

DRC Improved Forested Landscape Management Project (P128887)

EASTERN AND SOUTHERN AFRICA | Congo, Democratic Republic of | Environment, Natural Resources & the Blue Economy Global Practice | Recipient Executed Activities | Investment Project Financing | FY 2014 | Seq No: 17 | ARCHIVED on 16-Feb-2023 | ISR54933 |

Implementing Agencies: Ministry of Environment and Sustainable Development, Ministry of Finance

Key Dates

Key Project Dates

Bank Approval Date: 24-Jun-2014

Effectiveness Date: 29-Apr-2015

Planned Mid Term Review Date: 15-Feb-2018

Actual Mid-Term Review Date: 03-Feb-2018

Original Closing Date: 31-Dec-2022

Revised Closing Date: 31-May-2024

Project Development Objectives

Project Development Objective (from Project Appraisal Document)

The project development objective is to test new approaches to improve community livelihoods and forested landscape management, and to reduce greenhouse gas emissions from deforestation and forest degradation in selected areas in the Recipient's territory.

Has the Project Development Objective been changed since Board Approval of the Project Objective?

No

Components Table

Name

Integrated REDD+ Projects in the Mai Ndombe Province:(Cost \$46.13 M)

Facilitation of Private Sector Activities to Reduce Fuel Wood emissions:(Cost \$8.00 M)

Promote small-scale agroforestry systems to reduce land-use emissions:(Cost \$10.50 M)

Knowledge management and program Coordination:(Cost \$5.73 M)

Overall Ratings

Name	Previous Rating	Current Rating
Progress towards achievement of PDO	□ Moderately Satisfactory	□ Moderately Satisfactory
Overall Implementation Progress (IP)	□ Moderately Satisfactory	□ Moderately Satisfactory
Overall Risk Rating	□ High	□ High

Implementation Status and Key Decisions

- **The parent project (FIP grant) closed on 30 June 2020 as planned (100% disbursement).** The PIU (UC-PIF) closed operations across all project components, including inventories and transfer of assets, closure of contracts, and preparation of component level completion reports. The FIP Completion Report was prepared and shared with the Bank in January 2021. It will support the preparation of the overall project's Implementation Completion Report (ICR) which will be prepared by the Bank in 2022/2023.

- **In the Mai-Ndombe Province, project implementation has progressed although COVID restrictions have put a strain on activities over 2020-2021:**

1/ In the Plateaux District, where activities closed in June 2020 (FIP grant), 215 Local Development Committees (LDC) were operationalized in the four territories (Bolobo, Kwamouth, Mushie, and Yumbi), and formally registered with proper articles of association and recognized by the decentralized administration. The LDCs are supporting the management planning exercise of their territories as validated by the four Councils for Agriculture and Rural Management (CART, Conseil Agricole Rural de Territoire) at the territory level with the aim of reducing pressure on native forests by promoting alternatives to slash-and-burn in forested landscapes. 133 Natural Resource Management Plans (NRMP) were completed out of an objective of 133. The validation of 25 NRMPs in the Yumbi Territory was not made possible due to December 2018 conflicts and subsequent withdrawal of project staff. In addition, there were 4 contentious NRMPs in the Bolobo Territory which had not been validated. A joint mission including representatives from UC-PIF, WWF, and national CSOs went to Yumbi and Bolobo Territories from November 25 to December 3, 2019, and resulted in 1) the validation of the 25 NRMPs in Yumbi and 2) suspending validation for the 4 NRMPs in Bolobo recognizing this the long-lasting customary conflicts over land limits in the area which do not allow local authorities to endorse the NRMPs for the time being. 155 LDCs (7,282 households) benefited from Payments for Environmental Services (PES), with around 1.36 million USD paid in the field and reinvested in micro-projects at the community and/or household level.

2/ In the Mai-Ndombe District, where activities are ongoing, 480 CLDs have been created or dynamized and are functional (out of the 400 expected) with 404 NRMPs validated. 1,800 hectares of agroforestry plantations (acacia) have been implemented (out of the 990 ha planned), 1,690 ha of oil palm (out of the 2,000 ha planned), 835 hectares of perennials (out of the 6,000 ha planned), 9,936 hectares of exclosures/set-asides (out of the 20,000 expected) 4 CARG and 15 CART have been revitalized and are functional, and about 1.6 USD million in PES has been paid to communities. 24 concessioner farmers (including 2 women and 2 Indigenous Peoples) and 9,593 farmers (including 3,203 women and 206 Indigenous Peoples) are direct beneficiaries of the project. Although in 2020-2021 progress was slowed down by COVID-related restrictions, the local implementing agency and NGO service providers remained in the field presence to engage with communities on awareness-raising and dialogue related to LCDs, nurseries, and PES. The next project's Provincial Steering Committee will be held in March 2023 in Inongo.

- **21,491 hectares of agroforestry plantations are in place (74% of the overall objective).** 894 ha have been lost to bushfires since Sept. 2019. The breakdown is as follows: Component 1: 8,395 ha including 4,070 ha under PIREDD Plateau (81% of the FIP objective), 3,490 ha under PIREDD Mai-Ndombe (116% of the CAFI objective), and 835 ha of perennials under PIREDD Mai-Ndombe (14% of the CAFI objective); Component 2: 5,493 ha (55% of the objective of the parent project); and Component 3: 7,603 ha (152% of the FIP objective)
- **In addition, 171,987 hectares of exclosures to facilitate natural regeneration by protecting land areas from bush fires are in place in savanna and forest areas.** The breakdown is as follows: Component 1: 162,119 ha including 149,989 ha under PIREDD Plateau (13,944 incl. 9,669 ha supported by PSE (accounting loss), and 136,045 of primary forest identified by communities for conservation) and 12,130 ha under PIREDD Mai-Ndombe; and Component 3: 9,868 ha.
- **Under Component 3, the project facilitated the dissemination of 86,625 cookstoves (115% of the objective)** and the avoidance of 0.34 million tons of CO₂ (tCO₂eq.).
- **Overall emission reductions generated by project activities are estimated at 6.40 million tCO₂eq (EXACT tool).**
- **Regarding connectivity among territories, 252 kilometers of roads in Plateaux District were restored.** In the Mai Ndombe District, an infrastructure intervention plan was developed with authorities and started implementation in May 2021. As of January 2023, 125 kilometers of road have been restored through the HIMO approach (Mushi-Mbali axis), 3 metal bridge rehabilitated (46 meters in Ngapoko) and 27 bridges and 4 road culverts completed.
- **The project website (www.pifrdc.org) has been up and running since November 15, 2017.** Its objective is to promote: (i) the dissemination of lessons learned; and (ii) the use of the Feedback and Grievance Redress Mechanism. Grievances can be submitted online or by contacting: (i) plaintes.recours.pif@gmail.com; (ii) the Forest Investment Program Coordination Unit (UC-PIF); (iii) the Local Implementing agencies (*Agences Locales d'Exécution*); and (iv) the CLDs or the CARTs.
- **Socioeconomic studies focusing on the monetary and non-monetary benefits of the project were conducted.** Under FIP activities, using a sampling of 1,650 households spread all over the project boundary, shows that 15,700 households or 110,000 inhabitants, including 58,400 women (92 percent of the end target of the parent project) have benefited from the project. Populations saw an 18% increase (+ US\$448 per annum) in their incomes. A similar study was completed in 2022 for the Mai Ndombe District (PIREDD MD) and shows an increase in benefits of +63% between 2020 (baseline year) and 2022 for 76,744 people including 25.624 women and 1,616 IPs.

Results

PDO Indicators by Objectives / Outcomes

To test new approaches to improve community livelihoods				
► People in forest & adjacent community with monetary/non-monetary benefits from forest (Number, Custom)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	110,000.00	186,744.00	240,000.00
Date	30-Jun-2014	31-Mar-2020	31-Jan-2023	31-May-2024
Comments:	<p>A study led by the firm MULTINA MDK was done for FIP-related activities (parent project). Using a sampling size of 1,650 households spread throughout the project boundary, the study shows that 15,700 households or 110,000 inhabitants (92 percent of the end target of the FIP-funded parent project) have already benefited from the project. Populations saw an 18% increase (+ US\$448 per annum) in their incomes. Non-monetary benefits remain preponderant (76%). They have been valued by using average prices for plant and livestock production, non-timber products, and other resources self-consumed by rural populations. Women (58,400) benefiting from the project already represent 146 percent of the end target (40,000) of the FIP-funded parent project. A similar exercise was done in 2022 for the CAFI financing (PIREDD MD) and shows an increase in benefits of +63% between 2020 (baseline year) and 2022 for 76,744 people including 25,624 women and 1,616 IPs. The Task team just received the study and will analyze it.</p>			
□ People in forest and adjacent community with benefits from forest-female (Number, Custom Breakdown)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	58,400.00	84,024.00	115,000.00
Date	30-Jun-2014	31-Mar-2020	31-Jan-2023	31-May-2024

□ People in forest&adj. commy with benefit from forest-Ethnic minority/indigenous (Number, Custom Breakdown)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	0.00	1,616.00	15,000.00
Date	30-Jun-2014	31-Mar-2020	31-Jan-2023	31-May-2024

To test new approaches to improve forested landscape management

► Designing and implementing new approaches (Number, Custom)

	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	28.00	28.00	8.00
Date	30-Jun-2014	15-Dec-2021	31-Jan-2023	31-Dec-2019

Comments:

Designing a new approach: (i) Payment for Environmental Services (PES) rewarding efforts in agroforestry (1 point) and in the fight against bush fires (1 point) based on exclosures; (ii) Support the private sector by subsidizing agroforestry investments in the field (1 point); and (iii) promoting the production of non timber forest products out of the agroforestry models (1 point).
Implementing a new approach (2 points per year): 8 points as the four new approaches described above have been implemented for two years.
Satisfactory implementation (2 points per year): 8 points as the four new approaches described above have been satisfactorily implemented for two years.

► Land area where sustainable land mgt. practices were adopted as a result of proj (Hectare(Ha), Corporate)

	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	188,318.00	193,478.00	368,000.00
Date	30-Jun-2014	15-Dec-2021	31-Jan-2023	31-May-2024

Comments:

The methodology to monitor this indicator has been reviewed with the PIU in order to align with the initial approach at the project design phase. Indeed, the PIU had decided over the course of the project to account for the total area covered under the Natural Resources Management Plans developed by communities. However, the current Task Team understands that at project design the targets were related to areas covered by actual outputs in terms of tree plantations and exclosures. This is in turn more consistent with the end target of 350,000 ha while the PIU's new approach reported results 10 times larger. Based on the approach revised in June 2021, the actual Land area where sustainable land mgt. practices were adopted as a result of the project is 193,239 ha (55% of the objective) broken down as follows:
-21,491 hectares of agroforestry plantations. Component 1: 8,395 ha including 4,070 ha under PIREDD Plateau and 4,325 ha under PIREDD Mai-Ndombe; Component 2: 5,493 ha and Component 3: 7,603 ha.
-171,987 hectares of exclosures. Component 1: 162,119 including 149,989 ha under PIREDD Plateau (13,944 incl. 9,669 ha supported by PSE (accounting loss), and 136,045 of primary forest identified by communities for conservation without PSE) and 12,130 ha under PIREDD Mai-Ndombe; and Component 3: 9,868 ha.

To reduce greenhouse gas emissions from deforestation and forest degradation

► GHG emission reductions (and removals) generated under the project (Metric ton, Custom)

	Baseline	Actual (Previous)	Actual (Current)	End Target
--	----------	-------------------	------------------	------------

Value	0.00	5,919,548.00	6,400,000.00	11,500,000.00
Date	30-Jun-2014	15-Jun-2021	31-Jan-2023	31-May-2024
Comments:	<p>As of today, only the following have been estimated (i) emission reductions derived from indirect investments aimed at improving the energy efficiency of cookstoves in the greater Kinshasa (Component 2b) measured according to the CDM Small-scale Methodology (AMS-II.G.) "Energy efficiency measures in thermal applications of non-renewable biomass"; and (ii) removals generated under afforestation / reforestation schemes in the Kinshasa basin supply (Components 1, 2a and 3) and measured using proxies (carbon sequestration for each type of sylvicultural model).</p> <p>Emission reductions as derived from the production of cookstoves and calculated in March 2020: 337,497tCO₂eq.</p> <p>Removals as derived from the tree plantations, and calculated in June 2021, 2021: 1.26 million tCO₂eq. Finally, if we consider that the project will reduce over a five year period (2016 - 2020) emissions from deforestation and forest degradation by 3% against the baseline, as defined in the Emission Reductions Programme Document for the Mai Ndombe Province duly approved by the Carbon Fund participants of the Forest Carbon Partnership Facility (FCPF) in November 2016, project activities might have already reduced emissions from deforestation and forest degradation by 4,322,051 tCO₂eq.</p> <p>Total with avoided deforestation and/or reduced forest degradation: 5,919,548 tCO₂eq.</p>			

Intermediate Results Indicators by Components

Integrated REDD+ Projects in the Mai Ndombe Province				
► Chiefdom (Chefferie) with Performance-Based Incentives and Investments mechanisms in place (Percentage, Custom)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	78.00	78.00	93.00
Date	01-Jul-2014	15-Dec-2021	31-Jan-2023	31-May-2024
Comments:	<p>Out of the 215 Local Development Committees (LDCs) identified in the former Plateaux District of the Mai-Ndombe Province (PIREDD Plateau), 155 signed contractual arrangements with the project based on performance-based incentives. Adding the former Mai-Ndombe District (PIREDD Mai-Ndombe), this is 480 (out of 400 expected under this tranche) as of December 2021. The total is 635 out of 815 or 78%.</p>			
► Management Effectiveness Tracking Tool (METT) score for Tumba Lediiima Natural Reserve (Number, Custom)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	30.00	30.00	30.00	55.00
Date	15-May-2019	15-Dec-2021	31-Jan-2023	31-Dec-2022
Comments:	<p>Indicator related to the new GEF AF which has started implementation in 2021. Will be updated in the next ISR period working with ICCN and the PIU.</p>			
► Community sub-projects registered as REDD+ sub-projects (Number, Custom)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	0.00	0.00	2.00
Date	15-May-2019	15-Dec-2021	31-Jan-2023	31-Dec-2022

Comments:

Indicator related to the new GEF AF which has started implementation in 2021. Sub-projects are being prepared but will only be registered over the course of 2022.

Facilitation of Private Sector Activities to Reduce Fuel Wood emissions

► Production of improved cookstoves (Yes/No, Custom)

	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	No	Yes	Yes	Yes
Date	30-Jun-2014	30-Jun-2020	30-Jun-2020	31-Dec-2019

► ACCES-compliant cookstoves delivered to the Kinshasa market (Number, Custom)

	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	80,625.00	80,625.00	70,000.00
Date	30-Jun-2014	30-Jun-2020	30-Jun-2020	31-Dec-2019

► Improved organization of the sector (Number, Custom)

	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	5.00	5.00	7.00
Date	30-Jun-2014	30-Jun-2020	30-Jun-2020	31-Dec-2019

Comments:

The Alliance has a Board of Directors; affiliated members contribute fees to the Alliance in conformity with the organization's governing texts. The development of the Consumer Engagement Strategy was finalized.

Promote small-scale agroforestry systems to reduce land-use emissions

► Biomass (energy) produced in a sustainable manner (Metric ton, Custom)

	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	999,500.00	2,037,057.00	2,100,000.00
Date	30-Jun-2014	15-Dec-2021	31-Jan-2023	31-May-2024

Comments:

The PIU reports that 999,500 metric tons of fresh biomass have already been produced in the field as a result of the 22,252 ha of plantations installed since 2015 and still standing. The calculations will be reviewed in detail by the task team working with the PIU during the next ISR period to clarify underlying data and assumptions.

► New agroforestry plantations that received technical support from the project (Hectare(Ha), Custom)

	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	20,144.00	21,491.00	35,000.00

Date	30-Jun-2014	15-Dec-2021	31-Jan-2023	31-May-2024
Comments:	The 21,491 hectares represent the area of tree plantations (mainly acacia sp.) under various agroforestry schemes including Component 1: 8,395 ha including 4,070 ha under PIREDD Plateau and 4,325 ha under PIREDD Mai-Ndombe; Component 2: 5,493 ha and Component 3: 7,603 ha.			
► Participants in consultation activities during project implementation (number) (Number, Custom)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	177,525.00	256,236.00	90,000.00
Date	01-Jul-2014	15-Jun-2021	31-Jan-2023	31-May-2024
Comments:	The target of 70,000 consists of 30,000 for the parent project and 40,000 for CAF AF. 67,998 were consulted and participated in awareness activities under the parent project. As of June 2021, this is 109,527 for PIREDD Mai-Ndombe. The total is 177,525.			
□ Participants in consultation activities during project implementation - female (Number, Custom Breakdown)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	44,181.00	51,052.00	30,000.00
Date	01-Jul-2014	15-Jun-2021	31-Jan-2023	31-May-2024
► Farmers from the targeted villages who have adopted an improved agro-forestry technology promoted by the project (Number, Custom)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	26,083.00	26,083.00	36,875.00
Date	30-Jun-2014	15-Dec-2021	31-Jan-2023	31-May-2024
Comments:	Target is 20,000 under the parent project and 13,500 under CAFI AF. The final result for the parent project is 16,490. As of January 2023, this is 9,593 for PIREDD Mai-Ndombe..			
□ Farmers from the targeted villages who adopted an improved agro-forestry. technology promoted by project ? female (Number, Custom Breakdown)				
	Baseline	Actual (Previous)	Actual (Current)	End Target
Value	0.00	7,081.00	7,081.00	12,000.00
Date	30-Jun-2014	15-Dec-2021	31-Jan-2023	31-May-2024
