Operation Number	SU-L1057	Chief of Operations Validation Date	10/21/21
Year- PMR Cycle	First period Jan-Jun 2021	Division Chief Validation Date	
Last Update	10/01/21	Country Representative Validation Date	
PMR Validation Stage	Validated by Chief of Operations		

Basic Data

Operation Profile

Operation Name	Improving Transport Logistics and Competitiveness in Suriname	Loan Number	4828/OC-SU
Executing Agency	MINISTRY OF PUBLIC WORKS	Sector/Subsector	TRANSPORT-PORT INFRASTRUCTURE
Team Leader	GUERRERO, PABLO	Overall Stage	Disbursing (From eligibility until all the Operations are closed)
Operation Type	Loan Operation	Country	Suriname
Lending Instrument	Investment Loan	Convergence related Operation(s)	
Borrower	REPUBLIC OF SURINAME		

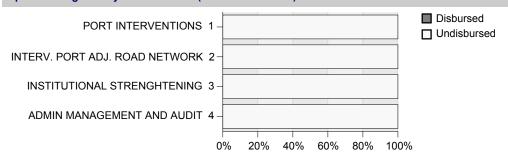

Environmental and Social Safeguards

Impacts Category	В	Was/Were the objective(s) of this operation reformulated?	NO
Safeguard Performance Rating		Date of approval	
Safeguard Performance Rating - Rationale

RESULTS MATRIX

General Development Objectives

General Development Objectives Nbr. 0: Suriname's quality of ports

Observation: The index varies from 1 – 7 (poor – excellent). The goal was estimated by comparison with the index for the Bank's countries within Central America and the Caribbean region with similar GDP and sea cargo volumes.

	Indica	ator	Unit of Measure	Baseline	Baseline Year	Expected Year of Achievement		Target				
0.0	Suriname's quality of ports		index	4.40	2014	-	Р	4.60				
							Α

Pro-Ge	ender N	lo			Pro-Ethnicity		No					
bjective expect the ope Justifie	eneral Development e indicator target is ed tobe observed by eration's "Fully ed" date vergence (CO)	′es										

General Development Objectives Nbr. 1: Trading Across Borders

Observation: The ranking of economies in the ease of trading across borders is determined by sorting their distance to frontier scores for trading across borders. These scores are the simple average of the distance to frontier scores for the time and cost for documentary compliance and border compliance to export and import. The ranking compares 190 countries.

or the di	stance to nontier score	s for the time and cost ic	uocumentary t	compliance and	border compilar	ice to export and	а широп	. The ranking compares 190 countries.			
	Indi	icator	Unit of Measure	Baseline	Baseline Year	Expected Year of Achievement		Target

RESULTS MATRIX

General Development Objectives

General Development Objectives Nbr. 3: Cost to import (Border Compliance)

Observation: Target is set based on the average for the region. Following Abadie and Gardeazabal (2003) and Abadie et al (2010), will follow an SCM to estimate the impact of the intervention by building a synthetic control group. Data to be used include yearly published Doing Business indicators, World Development Indicators, Global Competitiveness Indicators

	Ind	icator	Unit of Measure	Baseline	Baseline Year	Expected Year of Achievement		Target		
3.0	Cost to import (Border Co	ompliance)	USD	658.00	2019	-	Р	647.20

RESULTS MATRIX

Specific Development Objectives

Specific Development Objectives Nbr. 1: Reduction in cargo operations time

Observation: Average time for cargo operation will be calculated based on the same procedures considered to calculate the baseline. The import process is the one presenting benefit if the inspection is carried out before the truck arrival.

	Indicator	Unit of Measure	Baseline	Baseline Year		2024	EOP 2024

Specific Development Objectives Nbr. 3: Reduction in generalized travel costs for road users

Observation: The costs quantified were the VTT and the VOC, using parameters for Suriname VTT estimated using the methodology World Bank methodology. This model was further developed by the Mexican Transport Institute to propose a time valuing estimation based on the working time spent on transport and the leisure time spent on transport. This method considers the minim wage, the number of average working hours in a week by employed citizens and an adjustment factor based on the times the minimum wage is earned by a vehicle type occupant VOC based on parameters of fuel consumption by vehicle type per average speed and non-fuel related costs by vehicle type per kilometer. These inputs were obtained from the California Life-Cycle Benefit-Cost Analysis Model for the 2018 BUILD Applications
