Shipbuilding and Industrial
Enterprises of Elefsina S.A.

We are all familiar with the problems that have been created in recent years at the Elefsina Shipyards, many of which touch the daily lives of employees in their workplace.

That is why the Municipality of Elefsina, guided by the health and safety of the employees, collects garbage in the area of the Elefsina Shipyards regularly.

Also in the previous period, our Municipality, with respect towards the employees of the Shipyards and acknowledging the already burdened situation they are experiencing, accepted the request of their Association, proceeding to disinfection in specific areas of the Shipyard.

All of the above is the minimum we could do to show to the 600 employees that we are on the side of theirs and their families, at the level we are given the opportunity.

Dear Sirs

As Mayor of Elefsina and before I was even elected, I followed with interest the issue of the Elefsina Shipyards, since over time the benefits to the local community, but mainly the livelihood provided to the residents of Elefsina, were particularly important.

Unfortunately, in recent years, we have all seen the consequences of the decline of the Shipyard, which has a direct impact on employees.

On July 1, 2020, I attended the ceremony held at the Elefsina Shipyard, a ceremony related to the official expression of interest of the company ONEX in conjunction with the DFC.

The ceremony was formalized with the presence of the Minister of Development Mr. Adonis Georgiadis and the Ambassador of the United States to Greece Mr. Jeffrey Payat who noted that "the Elefsina Shipyard can be the main Shipyard for the support of Greeks, Americans and international shipowners in Eastern Mediterranean "and that "Elefsina can once again become a world-class (shipbuilding) infrastructure".

As a Municipal Authority, our positions were, are and will be on the side of the employees, securing their positions and their accruals, something that Mr. Xenokostas confirmed in his public statement.

We hope that the suffering and anxiety of the employees will end as soon as possible, while we are sure that with this agreement, our Municipality can come out as a winner.

SUBJECT: "On the importance of the continuation of the operation of the Elefsina Shipyards – Investment / Consolidation by the company ONEX".

Watching with particular interest the issue of the Industrial Unit of the Shipyards in Elefsina, which employs hundreds of workers, we have unfortunately seen in recent years, the decline in every dimension, although we all know the significance of the real power of the Elefsina Shipyards.

However, it was with great pleasure that we attended the 01-07-2020 official expression of interest of the company ONEX in combination with the DFC. The statements of the US Ambassador to Greece, Jeffrey Payat, were extremely impressive, stating that "The vision of the ONEX, which my government shares, is to make Elefsina the main shipyard to support Greek, American and international shipowners in Eastern Mediterranean: With the investment of ONEX, Elefsina can once again build a world-class (shipbuilding) infrastructure, supporting the growing number of liquefied petroleum gas vessels, the 6th US Fleet, floating refueling units, offshore and other offshore platforms".

In the context of the mentioned prospects, the Attica Region - Regional Unit of West Attica, feels the need to welcome with a spirit of cooperation and special joy the upcoming investment by the company ONEX, which will add value to the region.
