Dear Alessandro,

Treated wastewater will be reused each year for watering green spaces and green belts in the region. It will not be reused for green hydrogen production.

Kind regards,

Access to Information Team

Subject: Information Request from EBRD.com, R6984

Information Request Reference: R6984

First name: Alessandro

Last name: Ramazzotti

Email address: alessandro@accountabilityproject.org

Country: Italy

Professional affiliation: NGO

Area of interest: Disclosure and Transparency

Enquiry: Dear EBRD Stakeholder Engagement Team,

In light of the new report report by Transnational Institute, Green Hydrogen in Morocco: Just transition or Greenwashing Neocolonialism? The case of Guelmim-Oued Noun, I would like to request any available information regarding the use of treated wastewater in the Guelmim-Oued Noun region, as part of the project supported by the EBRD. More specifically, is the water released by the wastewater treatment plants that the EBRD is financing going to be used for "green" hydrogen production?

Thank you in advance for your cooperation.
