

### Project Summary Information

Date of Document Preparation: May 20, 2020

<b>Project Name</b>	Emergency Response to COVID-19 Program
<b>Document Code</b>	PD000379-PSI-IDN
<b>AIIB member</b>	Republic of Indonesia
<b>Sector/Subsector</b>	Other Infrastructure/Public Health Infrastructure
<b>Status of Financing</b>	Under Preparation
<b>Project Description</b>	<p>The proposed program to be supported under the COVID-19 Crisis Recovery Facility (the Facility) is being co-financed with the World Bank (WB) and has been designed in accordance with the WB's Policy on Program for Results (PforR).<sup>1</sup> The adoption of PforR design will facilitate a rapid response to the current health emergency.</p> <p>The program aims to focus on three results areas</p> <ul style="list-style-type: none"> <li>- Results Area 1 - Help expand health system preparedness by addressing the immediate needs of designated COVID-19 referral facilities. The Program will support the expanded network of MOH-owned health facilities that have been designated as COVID-19 referral hospitals. It will ensure they are fully equipped to manage and treat the increase in severe respiratory illness and critical care patients. It will also support the MOH's development and implementation of infection control and safety measures in healthcare settings as well as treatment protocols to manage cases at all stages. For medium-term outcomes aimed at strengthening the health system, the program will support the updating of the national pandemic preparedness plan including emergency funds flows and emergency procurement systems, development of a communication strategy and the improvement of reporting and strengthened surveillance system incorporating lessons from COVID-19 experience.</li> <li>- Results Area 2 - Strengthen the laboratory network and surveillance system to help increase testing and contact tracing. The Program will support the development of national guidelines for laboratories adhering to Bio Safety Level 2 (as defined by National Institute for Health Research) or higher standards, covering sample collection, transportation, and laboratory testing procedures for suspected Severe Acute Respiratory Illnesses (SARI) or Coronaviruses. This</li> </ul>

<sup>1</sup> <https://policies.worldbank.org/sites/ppf3/PPFDocuments/Forms/DispPage.aspx?docid=3684&ver=current>

	<p>results area also aims to provide consumables for testing to every province and district of the country (subject to the availability of affordable COVID-19 cartridges for GeneXpert machines). Support from the Program will also promote the development and implementation of laboratory quality assurance mechanisms for those in the network. Lastly, the Program will strengthen the GOI's capacity to do contact tracing and surveillance by supporting the surveillance hotline for community-based reporting of outbreaks and new illnesses.</p> <ul style="list-style-type: none"> <li>- Results Area 3 - Ensure MOH support for communications and coordination across sectors and levels of government. The Program will facilitate communication and coordination for pandemic response and preparedness as it recognizes the need for the MOH to coordinate with other sectors. It will support the development and establishment of mechanisms for communication of COVID-19 test results (in coordination with the sub-national level), support the National Disaster Risk Management Agency (BNPB) and other agencies in developing messages on personal hygiene promotion and other preventive communications.</li> </ul>
<b>Objective</b>	To prevent, detect and respond to the threat posed by COVID-19 and to strengthen national systems for public health preparedness in Indonesia.
<b>Expected Results</b>	<ol style="list-style-type: none"> <li>1. Reduced service readiness gap in treating serious respiratory illness patients (as measured by the available number of critical care beds fully equipped as per national protocol);</li> <li>2. Strengthened laboratory capacity (measured as total capacity for quality assured tests per day);</li> <li>3. Improved reporting and surveillance system (measured as the availability of an improved surveillance system that incorporates lessons from the COVID-19 response experience); and</li> <li>4. Enhanced community engagement and communication (as measured by the number of interactions with the COVID-19 phone line).</li> </ol>
<b>Environmental and Social Category</b>	World Bank Category: Substantial (similar to Category B if the Environmental and Social Policy (ESP) of AIIB were applicable)
<b>Environmental and Social Information</b>	This program will be co-financed with the WB as lead co-financier, and its environmental and social (ES) risks and impacts have been assessed in accordance with the WB's Policy on Program-for-Results Financing (PforR Policy). AIIB's ESP was designed to apply to investment projects and has no provisions for its application to PforR operations. Therefore, as permitted by the decision of the AIIB's Board of Directors set forth in the Decisions to Support the COVID-19 Crisis Recovery Facility, AIIB will apply the PforR Policy to this operation in lieu of AIIB's ESP. This will ensure a harmonized approach to addressing the ES risks and impacts of the program.

	<p>An Environmental and Social Systems Assessment (ESSA)<sup>2</sup>, which involves assessing the country's systems for managing environmental and social risks and impacts of the proposed Program, have been conducted by the WB in accordance with its PforR Policy. The ESSA is complemented with Environmental and Social Program Plans, which forms a part of the Program Action Plan (PAP), at the operational level. The country systems applicable to the program were reviewed to ascertain their adequacy to address environmental and social (ES) risks and impacts as identified during the ESSA. The country's legislation related to ES safeguards for the program was found to be adequate. Consequently, the country's ES management system, based on the ESSA, will be applied to the Program given that the ES risks and impacts are limited in their scope and can be successfully managed by known and tested measures.</p> <p>Risk areas of concern include medical waste and wastewater, Occupational Health and Safety (OHS) for medical workers, community health and safety-related to the handling of medical waste, transportation, treatment and isolation of people with confirmed COVID-19 and/or people who may have COVID-19, poor consent processes, communication and outreach, and privacy concerns due to mass surveillance. However, the Program is expected overall to have mostly positive ES impacts, insofar as it should improve COVID-19 surveillance, monitoring, case management and containment, thereby preventing a wider spread of the disease. In the longer run, the Program also seeks to promote further reform in Indonesia's health system and enhance its resilience and preparedness for future pandemics.</p>										
<b>Cost and Financing Plan</b>	<p>The total financing provided under Program is USD974 million, of which USD 500 million will be co-financed jointly by WB and AIIB. Islamic Development Bank (IsDB) is expected to support the Government Expenditure Program with a proposed financing envelope of USD200 million under parallel financing. The tentative financing plan is shown in the table below:</p> <table border="1" data-bbox="504 979 1561 1182"> <thead> <tr> <th>Loans</th> <th>Amount (USD million)</th> </tr> </thead> <tbody> <tr> <td>AIIB</td> <td>250</td> </tr> <tr> <td>World Bank</td> <td>250</td> </tr> <tr> <td>Government of Indonesia*</td> <td>474</td> </tr> <tr> <td>Total</td> <td>974</td> </tr> </tbody> </table> <p>*IsDB is expected to provide USD200 million under parallel financing</p>	Loans	Amount (USD million)	AIIB	250	World Bank	250	Government of Indonesia*	474	Total	974
Loans	Amount (USD million)										
AIIB	250										
World Bank	250										
Government of Indonesia*	474										
Total	974										
<b>Borrower</b>	Republic of Indonesia										
<b>Implementing Entity</b>	Ministry of Health

<b>Implementation Period</b>	Start Date: June 2020 End Date: October 2021			
<b>Expected Loan Closing Date</b>	October 30, 2021			
<b>Contact Points:</b>	<b>AIIB</b>	<b>World Bank</b>	<b>Borrower</b>	<b>Implementing Agency</b>
<b>Name</b>	Mr. Toshiaki Keicho	Mr. Somil Nagpal	Mr. Scenaider C.H. Siahaan	Mr. Bayu Teja Muliawan
<b>Title</b>	Senior Investment Operations Specialist	Senior Health Specialist	Director of Loans and Grants, Ministry of Finance	Head of Bureau of Planning and Budgeting
<b>Email Address</b>	toshiaki.keicho@aiib.org	snagpal@worldbank.org	direktoratph@kemenkeu.go.id	rorendepkes@gmail.com
<b>Estimated Date of Concept Decision</b>	May 2020			
<b>Estimated Date of Appraisal Decision</b>	May 2020			
<b>Estimated Date of Financing Approval</b>	June 2020			

<b>Independent Accountability Mechanism</b>	<p>AIIB's Policy on the Project-affected People's Mechanism (PPM) addresses issues raised under AIIB's ESP, which does not apply to this operation. Submissions to the PPM under the program would, therefore, not be eligible for consideration by the PPM. AIIB will rely on the WB's corporate Grievance Redress Service (GRS), and its independent accountability mechanism the Inspection Panel (IP) to handle complaints relating to environmental and social issues that may arise under the Program.</p> <p>For information on how to submit complaints to the WB's GRS, please visit <a href="http://www.worldbank.org/en/projects-operations/products-and-services/grievance-redress-service">http://www.worldbank.org/en/projects-operations/products-and-services/grievance-redress-service</a>. For information on how to submit complaints to the WB Inspection Panel, please visit <a href="http://www.inspectionpanel.org">http://www.inspectionpanel.org</a></p>
