Subject: Emergency Assistance for Disasters. Technical Cooperation for Jamaica.

The operation JA-T1247 was prepared in response to a request for support from the Government of Jamaica following the state of emergency declared due to damage caused by Hurricane Melissa.

The Proposal for a New OC Strategic Development Program (GN-2819-25), approved by the Board of Executive Directors (the "Board") on October 29, 2025, Section B of Annex II (Eligible Expenses for Specific Programs Not Contemplated in the TC Policy), authorize the President of the Bank to approve Emergency TCs up to US\$350,000 per event for immediate needs, plus an additional US\$150,000 for damage assessments or technical studies effective January 1, 2026. On November 5, 2025, the Board resolved that the effective date of Resolution DE-112/25 be advanced to November 5, 2025, for purposes of financing individual Emergency Technical Cooperation operations as described in the aforementioned document.

The amount of the proposed operation for Jamaica is US\$500,000 (\$350,000 for immediate needs and \$150,000 for damage assessments/technical studies).

Recommendation:

CCB recommends that the President of the Bank approve the above-mentioned emergency technical cooperation operation attached hereto under the authority conferred pursuant to Resolution DE-112/25.
