Implementation Status and Key Decisions

Currently the project is implementing mainly preparatory tasks that will lead to achieving the results anticipated in the respective components of the project. Preparation of bidding document for works contract and RFP for monitoring of the works are at advanced stage with a plan to award the works contract before end of the year. Likewise preparatory works to initiate procurement of ITS consultant for the Modjo Hawassa road and ITS enhancement interventions for Addis Adama expressway, as well as the national and regional ITS architecture are also underway. Because of the complexity of the down stream works, extensive preparatory works were reqqired before the actual service commences.

Preparation of ToRs for other technical assistance is also at various level of progress.
