## 1 Introduction

1 The Government of Karnataka conceived the proposed North Karnataka Urban Sector Investment Program (NKUSIP), to boost up the economic growth in the region that has traditionally showed laggard development. The decision has been taken on the report of the High Power Committee for Redressal of Regional Imbalances; appointed by the Government of Karnataka in 2002, the committee has reviewed the economic development of district in terms of selected indicators like per capita income, poverty levels, sectoral trends in economy, infrastructure development including education, health, roads and banking, vehicle density etc., accordingly the committee concludes that most districts and towns in North Karnataka lag behind those in South Karnataka, with Dharwad and Belgaum being exceptions to the rule. The primary sector is the main contributor to district income in a majority of North Karnataka districts, while the secondary and tertiary sectors are the main drivers of South Karnataka's thriving economy. South Karnataka continues to be the preferred location for industrial development. North Karnataka's contribution to NSDP is only about 40 percent, while South Karnataka contributes the remaining share. The Committee recommends that an appropriate strategy to address or minimize this interregional disparity is to invest in urban infrastructure in towns in North Karnataka, a majority of which provides below-norm urban services, considered growth-inhibitors. The Report suggests that improved urban infrastructure shall to lead to increased private investments and therefore, to reduction of regional imbalances.

2 The Government of Karnataka aims to improve the level of quality and sustainability of basic urban services especially the urban poor through the improvement of urban infrastructure with special emphasis on environmental sanitation. Accordingly, the Government formulated North Karnataka Urban Sector Investment Program (NKUSIP) assisted by the Asian Development Bank (ADB).

3 In this connection, Karnataka Urban Infrastructure Development and Finance Corporation (KUIDFC), the nodal agency for the proposed project, initiated a "Feasibility Study" to identify infrastructure development needs and priorities in the selected towns, through technical consultants.

4 The Investment Program has been divided in to four packages (Dharwad, Belgaum, Gulbarga and Bellary) and separate consultants are engaged for each package. The principal objectives of the Program Consultants (PCs) are to support the Program Management Unit (PMU) through the Divisional Offices (DOs), Implementing Agencies (IAs) including local self-government bodies and State line departments in the efficient preparation and implementation of sub-programs. The details of program consultants engaged in this program and towns consists under each package are given in table below (**table -1**).

**Table 1: Tranche wise details of Program implementation of NKUSIP**

Sl. No.	Package	Program Consultant	Tranche	Towns
1	Package 1 (Dharwad Division)	CDM Smith India Pvt Ltd (Formerly Wilbur Smith Associates)	2	Haveri, Ranebennur, Dharwad, Bijapur, Davanagere and Hubli.

			3	Sindanur
			4	Bellary, Sindanur, Raichur and Hospet.

5 Under the program the physical investments include improvements of water supply, sanitation and sewerage, slum improvement and tourism developments. The Investment Program is being implemented through four tranches of funding which began in 2009. The Program is scheduled to be completed by the year 2016.

6 This is the consolidated report on implementation of Social Safeguard Activities carried out between the periods from 1<sup>st</sup> July to 31<sup>st</sup> December 2015 in the subprojects taken up under all the tranches shown in above table.

## 2 Implementation Arrangements

7 Karnataka Urban Infrastructure Development & Finance Corporation (KUIDFC) is the nodal executing agency (EA) responsible for implementing NKUSIP. KUIDFC is a fully owned Government of Karnataka (GoK) company incorporated under the Companies Act, 1956. KUIDFC has already handled projects funded by multilateral financial institutions (MFIs) and is fully aware of MFI's financial management, accounting, reporting and disbursement policies and procedures. KUIDFC has a Social and Community Development Officer. KUIDFC was extensively involved in coordinating and monitoring community development activities and resettlement implementation across project towns in the previous ADB projects.

8 As far as institutional arrangement of this sub projects are concerned NKUSIP has already appointed the following agencies for providing support to implement the RP, the responsibilities of these agencies are mentioned below.

9 **An apex NGO (State level)** to monitor and evaluate (i) community development and poverty alleviation works; (ii) implementation of Resettlement Plan by local-NGOs; and (iii) implementation of Indigenous People's Development Plan by local-NGOs. M/s Agriculture Finance Corporation is appointed as apex NGO and is in action.

10 **Responsibilities:** The Apex NGO is responsible to the PMU at Dharwad. The Apex NGO is involved in transfer of knowledge and skills to smaller NGOs and monitoring of their work while implementing the RP. The model allows outsourcing of activities from government departments and promotes transparency and brings in good expertise, without placing a burden on the State exchequer post-implementation.

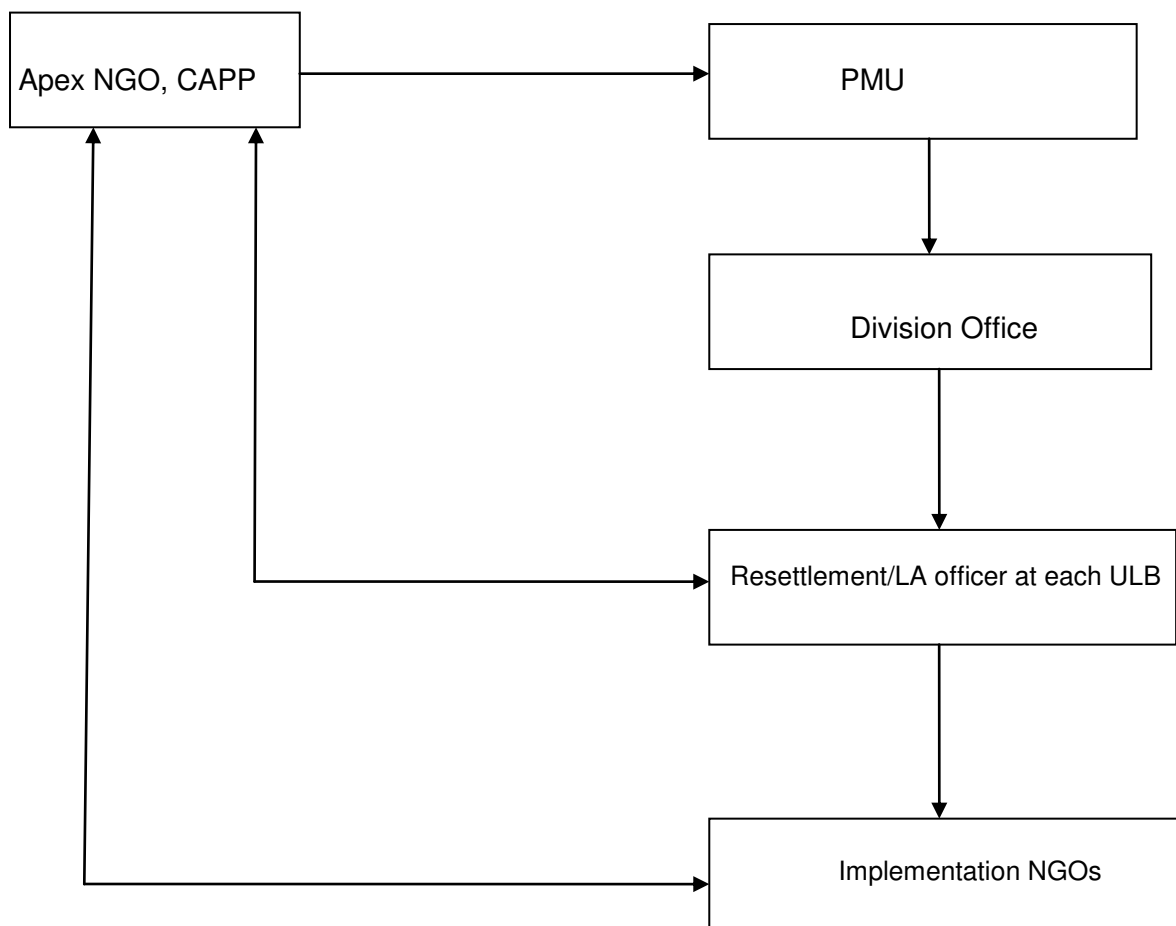

11 **Divisional Office.** KUIDFC has already established Divisional Offices (DO) at Hubli for package -1, Belgaum for Package -2, Gulbarga for package-3 and Bellary for package -4 within the Investment Program area to oversee Investment Program implementation. Deputy Project Directors (DPD) are heading the Divisional Offices The DOs will be responsible for Investment Program planning, preparation of sub-project plans and estimates, coordination, technical guidance and supervision, financial control, training, and overall sub-project monitoring. Social Development Officers (SDOs) are also appointed at DO offices to look after the RP implementation.

12 **Resettlement Officers.** The Assistant Commissioner at the Revenue Sub-Division level will be the Resettlement Officer and will be responsible for LA and Resettlement activities under the Investment Program. The Resettlement Officer will ensure effective internal coordination and maximize the transfer of skills.

13 **Implementing NGOs.** The services of NGOs with experience in social/gender development and with a track record in resettlement and rehabilitation for RP implementation were engaged at each program towns. But, the contract period of NGOs are over in 20 towns and in the remaining 4 towns, contract is expiring in March and June, 2016. The process for reengaging the Implementing NGO's is under progress.

14 Further, details of NGOs who are still continuing the implementation of IR activities and community development program is summarized in table 2.

**Figure -1: Implementation Arrangements.**

### 3 Social Safeguard Activities

#### 4.1. Introduction

15 In order to identify the Resettlement Impacts, if any, due to the subprojects implementations, the Implementing team have carried out sufficient site visits and consultative inspections in the project areas during the preparation of DPR. Based on this and further discussions held with the local public, it has been confirmed that out of 26 project towns (Hubli & Dharwad is considered as separate towns) 13 subprojects project towns will have minor involuntary resettlement impact and falling in 'B' category with respect to Involuntary Resettlement Impact (ADB's Safeguard Policy Statement, 2009), while the category of other project towns (13 towns) with respect to Involuntary Resettlement Impact are 'C', hence no RPs are prepared for the subprojects planned in these 13 towns. To reconfirm this, DDRs were prepared during this reporting period.

#### 4.2. Scope of Impact

16 The subproject components taken up under all tranches of all project towns, physical progress (cumulative) achieved till date, the summary of impact on land acquisition and resettlement and status of implementation of RPs and DDRs are described in Table 3.

**Table 3: Sub project Components and its Impact on Land Acquisition & Resettlement**

Sl. No.	Project Town	Works	Permanent Impact on LA and IR	Temporary Impact	Remarks	Status of civil works (%)
<b>Tranche -2</b>						
<b>Package -1 (Dharwad)</b>						
1	Ranebennur	Supplying and Laying Sewerage Network and Constructing FAL type STP in Ranebennur CMC	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads. Land earmarked for construction of STP is in the possession of Ranebennur ULB.  Since the project category with respect to Resettlement Impact is 'C' no RP was prepared for this sub project. DDR was prepared and submitted to ADB.	90%
2	Hubli	Providing Sewer Trunk Mains, Sub-mains and Interceptors in Sewer Zone-2 of HDMC	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads.  However during project execution certain buildings are got damaged and shops along the sewer line alignment are compelled to shut down for 7 to 8 days. The Corrective Action Plan (CAP) is prepared (as per the guidance of ADB) and it is in the process of approval. The assistance shall be paid to the respective persons based on the approval of CAP.	100%
3		Providing Sewer Trunk Mains, Sub-mains and Interceptors in Sewer Zone-1 & 3, Sub-mains and Force Mains in Sewer Zone-4 and Construction of SWD in HDMC	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads.  Since the project category with respect to Resettlement Impact is 'C' no RP was prepared for this sub project.	100%

SI. No.	Project Town	Works	Permanent Impact on LA and IR	Temporary Impact	Remarks	Status of civil works (%)
4		Design, Supply, Installation, Commissioning and Operation & Maintenance of 40 MLD STP using SBR/CASP process plant at Gabbur in Hubli Taluk in HDMC.	No	Yes	<p>The land earmarked (16.63 Acres) for the construction of STP at Gabbur village of Hubli town was acquired in the year of 1980 by HDMC. Though full compensation as per LA act was paid during acquisition, due to lack of vigil from ULB, the family members (from whom the land is acquired) continued cultivation in the said 16.63 Acres of land. As per the census survey conducted from 18 to 20th January 2010, it was found 8 households are doing cultivation in the land earmarked for STP. This 8 HH comprise 17 families and 64 persons. During the construction of STP minor damages happened to the structures affecting 199 persons. Out of this 129 PAPs received their compensation during this reporting period.</p> <p>A majority of the RP activities are successfully completed except income generating activities. IGA activities are scheduled to be completed by December, 2015.</p>	100%
		Construction of wet well at Bhairidevarakoppa	No	Nil	<p>All the components of this sub projects are located on vacant government land.</p> <p>Since the project category with respect to Resettlement Impact is 'C' no RP was prepared for this sub project. DDR was prepared and submitted to ADB.</p>	
5	Bijapur	Rehabilitation of Existing Sewerage System and Interception and Extension of New Areas and Rehabilitation of Primary Drain (District-1A) of Bijapur CMC	Nil	Nil	<p>All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads.</p> <p>As the project category with respect to</p>	34.79% Work is retendered, yet to be awarded.

SI. No.	Project Town	Works	Permanent Impact on LA and IR	Temporary Impact	Remarks	Status of civil works (%)
					Resettlement Impact was 'C' no RP was prepared for this sub project.	
6		Improvement of Sewerage System in District 2B of Bijapur CMC and Construction of FAL type STP	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads .Land earmarked for construction of STP is in the possession of Bijapur ULB and uninhabited.  As the project category with respect to Resettlement Impact is 'C' no RP was prepared for this sub project. DDR was prepared.	55%
		Rehabilitation of Existing Sewerage System and Interception and Extension of New Areas and Rehabilitation of Primary Drain (District-2A) of Bijapur CMC	Nil	Nil	All the components of this sub projects are located on vacant government land. As the project category with respect to Resettlement Impact is 'C' no RP was prepared for this sub project. DDR was prepared	
7	Davanagere	Laying of Raw Water Pumping Main to WTP at Bhati& to Kundawada Lake from "Y" Junction at Bathi to Kundawada Lake, Installation of New Vertical Turbine, Centrifugal Pump sets, Construction of 15 LL CWSR and Filter House (20 MLD) in Davangere City Corporation	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads.  As the project category with respect to Resettlement Impact was 'C' no RP was prepared for this sub project.	100%
8	Dharwad	Construction of 5-Bay Fire Station and Two Twin Fire Officers Quarters and 20 Firemen Quarters at Dharwad in Dharwad District.	Nil	Nil	All the sub project activities are located on vacant government land The land is uninhabited.  As the project category with respect to Resettlement Impact was 'C' no RP was prepared for this sub project. DDR was prepared.	100%

Sl. No.	Project Town	Works	Permanent Impact on LA and IR	Temporary Impact	Remarks	Status of civil works (%)
9	Ranebennur	Construction of One Twin Fire Officers Quarters and 12 Firemen Quarters at Ranebennur in Haveri District.	Nil	Nil	All the sub project activities are located on vacant government land owned by Fire & Emergency department This land is uninhabited.  As the project category with respect to Resettlement Impact was 'C' no RP was prepared for this sub project. DDR was prepared.	100%
10		Providing Basic Infrastructure to Islampur Slum in Ranebennur.(Road and SWD)	Nil	Nil	The activity is improving (katcha road to pucca road) with drain. All the activities are confined within existing ROW and no involuntary resettlement issue was identified during the time of preparation DPR.  As the project category with respect to Resettlement Impact was 'C' no RP was prepared for this sub project.	52%
11	Haveri	Providing Basic Infrastructure to Nagendramatti in Haveri .(Road and SWD)	Nil	Nil	The activity is improving (katcha road to pucca road) with drain. All the activities are confined within existing ROW and no involuntary resettlement issue was identified during the time of preparation DPR.  As the project category with respect to Resettlement Impact was 'C' no RP was prepared for this sub project.	100
<b>Package -2 (Belgaum)</b>						
1	Gokak	<b>Water supply:</b> Installation of Raw water pump set with 100 HP : 2 Nos, Pure water pump sets with 75 HP : 2 Nos, Distribution of pipe line existing Replaced: 23527 m & New laid : 48149 m.	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads. Land earmarked for pump houses is in the possession of Gokak ULB.  Since the project category with respect to	99

Sl. No.	Project Town	Works	Permanent Impact on LA and IR	Temporary Impact	Remarks	Status of civil works (%)
					Resettlement Impact was 'C'. No RP was prepared for this sub project. DDR prepared and submitted to ADB.	
2		<b>Sewerage &amp; Sanitation:</b> Construction of STP Capacity for 2026: FAL technology type 8.70 MLD, Trunk sewer 3.31 Km, Sub main & lateral 18.37 Km, construction of manholes 865 Nos, Pumping stations 1 No. with wet well, Pumping Main 5.55 Km & House connections 2099 Nos	Yes	Nil	All the components of this sub projects are located on vacant government or along the existing right-of-way (RoW) of city roads.  The land earmarked for STP has been purchased through direct purchase scheme and now it is in the possession of Gokak CMC. No RP was prepared for this sub project. DDR prepared and submitted to ADB.	86.47
3		<b>Slum Improvement.</b> Asphalt Road & Drains, Heavy Duty cobble stone roads & Drains covers	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads.  Since the project category with respect to Resettlement Impact was 'C.' No RP was prepared for this sub project.	84
4	Nippani	<b>Water supply:</b> Raw water pump sets: Replaced with 270 HP, construction of 3.4 MLD New WTP capacity, Pure water pump set: Replaced with 35 HP–2 Nos, Booster station: Replaced with 25HP-Shivaji Nagar with 25HP, New 2.0 ML-1No & 0.4 ML-1No, Service Reservoirs, Distribution system 49.4Km & House connections 5000 Nos	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads. The land earmarked for construction of WTP is in the possession of Nippani ULB.  Since the project category with respect to Resettlement Impact was 'C'. No RP was prepared for this sub project. DDR prepared and submitted to ADB.	77
5		Sewerage and Sanitation	-	-	-	-
6		Slum Improvement. Asphalt Road & Drains, Heavy Duty cobble stone roads	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads.	Work awarded, 91% completed.

Sl. No.	Project Town	Works	Permanent Impact on LA and IR	Temporary Impact	Remarks	Status of civil works (%)
					Since the project category with respect to Resettlement Impact was 'C' no RP was prepared for this sub project.	
7	Rabakavi-Banahatti	<b>Sewerage and Sanitation</b> : Sewerage and Sanitation: 9.20 Mld STP Capacity with FAL technology, Trunk sewer Retained 4.01 Km & Sub main & lateral with 47.04 Km , Construction of 1708 Nos Manholes, 1 No with wet well Pumping stations & House connections 3008 Nos	Yes	Yes	Land acquisition is done for 8 acres and 18 Guntas which includes STP site and buffer zone. IR impacts to 1 HH comprise 13 APs, RP approved by ADB. Compensation paid to the land owner on 26-12-2013 and subsistence allowance paid to land owner on 18-03-2015.	Worked awarded on 31.11.2015 and UGD survey work completed.
8		Slum Improvement Drains 2X0.09 mtrs, Community Toilet & Sinking of Bore well estimation	Nil	Nil	All the components of this sub projects are located on vacant government land or along the existing right-of-way (RoW) of city roads.  Since the project category with respect to Resettlement Impact was 'C' no RP was prepared for this sub project.	76
9	Jamakhandi	<b>Sewerage and Sanitation:</b> 7.60 Mld STP Capacity with FAL technology, Trunk sewer Retained 5.00 Km & Sub main & lateral with 35.019 Km, Construction of 1272 Nos Manholes, 2 Nos. with wet wells Pumping stations & House connections 2394 Nos	Nil	Nil	All the components of this sub projects are located on vacant government land or along the existing right-of-way (RoW) of city roads. The land earmarked for STP is in the possession of Jamakhandi CMC.  Since the project category with respect to Resettlement Impact was 'C', no RP was prepared for this sub project. DDR prepared and submitted to ADB.	73
10		Slum Improvement Azad Nagar 1 & 2, & Sadanand Colony Slums: Concrete Roads & Drains, Sewage network	Nil	Nil	All the components of this sub projects are located on vacant government land or along existing right-of-way (RoW) of city roads.  Since the project category with respect to Resettlement Impact was 'C' no RP was prepared for this sub project.	49

Sl. No.	Project Town	Works	Permanent Impact on LA and IR	Temporary Impact	Remarks	Status of civil works (%)
11	Ilkal	<b>Water supply 24 x 7:</b> Will be abandoned New-Up stream of Almatti Dam in Krishna River Source, 135 lpcd Rate of supply, 3.0 m dia – 1 No Collection well, 10.0 m dia – 1 No Pump house, 550 Hp 2 Nos Raw water pumps, 711mm dia MS 38.0 Km Raw water pumping main, 25.25 Mld (KUW & DB) WTP capacity, 508mm MS – 2 ESRs by KUWS&DB 1 ESR Pure water pumping main in this project, 17.70 Mld Service Reservoirs Quantity supplied, 1 at Darga OHT Booster station, New system - 86.87Km Distribution & 8849 House connections. **4.3. IR issues identified during this reporting period.**

17 No IR issues are identified in this reporting period. However, regular site visits and discussion with local public by implementation NGOs, SDOs and consultants shall be continued throughout the project period to confirm that no resettlement issues remain unnoticed or unaddressed.

**4 Activities carried out for Public Participation and GAP**

18 The activities of public participation and implementation of GAP are coordinated by apex NGO. Apex NGO (Agricultural Finance Corporation) is in action since October, 2012. A report on activities conducted with respect to public participation and implementation GAP is given as **Appendix-1** to this report.

**5 Compliance status of loan covenants.**

19 The compliance status with respect to loan covenants is presented in table 4 below

**Table 4: Compliance status**

Sl. No.	Loan Covenant	Agency	Status of Compliance
1.	GOI and the State will ensure that all land and right of way required for investment programme are made available in timely manner. Adequate compensation are provided prior to the signing of relevant civil works contracts, and involuntary resettlement is carried out in accordance with the resettlement framework (RF) and resettlement plans (RPs) agreed upon between the Government and ADB. An RP will be prepared for each sub project involving land acquisition and resettlement and shall be submitted to ADB for review and approval prior to award of any related civil works contracts.	Government of Karnataka	RP has been prepared and got approved from ADB.  Preparation of corrective plan is in progress to address the issues came up during the project implementation.
2.	GOI and the State will ensure that sub projects will not negatively impact on vulnerable groups, such as indigenous people. In the event of their involvement in any of sub projects, the GOI and the states will ensure that the sub projects are carried out in accordance with the Indigenous People Development frameworks (IPDF) agreed up on between GOI and the states and the ADB and comply with ADBs policy on Indigenous People (1998)	Government of Karnataka	No adverse Impact on vulnerable groups
3.	Any issues related to indigenous people arise in course of project implementation, the borrower and the state shall ensure to address those issues in accordance with the applicable laws and policies of the borrower, ADB's policy on indigenous Peoples (1998) and the Indigenous Development Framework for the facility as agreed between the borrower, the	Government of Karnataka	Agreed. However, no issues related to indigenous people are anticipated in course of execution.

Sl. No.	Loan Covenant	Agency	Status Compliance of
	state and ADB. In the case of any discrepancy between the borrower's legislation and ADB's policy, ADB's policy shall prevail.		
4.	GOI and State will ensure that all civil works contractors comply with all applicable labour laws, including those on occupational health and safety, and do not employ child labour as defined in national legislation for construction and maintenance activities. Priority will be given to people from the area where the works are implemented and men and women will receive equal pay for work of equal value.	Government of Karnataka	Adequate provision has been made in contract
5.	Within six months of the Effective Date, the State shall have established a grievance reporting and redressal mechanism	Government of Karnataka	GRC is in place all the sub project districts

## 6 Project Impact

20 The subprojects now being taken up in North Karnataka towns under this investment program in the sector of water supply & sanitation will speed up the pace of the socio economic development of the ULBs by substantially improving the urban environment and living standards of the citizens. The implementation of the subprojects will not create any major adverse impact on community.

## 7 Policy and Legal Framework

21 The policy framework and entitlements for the program as well as for this subproject are based on national laws: The Right to Fair Compensation & Transparency in Land Acquisition, Rehabilitation & Resettlement Act 2013, and the National Resettlement and Rehabilitation Policy, 2007 (NRRP); state laws and regulations: ADB's Safeguard Policy Statement, 2009 (SPS); and the agreed Resettlement Framework (RF). Based on these, the core involuntary resettlement principles applicable are: (i) land acquisition, and other involuntary resettlement impacts will be avoided or minimized exploring all viable alternative subproject designs; (ii) where unavoidable, time-bound Resettlement Plans will be prepared and APs will be assisted in improving or at least regaining their pre-program standard of living; (iii) consultation with APs on compensation, disclosure of resettlement information to APs, and participation of affected persons in planning and implementing subprojects will be ensured; (iv) vulnerable groups will be provided special assistance; (v) payment of compensation to APs including non-titled persons (e.g., informal dwellers/squatters, and encroachers) for acquired assets at replacement rates; (vi) payment of compensation and resettlement assistance prior to the contractor taking physical acquisition of the land and prior to the commencement of any construction activities; (vii) provision of income restoration and rehabilitation; and (viii) establishment of appropriate grievance redress mechanisms

22 The RP outlines the objectives, policy principles and procedures for land acquisition, compensation and other assistance measures for Affected Persons (APs). The Executing Agency (EA) and the Implementing Agency (IA) will endorse the Resettlement Plan prior to Project Appraisal. The RPs shall be disclosed to the affected persons (APs) and submitted to ADB for review and approval prior to commencement of any civil works. Compensation and other assistances will have to be paid to APs

## 8 Public Consultations and Disclosure of RP

23 Public consultation and information dissemination are treated as a two way process through which the information is passed on to public and their feedback is sought to understand their issues. The RP was prepared in consultation with stakeholders. Meetings and consultations with relevant Government Departments were also carried out to assess the Project approach. Public consultations through Focus Group Discussions (FGDs) with project beneficiaries and project-affected people have been carried out. The consultative process shall be continued throughout the project period. The RP implementation NGOs are carrying out these activities in all project towns. The approved RP has been published in the websites of ADB & KUIDFC.

## 9 Grievance Redress - Issues reported and action taken during the reporting period.

24 **GRC System:** Complaints and grievance procedures will be outlined in each RP. A Grievance Redress Committee is proposed to be formed at the district-level to ensure that grievances are addressed in a timely manner, facilitating project implementation on schedule. GRC will have as its member's representatives from APs, both titled and non-titled (ensuring representation of Vulnerable Households), a local government/ULB representative, Investment Program Officials — Deputy Investment Program Director of NKUSIP, and an NGO/ CBO representative).

25 The Grievance Redress Committee (GRC) will redress grievances at the local-level in a consultative manner and with the participation of the Affected Households, or their representatives and other members. The first level of screening of grievances shall be undertaken by the implementing NGO and DO. Only major grievances shall be placed before the GRC. The GRC will determine the merit of each grievance and attempt to resolve the same within a month from the date of lodging of complaints, failing which the grievance shall be addressed to the Deputy Commissioner. The GRC shall forward grievances of serious nature immediately on receipt of complaint to the Deputy Commissioner. The DC will hear appeals against the decisions of GRC. The decision of DC is final and cannot be contested in any other forum except in the Courts of Law. The function of the Grievance Redress Committee shall be:

- (i) To support APs (particularly non-titled and vulnerable APs) on problems related to the eligibility for entitlements and assistance provided;
- (ii) To record grievances from APs and to categorize, prioritize and solve them within an appropriate time;
- (iii) To inform DC of serious and unresolved cases within an appropriate time frame; and
- (iv) To inform the aggrieved parties the progress regarding their grievances and decisions

26 All costs incurred in resolving the complaints will be borne by the ULB. In view of the fact that the GRC is at the district level, expenses incurred by members in attending the meetings will be covered by the Investment Program. GRC is in place in all project towns and the same will continue to function during the life of the Investment Program. Office Memorandum (OM) Issued by MD, KUIDFC in this regard is attached as annexure -1

27 **The issues reported to Grievance Redress Committee (GRC):** No grievance are elevated to GRC in any of the program towns during this reporting period.

## 10 Monitoring and Reporting

28 Monitoring involves periodic checking to ascertain whether activities are progressing according to R.P. Monitoring will cover physical and financial components and provides a feedback to keep the program on schedule. By contrast, evaluation is essentially a summing

up, the end of the project assessment of whether those activities have actually achieved the intended aims.

29 RP implementation will be closely monitored to provide IPMU with an effective basis for assessing resettlement progress and identifying potential difficulties and problems. For monitoring and evaluation (M& E), PMU will appoint an independent agency/Apex NGO to undertake external monitoring for the entire sub-project (this agency will provide an independent view of the Investment Program progress and should not be confused with the NGO appointed by the ULB to oversee resettlement implementation). The independent agency/Apex NGO will monitor the sub-project on a half yearly basis and submit its reports directly to the IPMU. The IPMU will submit all M&E reports to the ADB for review.

In RP implementation, the M& E system will perform the following key tasks:

- (i) Administrative monitoring to ensure that implementation is on schedule and that problems are dealt with on a timely basis;
- (ii) Socio-economic monitoring during and after the relocation process, if involved, utilizing the baseline established by the AP Socio-economic survey undertaken during project preparation to ensure that people are settled and recovering; and
- (iii) Impact evaluation to determine that recovery has indeed taken place and in time, succeeded.

The indicators for achieving the objectives under the resettlement and rehabilitation program are of three kinds:

- i) Process indicators, indicating project inputs, expenditure, staff deployment, etc.
- i) Output indicators, indicating results in terms of numbers of affected people compensated and resettled, training held, credit disbursed, etc.; and
- i) Impact indicators related to the long-term effects of the project on people's lives.

30 Monitoring will also cover the physical progress of project provided resettlement sites, if any resettlement sites are established. It will also cover the relocation of people to new sites as well as the allocation of replacement assets. The implementing NGO will submit quarterly reports to IPMU.

31 Internal Monitoring :Internal monitoring will track indicators such as the number of families affected, resettled, assistance extended, infrastructure facilities provided, financial aspects, such as compensation paid, grant extended etc.

32 ULB officials will carry out internal monitoring. Job charts will be given to the Resettlement Officer. The job charts will indicate the targets to be achieved during the month. Monthly progress report shall be prepared and submitted to PMU, reporting actual achievements against the targets fixed in their respective job charts and reasons for shortfalls, if any.

33 The PMU will have the responsibility for management and maintenance of AP database, documenting results of AP census, asset verification information, and socio-economic survey data, which will be used as the baseline for assessing impacts of RP implementation.

34 External Impact Evaluation: An external agency will be appointed to evaluate the resettlement program at mid-term and at the end of the project. The agency will submit evaluation on the following indicators:

- (i) Restoration of income levels;
- (ii) Changes and shifts in occupation pattern;
- (iii) Changes in type of housing of APs; and

- (iv) Assessing APs access to amenities, such as water, electricity, transportation etc.
- (v) Performance of NGO, ULB, and IPMU in resettlement implementation

### **Dairy farming in Chamarajnagar.**

In Boodithittu village in Chamarajanagar district, for construction of STP, 16.16 acres of land was acquired from 9 households, out of which, 7 were vulnerable families belonging to SC and BPL categories. For livelihood enhancement of these vulnerable families, an additional assistance of Rs.30,000 per family is budgeted in the RP for the purchase of income generating assets. Accordingly, intense discussions were held with these families to identify their preferred income generating activity. Since all the 7 families are having irrigated agricultural land, easy fodder availability, easy access to market for selling milk and milk products, (due to the proximity to the city), all of them decided to undertake dairy farming as an additional livelihood enhancement option.

Subsequently, a Skill Training Action Plan was prepared and submitted to ADB. Upon its approval, a 3 day training programme was organized on dairy farming at Krishi Vigyan Kendra, Haradanahalli village and agricultural officers imparted training to 7 people on various aspects of dairy farming like how to care for the cross breed cattle, what kind of diseases they may get, what kind of treatment they need, whom to consult, what kind of feed to be given, what would be their yield, how to market the product etc. Farmers were given the option to identify the cattle and purchase them. Veterinary doctor was consulted and a checkup of the cattles were done, and a certificate was issued by doctor for fitness, age, milk yield and price. Based on the certification, all the cattles were insured. All these activities were implemented in coordination with local ULB and the cheque was issued directly to the seller of the cattle by the Commissioner of ULB through a formal meeting.

Farmers purchased the cattle in June, 2015 and they have started getting income from September onwards. This has contributed to the improvement of household income as well as better nutritional status among the beneficiaries. Every day they are selling 6 -7 litres of milk, at the rate of Rs. 22 per litre, thus earning an income of Rs.157 per day. In this, daily expenditure is only Rs.50, giving them a profit of Rs. 107 per day. All the beneficiaries are extremely happy with this new income generation activity

### **Project displaced persons attending skill training**

### **Income generating activity, Gulbarga**

Under ADB assisted NKUSIP project, 10 acres of land was acquired for WTP and four families were affected, all of whom were coming under vulnerable category. Out of this, two beneficiaries were selected for income generation training programme – they are Mr. Dayanand, S/O Devaraj and Mr. Sanjeev Kumar, S/O Baburao. They had completed degree course in commerce and arts and opted for the computer training for their career development. The three months training programme included DTP, MS Office, Tally and internet usage. They are working as system operator for the past three months in Sowharda Cooperative bank, Bidar. This has contributed significantly towards their family income

**11 Issues and Action Plan**

35 No major safeguard compliance issues are left out unnoticed during this reporting period.
