/l	1.6	Results are within prescribed limits
Total Coliform, MPN/100ml	<2	Results are within prescribed limits

## **7.0 ANY OTHER ENVIRONMENTAL ASPECTS NOT COVERED EARLIER**

12. None of the other environmental aspects, impacts observed during implementation which were not covered earlier

## **8.0 DETAILS OF GRIEVANCES AND ACTIONS**

13. Details of Grievance Redress Committee and complaints received from public and actions taken thereof to resolve

- Grievance redressal committee's already formed at PMU and PIUs level (Copy attached at Annexure-35)
- No complaints received so far from any ongoing subprojects

## **9.0 FOLLOW UP ACTIONS & CONCLUSIONS**

14. The details and job responsibilities are clearly stipulated in the EARF and there is a strong need for transforming these stipulations into actions so that environmental monitoring can lead to preventive measures rather than curative and now actions are in place. The sites are being visited regularly by the Safeguards' Specialists since commencement of the work.
15. The field staff such as the site engineers/support engineers and the respective Contractors on site being advised and oriented time to time on maintaining a constant vigil in respect of all environmental parameters to be monitored and adherence to record keeping on site.

## Annexure 1

**NOC from the Municipal Corporation, Shimla vide order No. 315 (AP) dated 18<sup>th</sup> September, 2015.**MUNICIPAL CORPORATION SHIMLACommissioner's Order No. 315 (AP)Dated: 18/9/15

The Project Director, IDIPT-HP has submitted the proposal for Shimla Mall Road Extended Portion vide their office letter No.IDIPT-HP/2676-IND/HPTDB/Tranche-III/2014/3000 dated 04.10.2014 for consideration of approval.

The plan submitted by the applicant department have already been approved in the 8<sup>th</sup> meeting of Heritage Advisory Committee held on 12.06.2015. The approval for Shimla Mall Road Extended Portion is hereby conveyed for the following set of drawings.

1. Drawings of Stretch -1 CTO to Advance Study approved. Drawing Nos. S1/00, S1/02, S1/08, S1/09, S1/10, S1/12, S1/13, S1/17, S1/23, S1/24, S1/25, S1/31, S1/32, S1/33, S1/34, S1/38, S1/39, S1/49 & S1/50
2. Drawings of Stretch-2 High Court to Mall Road approved. Drawing Nos. S2/00, S2/01 & S2/02
3. Drawings of Stretch-3 Oak over to Bede's Chowk approved. Drawing Nos. S3/00, S3/22, S3/28, S3/29, S3/32 & S3/33
4. Drawings of Stretch-4 Kali Bari to Scandal Point approved. Drawing Nos. S4/00, S4/01, S4/02, S4/03, S4/04 & S4/07
5. Drawings of Stretch-5 Scandal Point to Ritz approved. Drawing Nos. S5/00 to S5/07 & S5/09
6. Drawings of Stretch-6 Ritz to Sanjauli approved. Drawing Nos. S6/00 to S6/09, S6/12, S6/13, S6/15, S6/16, S6/17, S6/21, S6/24, S6/25, S6/29, S6/30, S6/33, S6/36, S6/42, S6/45, S6/46, S6/49, S6/54, S6/55 & S6/56
7. Drawings of Stretch-7 Chalet Day School to Chhotta Shimla approved. Drawing Nos. S7/00, S7/01, S7/03, S7/04, S7/09, S7/12, S7/13, S7/14, S7/15, S7/17, S7/19, S7/21, S7/22, S7/23, S7/25, S7/27, S7/28, S7/30, S7/31 & S7/32
8. Drawings of Stretch-8 Ritz to Chalet Day School via U.S. Club approved. Drawing Nos. S8/00, S8/01, S8/05, S8/07, S8/10, S8/16, S8/19, S8/20, S8/24 & S8/25
9. Drawings of Stretch-9 Ramchander Chowk to U.S. Club Gate. Drawings Nos. S9/00, S9/01, S9/03, S9/07, S9/08, S9/11, S9/20, S9/21, S9/22, S9/29, S9/33, S9/35, S9/36, S9/37, S9/38, S9/39, S9/42 & S9/43

10. Designs and drawings of Railings to be provided on benches and along the path/road approved. Railing-1 Drawing Nos. R1(12)/09, R1(15)/10 & R1(16)/11, Railing-2 Drawing Nos. R2(5)/12, Railing-5 Drawing Nos. R5/13 approved.
11. Designs and drawings of U-shaped and V-shaped drains provided along the path/roads approved subject to the condition that steps may be provided in the drains to break the velocity of water. Drain Type-8 Drawing No. 8/04 & Type-9 Drawing No.9/05 approved.
12. Designs and drawings of Rain Shelters Type No.1 Drawing No.1/14, Type No.5 Drawing No.5/15 & Type No.6 Drawing No.6/10 and Rain Shelter At Shastri Chowk, Drawing Nos 80L & 80A(R-2) approved.
13. Design of Lamp post having British elements as suggested by Mr. Malhan INTACH Shimla and shown in the presentation during the meeting approved.
14. Designs and drawings of Pedestals of the Lamp post and directional sinages approved subject to the condition that the font size, colouring and lettering of the sinages shall be as per British specifications as suggested by Dr. Balvinder Singh & Mr. Malhan. Pedestal Type -1 Drawing No.1/06, Type 3(i) Drawing No.1/07 & Type 3(iv) Drawing No.3/08, Sinage 1/17 (for directional sinage only) & 1/18 (for directional sinage only) approved.
15. Designs and drawings of benches Type-1, Type-2 & Type-3, Drawing No. Pic/32, Type-4 Drawing No. Bench 4/01, Type-5 Drawing No. Bench 5/02 & Type-6 Drawing No. Bench 6/03 approved.
16. Designs of Traffic nodes at Sanjauli and Victory Tunnel approved with slate roof canopy as shown in the presentation, subject to the condition that at the time of the execution M.S. Railing may be provided around it. Drawing No.Chhatra/30 approved.
17. Designs and drawings of paving pattern below the benches provided along path and roads and at various rest places approved subject to the condition that open space below arched portion be kept clean and people may not use this space as dust bin. Pattern Drawing No. pattern/26 approved.
18. Renovation/restoration of existing toilet blocks approved in principle subject to the condition that if any addition is to be made it should be in harmony with the existing structures and Rain Water Harvesting System should be provided to tap the roof water and recycle it for the use in the toilets, as suggested by Mr. Malhan which may be got approved from Heritage Advisory Committee.

19. For Façade treatment of eleven high priority structures, the drawings and images should show more details and comparison of the existing Façade and how it will look after the treatment. Comparison of existing sinages and proposed sinages may be also shown for all the structures/shops on the Mall Road. Similarly, the case of all the 150 Buildings should be brought for approval of Heritage Advisory Committee after incorporation of suggestion given by Dr. Balvinder Singh, as this is the most important component for the conservation of character of the area. Sinage Type-3 Drawing No.3/19, Type 4(i) Drawing No.4/20 & Type 4(iv) Drawing No.4(iv)/21 approved.
20. Drinking water spouts as per Drawing No. Spout/25 approved.

The Chairman advised that the study made by Kamla Raheja be sent to the Government for its approval and the recommendations made in the study may be dovetailed in the drawings by the Tourism and Civil Aviation Department.

- The conditions imposed by Heritage Advisory Committee in its sanction should be strictly adhered to during construction.
- You will exhibit details/information of this sanction/approval on a signboard, which will be affixed at conspicuous location at the site of construction till completion of the project as per annexure "A" enclosed.
- Sanction is granted subject to the final decision in CWP No.4595/2011 titled as Rajeev Verma & others v/s State of H.P. pending before the Hon'ble High Court.

Sr. Architect Planner,  
Municipal Corporation,  
Shimla

**Annexure 3****Undertaking from Asset Owner (MOU) for Manali sub-project****MOU for Operation & Maintenance**

(Undertaking from Assets Owner)

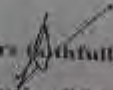

I, Director Tourism & Civil Aviation, HP, agrees to undertake the operation and maintenance for the assets which will be constructed, renovated, restored and etc. by the HPTDB under Tranche 3 of the IDIPT program together with other assets currently maintained by us. All works to be constructed i.e. **Creation of Centre for Traditional Arts & Crafts at Badagan near Manali, Kullu Distt** on the Tourism Department land under Tranche 3 including but not limited to landscape works, pathways, railings, toilets, car parking and etc. will be maintained by us with our own funds generated from operations or received from various sources.

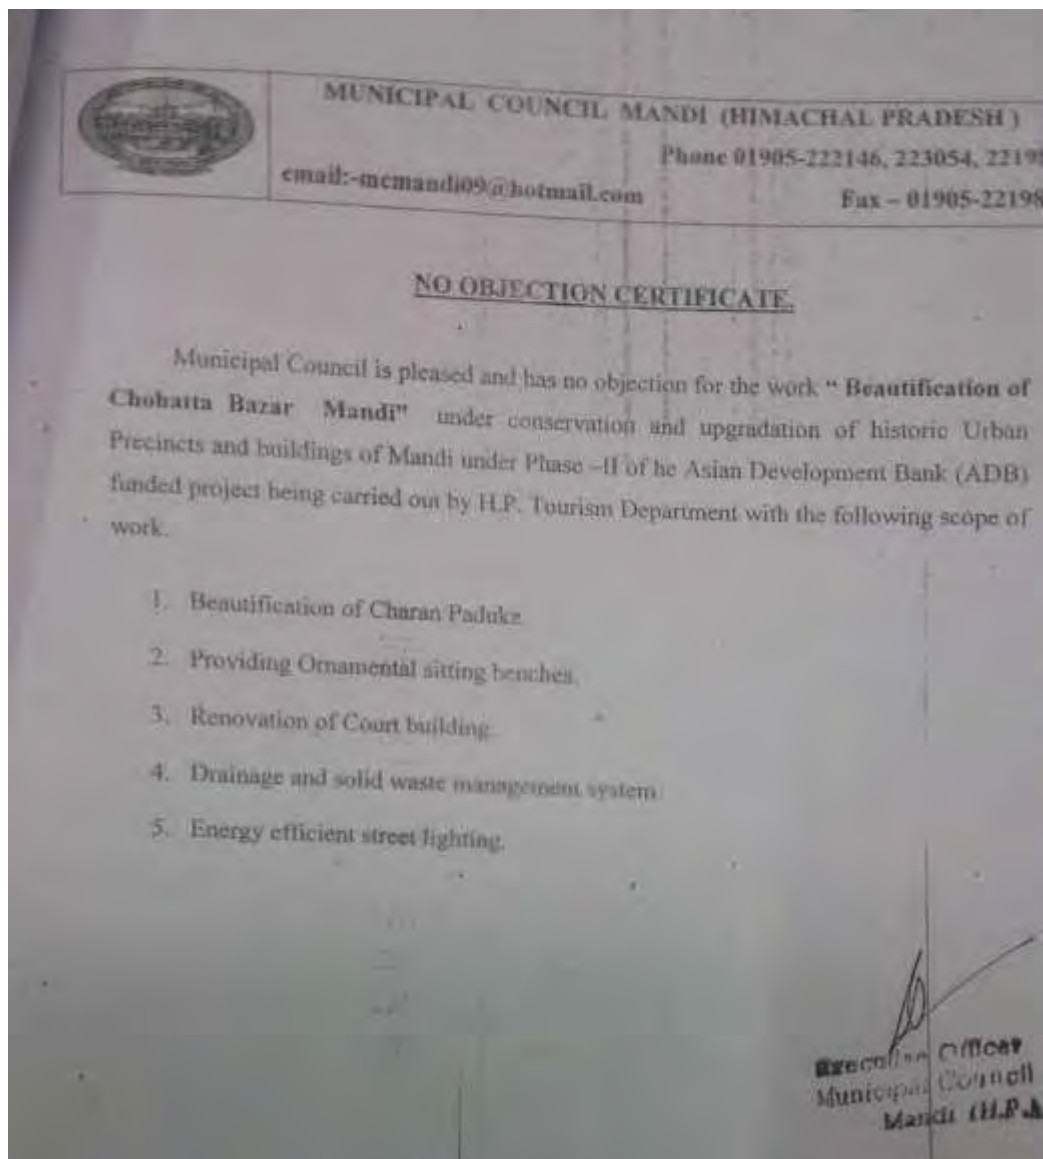

We have no objection for any work being taken up by HPTDB under Tranche 3 of the IDIPT program within the boundary premises and pathway, access to the premises from main road and etc. We assure you that the operation and maintenance of the assets will be done by us from our own resources.

## Annexure 39

## Details of Consultations

## I. Consultations for Eco-tourism Park at Naldhera, Shimla

**Package Name:** HPTDB/11/1**Date of Visit:** 27<sup>th</sup> July 2016**Persons met with:**

1. Mr Thakur Das                      Pradhan (Head) Horse Riders Union
2. Mr. Deshraj                      Dhaba Owner
3. Jockeys available at the sub-project site.
4. Tourists randomly picked up

**Status:** Contract signed.

**Observations:** The sub-project location in Naldehra is a scenic location and a picnic spot. This is around 25 kms away from the capital city of Himachal Pradesh, Shimla. The location has beautiful walk path and a horse riding stretch of 3½ kms (from Naldehra Main Gate to Jalwanda) apart from a sprawling golf course that attracts many tourists/visitors.

- The location needs major revamping of the walk path as well as the horse riding.
- Constructing toilet complexes at the location would benefit the jockey, riders and all others visiting the place.
- There seemed to be no involvement of women in any of the activities happening at the site, this needs attention. Local women be promoted to involve themselves, not only during construction but also may be involved in maintaining/managing the sub-project outcomes.
- It is assumed that redevelopment of the site would not only attract more tourists but also create healthy & hygienic surrounding for the jockey & their horses, this would improve their livelihood as well.

**Suggestions:** There are approximately 65 to 70 horses, the amount of horse dung generated at the site is very high, and there is no system of managing this waste. This creates unpleasant sight at the location. Possibility of reusing this waste could be tested; these could be used to generate energy and used for lighting street lights etc. (as done by Sulabh Sauchalaya in Delhi).

**Photo Gallery:**

-----

## II. Consultations for up-grading the Historic Urban precincts & creating a Heritage Circuit at Jwalaji sub-project

**Package No:** HPTDB/13/1

**Date of Visit:** 7<sup>th</sup> December, 2016

**Status:** Works are under progress

### Observations:

Labour camp has been provided to all labourers with all facilities like drinking water, toilets and lighting etc. Presently only one toilet has been at camp site. Contractor has been suggested to construct a Gender friendly toilets and bathrooms with proper arrangements for male and female workers at the camps. Contractor informed that the existing building where presently labourers are staying will be dismantled and new camp will have to be constructed with all the basic facilities.

Some of the workers are using wood for cooking their food. Contractor was instructed to provide gas or stoves to all labourers for cooking and strictly prohibited to use woods.

### A) Community Centre:

Workers engaged in construction works are not using PPEs. Proper PPEs like safety shoes, hand gloves, helmets etc. should be provided to workers and ensured that they use it as per the requirement at the work site.

Construction materials lay scattered haphazardly at site. It was instructed to remove all the waste materials from the site and site should be kept neat and clean to the best possible extent. Proper housekeeping is required at the site.

There are total 45 labourers engaged at site, of which 8 are women workers. Equal wages are being paid for equal works, also confirmed by the labourers. During interaction with women labourers it was informed that toilets structures are very urgently required at the site. Drinking water is available at the construction site.

Worker's children were found playing in the work area, there is a safety hazard for these children. The contractor was advised to make arrangements so that workers children are away from work site, either in workers camp or at creche/*anganwadi* for workers children.

All the three structures have been dismantled where previously 3 DPs were identified. They all have been shifted in their alternate shops. During interaction with these shop owners, it was understood that they had requested to construct the shops in community centre before March, so that they can shift in the new structure before peak season.

## B) TRC Building

Construction materials are scattered haphazardly at site. It was instructed to remove all the waste materials from the site and it be kept clean & tidy as far as possible, so that possibility of any accident is nil. Proper housekeeping is required at site. Workers at the site are not using PPEs. Proper PPEs like safety shoes, hand gloves, helmets etc. should be provided to the workers and monitored that they are being used as per the nature of works.

### C) Road Connecting Tara Mata to Bhairav Temple

Construction materials are scattered haphazardly at the site. Contractor was instructed to remove all the waste material from the site, so traffic movement is smooth. Workers engaged in construction works are not using PPEs. Proper PPEs like safety shoes, hand gloves, helmets etc. should be provided to workers and ensured that they are being rightfully used as per the nature of works.

### D) Ashtbhuja Talab

Construction materials are scattered haphazardly at the site. Contractor was instructed to re-arrange them all and remove all the waste materials from the site, to ease the traffic & people's movement.

Meeting and discussion was held with the Project Contractor and site engineer and all the issues identified were deliberated in detail.

During record checking, it was found that contractors are maintaining attendance register, Job cards, but other registers were not being maintained. They were advised to do the needful.

**Conclusion:** Majority of the site Contractors have not deputed EHS personnel/Safety Officer for managing & monitoring safety issues at the site. Also, it seemed that Contractors were not looking at the HSE issues on day to day basis. There are a lot of issues noted during site visits which need immediate remedial actions to fulfill the objectives of EHS management.

### III. Consultations for conserving prominent Temple Precincts & up-grading Urban Infrastructure for Tourism in Dharamshala sub-project

**Package Name:** HPTDB/13/2

**Date of Visit:** 6<sup>th</sup> December 2016

**Persons met with:**

- |                         |                   |
|-------------------------|-------------------|
| 1. Mr. Mukesh Sharma    | Project Manager   |
| 2. Mr J.P. Sharma       | Site Engineer     |
| 3. Ms. Simmi            | Site Engineer     |
| 4. Mr. Nikhil           | Site Engineer DSC |
| 5. Labors – Men & Women |                   |

**Status:** Presently works started at M.C park and site office constructed at Aganjhar Mahadev Temple area.

**Observations:** An orientation program with project contractor and DSC Engineer was conducted by Safeguard Experts, DSC. Following issues were discussed and deliberated during the orientation program.

- Introduction of ADB's Safeguard Policy Statement (SPS -2009)
- Labor accommodation and basic facilities required for labours was discussed in detail
- Use of PPEs, Safety in Trench Work, road safety, Signage
- Labor Insurance/Health checkup of workers
- Contractor's role in minimization of involuntary resettlement during finalization of design and during execution
- Grievance Redress Mechanism

Meeting and training of project labourers was held on use of safety equipment during works.

Total 24 labors are engaged at site. Only 2 women workers have been involved in the construction work. Equal wages for equal work is being paid at the site, as confirmed by labourers.

Labor camp has been provided to all labourers with all basic facilities like drinking water, toilet and lighting etc. Workers are using wood for cooking their food. Contractor was instructed to provide gas for cooking and strictly prohibited to use wood. Gender specific toilets and bathrooms should be provided with proper arrangements for male and female workers at the camps.

Around 2-3 temporary huts have been provided by the contractor to the workers which are not having basic arrangements like *pucca* flooring, proper illumination & ventilation, mosquito prevention. Workers living in the hut are also using wood for cooking. Proper basic arrangements for workers like *pucca* flooring, illumination, ventilation, bed or cots, mosquito prevention, sanitation, housekeeping should be provided.

Only few workers engaged in construction work are using proper PPEs. Proper PPEs like safety shoes, hand gloves, helmets etc. are to be provided to workers by the contractor and ensure that they are being used as per the nature of work. It was observed that workers engaged in stone cutting are not using proper PPEs at all.

Stone and other construction materials are laid on the main road without barricading and caution tapes causing safety risk, as there will be constant movement of men and vehicles.

Contractor was suggested to keep all the register/certificate i.e. Attendance Register, Wages Register, Accident Register, Grievance Register, Insurance of labourers at site.

**Site office of Contractor near Aghanjhar Mahadev Temple Area**

Stone and other construction materials are laid right on the main road without barricading and caution tape, increasing the risk of accidents/casualties, as there will be frequent movement of people and vehicles all through the day.

**IV. Consultations for Rejuvenation of Markandeya Temple Precincts & Provisions of Visitors Facilities sub-project**

**Package Name:** HPTDB/11/1

**Date of Visit:** 30<sup>th</sup> Aug 2016

Persons met with:

- |                        |                      |
|------------------------|----------------------|
| 1. Pt. S.R. Bhardwaj   | Temple Priest        |
| 2. Mr. Santram Kashyap | temple Trust Cashier |
| 3. Ms. Sunil Begum     |                      |
| 4. Mr. Sashipal        |                      |
| 5. Mr. Amin            |                      |

6. Mr. Ramesh Chandra
7. Mr. Subhash Chandra
8. Mr. Pyar Singh
9. Mr. Rajendra Kumar

**Observations:** NOC by the Temple Trust has been obtained for the proposed work. All 11 APs have been shifted to the new alternate location. The area for construction has been vacated. All APs have settled well at the new location. The purpose & reason for their shifting has been well communicated to them.

- All the APs & people located near the temple along with (available) tourists well accept the sub-project components & affirm that the place needed such improvement.
- APs wanted to know whether all of them would be accommodated in the newly constructed shops, having discussion with the Temple Trust members, it was ascertained & assured to them that they all will be accommodated on priority basis.
- APs were also interested to know whether there will be any increase in rent payment of the newly constructed shops. It was communicated to them, following discussions with temple trust that there will be a meeting/consultation with them before any such change is implemented.
- APs were concerned to know, whether there will be similar assistance provided to them from the sub-project during the next shifting. A discussion was held among Safeguard Specialists of PMU/PMC and Temple Trust members confirming the due assistance but the source is yet to be identified.
- There will be no displacement as such of any of the APs at any point of time during the entire sub-project cycle. Neither there will be any livelihood loss for any of them. They all will be duly compensated as was done during their earlier shifting, from area to be constructed to the temporary location. As was done earlier, for all APs shifting assistance will be provided along with waiving off 1 month rent. And that the shifting will be done on the lean day in the late evening.
- It is ascertained that all APs run small shops, with articles that can be shifted in a day, in few hours.

***Consultation with Temple Trust***

**Sub-project Name:** Rejuvenation of the *Markandeya* Temple Precincts and Provision of Visitor Facilities, Bilaspur, HP

**Package Name:** HPTDB/11/1

**Date of Visit:** 14<sup>th</sup> Dec 2016

Persons met with:

1. Mr. Vineet Patiyal                      Project Manager
2. Mr. Anku Dhiman                      Civil Engineer
3. Labourers at the work site.

**Status:** Work Started

**Observations:** The construction work has started, just 15 days back. The Project Manager is aware of social concerns at the site. The work is at a very initial stage of construction, and safety concerns are yet to be implemented.

- The labourers have been provided accommodation in the earlier constructed shops that would also be renovated.
- At present there are no women labourers.
- Labourers were not having any safety equipment. The very young recruits didn't know about the requirement and usage of safety equipment.
- Various awareness as well as training programs have to be planned & conducted.
- Signages & awareness posters have to be placed in strategic locations.
- Natural water is available in abundance, there will be no requirement of separate water connection.
- Barricading in and around the construction site will follow soon.
- Labourers are using public toilet available at the temple complex, a separate toilet will be provided to them after some time.
- There is an *anganwadi* (child care) center very near to the construction site, this needs attention and proper signages have to be put up. A discussion with the center workers' vis a vis safety of the children is to be carried out and ascertained.

## V. Conservation & Upgradation of the Historic Urban Precincts & Buildings in Mandi, Shimla

**Package Name:** HPTBD/15/1

**Date of Visit:** 28<sup>th</sup> Aug 2016

### Persons met with:

1. Mr Ratinder Singh                      Project Manager
2. Mr Avigyat Sharma                      Office Manager, DSC
3. Mr Harish Kumar                      Site Engineer, VISCO
4. Mr Manish Kumar                      Site Engineer, Bhimakali
5. Mr Puran Singh                      Senior Engineer
6. MrUdai Giri                      Contractor, Indra Market
7. Labors working in the construction site (men as well as women labors).
8. Tourist/travelers/residents in the nearby area

**Status:** Construction Stage.

**Observations:** The work is in progress in all the sites, seems it will be completed within the stipulated time. In *Bhimakali* & Vijay High School there are no women labors involved in any of the sub-project activities. In Vijay High School Contractor justifies of not having women labors by saying that the site has carpentry work entirely and that there are no women labors suitable for the work. At Bhimakali site no particular reason was given but the fact that available women labors are at other sites with their family. There is no specific reason of not having women labourers, they are working in other sub-project locations.

- People around the sub-project locations generally expressed appreciation for the works being done.
- The cleaning work at Victoria Bridge & of the small stone temples has been stopped due to monsoon.
- Due to non-availability of Safety Officer, preparation & updating of various registers is pending. Management of safety issues and trainings have been neglected over the time.
- Not using safety kits was more a problem on part of labors, as they normally don't feel comfortable using the same, particularly gloves, masks & boots, though helmet was much in use.
- At all the sub-project locations waste management has to be taken care well, labors need more awareness to managing their household waste & on health & sanitation issues.
- At Vijay High School sub-project site, the structure is infested by termite. Additional effort is being put in to manage this using anti-termite treatment. This may impact on the timely completion of the sub-project.
- Though no changes can be suggested at any heritage site, at VH School site, the stairs on east side (40 cms) & west side (around 60 cms) are protruding & blocking the passage from classrooms. This needs attention.
- The provisions of toilet & drinking water are there, but the workers need more intensive awareness vis a vis cleaning the toilet area clean, manage wastes in the area & do not waste water.
- At VH School site, there are heaps of saw dust as waste generated from the wood cravings /works, and also waste wooden parts from the old building structure, these need to be handled for timely collection & proper disposal.

**Suggestions:**

Recycling of wooden wastes, particularly saw dusts may be used for making card boards/boards or any other articles. CBOs/SHGs could be given training to make boards using saw dust. This possibility could be explored.

**Photo Gallery:**

***Consultations at the sub-project sites***

***Sawdust & Wooden planks needed to be treated to reduce/manage wastes at the site***

***Protruded staircase at Vijay High School location***

**Termite treatment needs at site**

**Wastes dumped down the hill**

**Training at sub-project location by PMC Safeguard Specialists**

**Safety measures at Vijay High School location**

**Safety measures at Amrit Kaur Park location**

**Sub-project Name:** Conservation & Upgradation of the Historic Urban Precincts & Buildings in Mandi, Shimla

**Package Name:** HPTBD/15/1

**Date of Visit:** 16<sup>th</sup> December 2016

**Persons met with:**

Mr. Ratinder Singh	Project Manager
Mr. Akhilesh Kumar	Site Engineer, DSC
Mr. Rahul	Electrical engineer, PIU
Mr. Manish Sharma	Site In-charge, Bhimakali
Mr. Vikas Mahajan	Procurement Officer

Labors working in the construction site (men as well as women labors).

**Status:** Construction Stage.

**Observations:** Construction works at all the 6 sites are in progress, except that in Chauhatta bazaar the work is yet to start. It was satisfying to note that more women labors have joined at the sub-project construction site. There is another construction on the land adjacent to the VISCO Resort site, this resulted in space crunch for the sub-project, and disturbed partially the set up for labors working for the sub-project.

- Due to the new construction by HP-PWD for a fire Station on the adjacent land, the labor camp had to be relocated to the ground & first floor of the building being constructed. The change happened very suddenly, without much preparation.
- The toilet and drinking water facilities though have been rearranged & provided, this needs improvement.
- The labors working in the other location and the way the work is being carried out is influencing the views of labors on safety etc. and influencing them to unlearn few concerns.
- There have been no grievances put up or complaints made so far, hence there was no grievance register maintained. The same has again been asked to be prepared and maintained well.
- The number of women workers in this site has increased significantly.
- Labors still tend to be careless regarding use of safety equipment.
- Signages & awareness posters were largely missing at the site, they need to be properly placed/installed.
- Accident register has been prepared, but some improvements have been suggested.
- Some of the sub-project locations are having lot of wood works done, and thus generating saw dust/wood pieces etc. in abundance. Some mechanism of recycling of these have to be thought off. Exploring the possibility of re-using them by the cardboard factories is being explored. Another option of giving training to SHGs on recycling/reusing these and turning them in some useful product is also being explored.

### Suggestions:

The locations like Chauhatta Bazaar and Indra Market park are be declared as “spit free & litter free zone”, and any one not abiding will be punished or pay fine.

## VI. Creation of Centre for Traditional Arts & Crafts at Badagran near Manali

**Package Name:** HPTBD/14/1

**Date of Visit:** 29<sup>th</sup> Aug 2016

Persons met with:

- |   |                                      |
|---|--------------------------------------|
| 1. Mr. S N Rathore  | Project Manager                      |
| 2. Mr. Naveen Kumar   | Project Engineer                     |
| 3. Mr. Anil Sharma  | Manager, Hotel Baragarh              |
| 4. Ms. Heera & Ms Premdasi  | Resident & owner Nalwa General Store |
| 5. Ms Devki   | Resident                             |
| 6. Labors working in the construction site (men as well as women labors). |                                      |

**Status:** Construction Stage.

### Observations:

- Residents but residing on government land (illegal encroachers) are happy with the improvement of the area, but fear that the boundary wall of the complex might block their view from rear part of the house and also block light & wind flow.
- There seems to be no issue of R&R for the residents near the front gate of the complex, an assessment for the same is still going on.
- Safety measure, mainly the fire extinguisher near the wood work area was missing. That has to be re-installed. Few labors working on roof top were found not using safety belts.
- Labors still need more intensive awareness on use of safety equipment.
- The passage to the *anganwadi* center has been developed & made child friendly.
- The contractor has provided basic amenities for labors at the camps. Labors need more awareness program on right use of toilet & sanitation habits & its impact on their health.
- The boundary wall has been erected protecting wastes flowing into the river & use of river bank by the labors.
- There is slackness on regular updating of registers.
- The register listing training programs is yet to be updated. There had been training programs on health & hygiene apart from safety issues & use of PPEs.
- Awareness programs on importance of education is much needed.

- The site needs some welfare program, mainly for taking care of the (infants) children of labors. They are now carried to the work site that may be roof top. *Anganwadi* center takes children only of the age group 3-6 years.
- Electric poles of low height & electric wires are left open in the area, this may lead to any mishap.
- Connection of water for the use of construction work needs to be managed well to avoid water wastage.

**Suggestions:** Skill improvement training programs could be organized to improve the skill level of women worker

### Photo Gallery

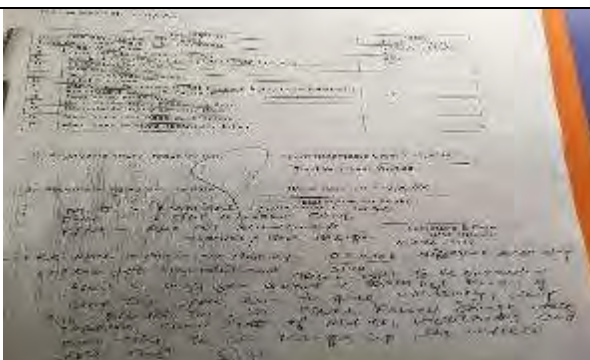

**Safety measures neglected – no fire extinguisher & no safety belt being used**

**Anganwadi Centre for children of workers at construction site**

**First Aid box at site**

**Registering accident cases**

**Housing, drinking water & toilet facilities at site**

***Wall erected to protect river from getting effected by construction***

**Sub-project Name:** Creation of Centre for Traditional Arts & Crafts at Badagran near Manali, HP

**Package Name:** HPTBD/14/1

**Date of Visit:** 15<sup>th</sup> Dec 2016

Persons met with:

1. Mr. S N Rathore Project Manager
2. Mr. Shammi Parashar Safety Officer
3. Labourers working at the construction site (men as well as women labourers).

**Status:** Construction Stage.

**Observations:** Construction work is in full swing. Majority of labors, men & women both are using safety kits. Still there are few not wanting to use the safety equipment as they don't feel comfortable using them. The Anganwadi center has been improved with increased enrolment of children of labors.

- As part of the safety measure implementation, a fire extinguisher has been placed where wood work is going on.
- Few labors still find cumbersome to use the safety equipment. They need more intensive awareness on its use.
- The passage to the *Anganwadi* center has been improved & made child friendly.
- Registration/Insurance of (new) labors is in process.
- Labors needs more awareness on health, sanitation & hygiene.
- Now that wood work is going on, there is saw dust waste in abundance, this needs to be taken care off.
- The relevant registers, such as – labor attendance, accident register, grievance register are being maintained/updated well.
- An updated information on labors working at the site is to be prepared.
- A list of training programs to be conducted for the labors is yet to be planned & organized.

**Suggestions:** Some planning is required to re-use the saw dust wastes. Cardboard factories etc. may be contracted to make good use of the saw dusts.

**Photo Gallery:**
