Safeguard Policy Items Identified

B.1 Bank Policies (Access to Information Policy– OP-102)

The Bank will make the relevant project documents available to the public.

B.13. Noninvestment Lending and Flexible Lending Instruments

Ex-ante impact classification may not be feasible for this type of operation. This includes: policy-based loans, Financial Intermediaries (FIs) or loans that are based on performance criteria, sector-based approaches, and conditional credit lines for investment operations.

B.17. Procurement

Suitable safeguard provisions for the procurement of goods and services in Bank financed operation will be incorporated into project-specific loan agreements, operating regulations and bidding documents, as appropriate, to ensure environmentally responsible procurement.

B.2 Country Laws and Regulations

The operation is in compliance with laws and regulations of the country regarding specific women's rights, the environment, gender and indigenous peoples (including national obligations established under ratified multilateral environmental agreements).

B.3 Screening and Classification

The operation (including associated facilities) is screened and classified according to its potential environmental impacts.

B.6 Consultations

Consultations with affected parties will be performed equitably and inclusively with the views of all stakeholders taken into account, including in particular: (a) equal participation by women and men, (b) socio-culturally appropriate participation of indigenous peoples and (c) mechanisms for equitable participation by vulnerable groups.

B.7 Supervision and Compliance

The Bank will monitor the executing agency/borrower's compliance with all safeguard requirements stipulated in the loan agreement and project operating or credit regulations.

Additional Comments

Safeguard Policy Filter Report

In accordance with Directive B.13 on Environment and Safeguards Compliance Policy (OP-703), the program, which is based on policy commitments, does not entail an environmental classification. The program does not finance physical investments; it is therefore expected to have no direct negative social or environmental impact. However, as a result of the actions and policy changes supported by the program, energy projects within Suriname are expected to be socially and environmentally sustainable helping to mitigate potential effects on Suriname's environmental and natural resources. The program provides an opportunity to help Suriname minimize those impacts through consideration of environmental and social factors in the planning stage (e.g. expansion strategies), and thereafter throughout the project cycle.
