

Project Summary Information

| | Date of Document Preparation: October 18, 2021 | |
|--------------------------------------|--|--|
| Project Name | Upgrade of the Electric Rail Fleet Project | |
| Project Number | P000542 | |
| AllB member | Russian Federation | |
| Sector/Subsector | Transport / Railways (non-urban) | |
| Status of Financing | Under Preparation | |
| Project Description | The Project includes extending a long-term loan to JSC "Russian Railways" ("RZD") to finance the procurement of freight and passenger electric locomotives. The new locomotives will provide more comfort for crew personnel, higher operating performance, modern automated systems and superior maintenance characteristics. The locomotives will be used on the general-purpose rail network in the country. It will contribute to the recovery of passenger transportation after the Covid-19 pandemic, and support cargo operations including the rapidly growing transit transportation. | |
| Objective | To support the development of the electric rail transport and improve rail service in terms of fleet availability, operational efficiencies, and reliability by upgrading to new electric locomotives. | |
| Expected Results | The Project's results will be assessed based on the following indicators: (i) GHG emission reduction, and (ii) number of electric locomotives procured. | |
| Environmental and | Category B. | |
| Social Category | | |
| Environmental and Social Information | The Bank's Environmental and Social Policy (ESP), including the Environmental and Social Exclusion List (ESEL) and Environmental and Social Standard (ESS) 1 apply to this Project. The Project has been identified as Category B, on the basis that any anticipated E&S risks and impacts will be localized and temporary and can be mitigated through effective management. Electric freight locomotives dedicated to carry coal, including operating on coal-dedicated routes (e.g., from coal mines to seaport, coal-fired power stations, etc.) will be excluded from the financing. | |
| | To address E&S risks and impacts induced by its activities, RZD has established an Environmental and Social Management System (ESMS) to maintain emission standards and reduce GHG emissions, implement proper waste | |

| | management, carry out fire prevention measures, enforce measures on both employees and passengers to be safe during COVID pandemic, and others. RZD has also established its locomotive decommissioning guidelines. Locomotives are decommissioned at the end of its specified service life, made obsolete or physically deteriorated or when the production of spare parts is discontinued. The dismantling takes place at service depots whereby (i) all hazardous materials are collected in specialized containers and transferred to external certified service providers for processing, (ii) reusable equipment is repaired and installed on other locomotives and (iii) remaining unusable parts are to be sold as scrap metal. | | |
|--------------------|---|--|--|
| | The provision of long-haul rail services is determined as having lower GHG emissions coefficient amongst available means of long-haul transportation, private and shared vehicles, or airlines. The acquisition of electric locomotives will contribute further to a low-carbon transition. 71% of the Project's investment will qualify for climate finance according to the joint MDB approach. | | |
| | related policies, in both English and Russian on its c in accordance with the International Global Report about its E&S programs and performance. RZD ma | ams and its social matters regarding employment and gender orporate website. Every year, RZD issues a <u>Sustainability Report</u> ing Initiative (GRI) standards, disclosing substantial information intains a <u>contact website</u> where it can be reached for inquiries or at can also be used for filing any complaint on RZD. | |
| Cost and Financing | AIIB's proposed non-sovereign backed loan in the amount of USD 300 million (to be provided in local currency). | | |
| Plan Borrower | Laint Charle Company "Durgion Doileanna" | | |
| Estimated date of | Joint Stock Company "Russian Railways" | | |
| last disbursement | 4 weeks after execution of the loan agreement. | | |
| Contact Points: | AIIB | Borrower | |
| Name | Igor Popkov | Anastasia Shakhanova | |
| Title | Private Sector Operations Specialist | Deputy Head of the Corporate Finance Department | |
| Email Address | igor.popkov@aiib.org | kravcovaaa@center.rzd.ru | |

| Date of Appraisal | October 13, 2021 |
|--------------------------|------------------|
| Decision | |
| Estimated Date of | Q1 2022 |
| Financing Approval | |

| Independent | The Project-affected People's Mechanism (PPM) has been established by the Bank to provide an opportunity |
|----------------|---|
| Accountability | for an independent and impartial review of submissions from Project-affected people who believe they have |
| Mechanism | been or are likely to be adversely affected by AIIB's failure to implementits ESP in situations when their concerns cannot be addressed satisfactorily through the Project-level GRM or the processes of the Bank's management. |
| | Information about PPM is available at Policy on the Project-affected People's Mechanism – Operational Policies & Directives – AIIB. |
