

SOCIAL PARTICIPATION PROCESS REPORT

ENVIRONMENTAL IMPACT STUDY
AND ENVIRONMENTAL
MANAGEMENT PLAN

"CONSTRUCTION AND OPERATION
OF THE PUERTO BOLÍVAR PORT
TERMINAL OPERATED BY
YILPORTECU S.A."

MACHALA - EL ORO - ECUADOR

OCTOBER 2017

1. BACKGROUND INFORMATION

This report focuses on the results of the Social Participation Process of the following project: ***"ENVIRONMENTAL IMPACT STUDY AND ENVIRONMENTAL MANAGEMENT PLAN FOR THE CONSTRUCTION AND OPERATION OF THE PUERTO BOLÍVAR PORT TERMINAL OPERATED BY YILPORT TERMINAL OPERATIONS YILPORTECU S.A.,"*** carried out in October 2017.

For this purpose, the Environmental Management Secretariat of the Autonomous Provincial Government of El Oro, in its capacity as the Environmental Authority for Responsible Implementation, has defined the framework to lay out the procedures for the implementation of the project's Social Participation Mechanisms.

The Social Participation Mechanisms to be carried out were consolidated in the Coordination Minutes of the Social Participation Process (Annex 1) signed on October 5, 2017 by:

- Eng. Santiago Aguilar, YILPORTECU S.A. Project Director
- Soc. Hugo Espinoza, Social Technician of the Secretariat of Environmental Management of the Autonomous Provincial Government of El Oro
- Eng. Harry Veintimilla, Chairman of Ecosfera Cia. Ltda.

2.- GENERAL INFORMATION - TECHNICAL SPECIFICATIONS

PROJECT	"CONSTRUCTION AND OPERATION OF THE PUERTO BOLÍVAR PORT TERMINAL OPERATED BY YILPORTECU S.A."
PHASE	Construction and Operation
DEVELOPER NAME	YILPORT TERMINAL OPERATIONS (YILPORTECU) S.A.
LEGAL REPRESENTATIVE	Mr. Carlos Alberte Cruz Hernández
PROCESS	SOCIAL PARTICIPATION
PROJECT DESCRIPTION	<p>YILPORTECU is an experienced first- level multipurpose port operator; the company operates 20 ports and terminals around the world. YILPORTECU's Development Plan intends to transform Puerto Bolívar into a modern port facility, not only for current traffic, but also to incorporate new bulk and container traffic. For this, YILPORTECU will build a new network of port infrastructures and facilities, as well we the corresponding auxiliary services, such as a cold store and facilities for the reception, storage, and shipping of bulk cargo.</p> <p>The Puerto Bolívar Port Terminal caters to the import and export products by sea, with an installed capacity of 1,705,877 tons and 258,678 containers. The operations include docking, storage, equipment, and access to the port.</p>

DATE OF SOCIAL PARTICIPATION PROCESSES	Thursday, October 5 until Monday, October 23, 2017

3.- LEGAL ASPECTS SUPPORTING THE SOCIAL PARTICIPATION PROCESS

This Social Participation Process is based on the legal framework of the legal instruments described below:

3.1.- POLITICAL CONSTITUTION OF THE REPUBLIC OF ECUADOR. PUBLISHED IN OFFICIAL RECORD No. 448 OF MONDAY, OCTOBER 20, 2008

CHAPTER ONE: PRINCIPLES FOR THE ENFORCEMENT OF RIGHTS

- ❖ **Art. 10.-** Individuals, communities, peoples, nationalities, and groups are rights holders and will enjoy the rights guaranteed in the Constitution and in international instruments. Nature will be a subject to the rights recognized in the Constitution.

CHAPTER FOUR: RIGHTS OF COMMUNITIES, INDIVIDUALS, AND NATIONALITIES

- ❖ **Art. 57.-** Communes, communities, individuals, and indigenous nationalities are entitled to and guaranteed the following collective rights, in accordance with the Constitution and human rights pacts and agreements, declarations, and other relevant international instruments:
 - Paragraph 7: Prior, free, and informed consultation, within a reasonable period of time, pertaining to the prospecting, exploitation, and marketing plans and programs related to the non-renewable resources in their lands, and that may affect them environmentally or culturally; participate in the benefits reported by these projects and receive compensation for the social, cultural, and environmental damages caused. The consultation shall be carried out by the competent authorities in a mandatory and timely manner. In the absence of consent from the consulted community, the provision set forth in the Constitution and the Law shall prevail.

CHAPTER FIVE: RIGHTS OF PARTICIPATION

- ❖ **Art. 61.-** Ecuadorians are entitled the following rights: -

Paragraph 4: To be consulted

TITLE II: RIGHTS

CHAPTER TWO: THE RIGHT TO GOOD LIVING

Section Two: Healthy environment

- ❖ **Art. 14.-** The right of the population to live in a healthy and ecologically balanced environment is recognized, thereby guaranteeing sustainability and good living, *sumak kawsay*.

The preservation of the environment, the conservation of ecosystems, biodiversity and the integrity of the country's genetic heritage, the preservation of environmental damage, and the recovery of degraded natural spaces are declared of public interest.

3.2.- ENVIRONMENTAL MANAGEMENT LAW. LAW No. 37 of OFFICIAL RECORD No. 245 OF JULY 30, 1999

This Law establishes the principles and guidelines of environmental policy, and determines the obligations, responsibilities, and levels of participation of the public and private sectors in environmental management, and indicates the permissible limits, controls, and sanctions in this regard. The following articles are applied to this environmental study:

TITLE III: CHAPTER, "ON ENVIRONMENTAL IMPACT ASSESSMENT AND ENVIRONMENTAL CONTROL"

- ❖ **Art.19.-** Public, private, or mixed works, and public or private investment projects that may cause any impact shall be qualified prior

to execution by the decentralized control entities, in accordance with the Single Environmental Management System, whose guiding principle shall be precautionary.

- ❖ **Art.20.-** To start any activity involving environmental risk, the respective permit granted by the corresponding ministry shall be obtained.
- ❖ **Art.21.-** The environmental management systems shall include a baseline study, an environmental impact assessment, a risk assessment, management plans, risk management plans, a monitoring system, contingency and mitigation plans, environmental audits, and abandonment plans, once these requirements are completed, and in accordance with their qualification.
- ❖ **Art.23.-** The environmental impact assessment shall include the following aspects:
 - a) The estimated effects to the human population, biodiversity, soil, air, water, landscape, and the structure and function of the ecosystems present in the presumably affected area;
 - b) Public conditions such as: noise, vibrations, odors, light emissions, thermal changes, and any other environmental damage, and,
 - c) The impact that the project, work or activity will have on the elements that make up the historical, scenic, and cultural heritage.

3.3.- EXECUTIVE DECREE 1040 OF OFFICIAL RECORD 332 OF MAY 8, 2008

This regulation provides more participation to the general public to disseminate the activities that alter the surrounding environment in which they carry out their work, thereby guaranteeing their opinion in this regard, which is the foundation for the sovereignty

of the Ecuadorian State to guarantee life in a healthy environment that is ecologically balanced and free of contamination.

TITLE III: SOCIAL PARTICIPATION

- ❖ **Art.7.- Scope.-** Social participation takes place within the framework of the procedure regarding "Environmental Impact Assessment and Environmental Control" contained in Chapter II, Title III of the Environmental Management Law,
- ❖ **Art.8.- MECHANISMS.-** The citizen participation mechanisms in environmental management include the following, among others:
 - a) Hearings, assemblies, and public forums for dialogue;
 - b) Training, dissemination, education, and environmental socialization workshops
 - c) Dissemination and awareness campaigns over the media
 - d) All means that allow the community to access available information regarding activities, works, projects, and decisions that may affect the environment
 - e) Distribution of informative documentation about the project;
 - f) The other mechanisms established by the pertinent laws
- ❖ **Art.9.- SCOPE OF SOCIAL PARTICIPATION.-** Social participation is a cross-cutting and transcendental element of environmental management. They will therefore be mainly integrated during the phases of any proposed activity or project, especially those associated with the review and evaluation of environmental impacts.

The purpose of social participation in environmental management is to consider and incorporate the opinions and observations of citizens, especially the population directly affected by an activity or project, regarding the relevant environmental variables of the environmental impact studies of the environmental management plans, provided that they are technically and economically viable,

and that the activities or projects that may cause environmental impacts are adequately developed, minimizing and/or offsetting these impacts in order to improve the environmental conditions to carry out the activity or project in all its phases.

Social participation in environmental management is governed by the principles of legitimacy and representativeness, and it is defined as a tripartite effort between the following stakeholders:

- State institutions
- Citizens
- The developer interested in carrying out an activity or project

The information to be provided to the community in the area of influence, based on the socio-cultural characteristics, must adhere to the following criteria: simple and didactic language, complete and truthful information and, in the native language, if applicable; and ensure a proper level of participation.

❖ **Art. 10.- MOMENT OF SOCIAL PARTICIPATION.-** Social participation shall be of mandatory compliance for the pertinent Environmental Enforcement Authority, in coordination with the developer of the activity or project, prior to the approval of the environmental impact study.

❖ **Art. 13.- FINANCING.-** The cost of the Social Participation mechanisms shall be covered by the pertinent Environmental Enforcement Authority, which must approve the environmental impact study of the project or activity that may generate environmental impacts. Said costs shall be paid by the developer of the project or activity to the Environmental Enforcement Authority, in the manner provided in the Modernization Law.

- ❖ **Art. 15.- SUBJECTS OF SOCIAL PARTICIPATION.-** Without prejudice to the collective right that guarantees the intervention of every inhabitant in any social participation procedure, this shall be addressed, first and foremost, to the community within the area of direct influence of the activity or project that causes the environmental impact, which shall be previously delimited by the competent authority.
- ❖ **Art. 16.- MECHANISMS OF SOCIAL PARTICIPATION.-** The mechanisms of social participation contemplated in this Regulation must meet the following requirements:
- Disseminating information regarding the activity or project that generates the environmental impact
 - Collecting opinions
 - Systematizing the information obtained

3.4.- MINISTERIAL AGREEMENT 061. REFORM TO THE UNIFIED TEXT OF THE SECONDARY ENVIRONMENTAL LEGISLATION

ENVIRONMENTAL STUDIES

- ❖ **Art. 40 Resolution.-** The Competent Environmental Authority shall notify the the Resolution of the environmental permit to the subjects of control of the projects, works, or activities, clearly specifying the conditions that the project, work, or activity shall be subject to throughout all phases thereof, as well as the legal and regulatory powers for the operation of the project, work or activity: this shall also contain the following:
- a) The legal considerations for the pronouncement and approval of the environmental study;
 - b) The technical considerations supporting the Resolution;
 - c) The considerations for to the Social Participation Process, in accordance with applicable environmental regulations;

- d) The approval of the corresponding Environmental Studies, the granting of the environmental permit, and the conditions regarding the suspension and/or revocation of the environmental permit in the event of non-compliance;
- e) The obligations to be fulfilled throughout all phases of the project, work, or activity's life cycle.

CHAPTER V

SOCIAL PARTICIPATION

- ❖ **Art. 44 Social participation.-** This is governed by the principles of legitimacy and representativeness, and it is defined as an effort by State Institutions, citizens, and the subject of control interested in carrying out a project, work or activity.

The Competent Environmental Authority shall inform the population about the possible implementation of activities and/or projects, as well as the expected socio-environmental impacts and the relevance of the actions to be taken, in order to collect the opinions and observations that are technically and economically viable, and incorporate them into the Environmental Studies.

The social participation process is mandatory to obtain the environmental permit.

- ❖ **Art. 45 Participation mechanisms.-** These are the procedures applied by the Competent Environmental Authority to make Social Participation effective. In order to apply these mechanisms and systematize their results, the relevant provisions set forth in the Instructions or Instruments issued by the National Environmental Authority for this purpose shall be fulfilled.

The mechanisms of social participation shall be defined considering the level of impact generated by the project and the level of conflict identified; and, if necessary, greater spaces for participation shall be generated.

- ❖ **Art. 46 Moments of participation.-** Social Participation shall take place during the review of the environmental study, in accordance with the procedure established in the regulations issued for this purpose, and it shall be carried out in a mandatory manner by the Competent Environmental Authority, in coordination with the activity or project developer, addressing the particularities of each case.

3.5.- MINISTERIAL AGREEMENT 103. INSTRUCTIONS FOR REGULATING THE IMPLEMENTATION OF SOCIAL PARTICIPATION MECHANISMS

CHAPTER I: DEFINITION AND SCOPE OF APPLICATION OF THE SOCIAL PARTICIPATION PROCESS (PPS)

- ❖ **Article 1.-** The Social Participation Process is understood to be the actions by which the Competent Environmental Authority shall inform the population about the possible implementation of projects, works, or activities, as well as the expected socio-environmental impacts and the relevance of the actions to be taken, with the purpose of collecting their opinions and observations and incorporating the ones that are technically and economically viable into the Environmental Studies.
- ❖ **Article 2.-** The Social Participation Process (PPS) shall be of mandatory compliance for all projects, works, or activities that require an Environmental Study for regularization purposes. The National Environmental Authority, using the Single Environmental Information System, shall determine the Social Participation procedure to be applied, which may be determined with or without a Socio-Environmental Facilitator according to the level of impact of the project, work, or activity.

- ❖ **Article 3.-** The National Environmental Authority shall be in charge of the institutional control and administration of the Social Participation Processes (PPS) in the projects or activities that it participates in as a competent authority. The Responsible Environmental Enforcement Authorities, if any, shall be in charge of applying these instructions. In both cases, the Environmental Study shall be published in the Single Environmental Information System, which shall also record the observations made by the general public.
- ❖ **Article 4.-** Without prejudice to other mechanisms set forth in the Constitution of the Republic of Ecuador and in the Law, for the proper implementation of this instrument, the following mechanisms and definitions shall be taken into account:
1. **Public Presentation Assembly (APP, by its Spanish acronym):**
Main step of the Social Participation Process summoning all stakeholders related to the project to present the Environmental Impact Study and the Environmental Management Plan of the project, work, or activity in a didactic way and adapted to local socio-cultural conditions. The assembly creates a space for dialogue in order to respond to concerns about the project and collect the observations, opinions, and recommendations of the participants.
 2. **Informational Meetings (RI, by its Spanish acronym):** The developer shall report on the main characteristics of the project during the RI's, as well as its foreseeable environmental impacts and the respective mitigation measures, in order to clarify questions and concerns about the project and collect observations and opinions from the participants.
 3. **Public Information Centers (CIP, by its Spanish acronym):** The Environmental Impact Study and the Environmental Management Plan, as well as didactic and visual documentation, shall be made available to the general public at an easily accessible location;

appropriate personnel acquainted with the project, work, or activity must be present in order to explain the contents thereof. The Information Centers may be fixed or itinerant.

4. **Web page:** All interested parties can access information on the project, work or activity online by using this mechanism. The webpage address must be widely publicized.
5. **Social Participation Procedure:** Using the Single Environmental Information System (SUIA), The National Environmental Authority shall determine the procedure to be applied according to the level of impact that the project, work or activity may generate.
6. **Participatory workshops:** To complement and reinforce the effect of the RIs, workshops may be held for the developer to identify perceptions and local development plans to insert their proposed mitigation and/or compensation measures in their Environmental Management Plan, according to the reality of the environment of the proposed activity, work, or project.
7. **Socio-environmental facilitator.-** Independent professional, without any employment relationship with a public or private institution, qualified by Ministry of the Environment and registered for the organization, coordination, and implementation of the Social Participation Processes; the management of discussion groups and the systematization, analysis, and interpretation of social dialogue processes between different stakeholders: companies, local governments, the State, the civil society.
8. **Direct Area of Social Influence:** Space arising from the direct interactions of one or more elements of the project, work, or activity, with one or more elements of the social context where it will be implemented. The direct relationship between the project, work, or activity and the social environment takes place in at least two levels of social integration: individual units (farms, homes, properties, and their corresponding

owners), and first and second tier social organizations (communes, enclosures, neighborhoods, associations of organizations and communities). In the event that the final location of the elements and/or activities of the project are subject to factors external to those considered in the Study, or other subsequent technical and/or environmental aspects, duly applicable substantiated justifications shall be submitted for evaluation and validation by the Competent Environmental Authority; for this, the area of direct influence shall be determined at least by first and second tier social organizations

9. **Direct Area of Social Influence:** Socio-institutional space arising from the relationship of the project with the political-territorial units where the project, work, or activity takes place: parish, canton and/or province. The reason for the relationship is the role of the project, work, or activity in the planning of the local territory. Although this is based on the political-administrative location of the project, work, or activity, there may be other territorial units that are relevant for the socio-environmental management of the project, such as indigenous territorial districts, protected areas, commonwealths.

CHAPTER III: SOCIAL PARTICIPATION PROCESS WITHOUT A SOCIO-ENVIRONMENTAL FACILITATOR

- ❖ **Article 27.-** The social participation process without a socio-environmental facilitator shall be carried out by publishing the Environmental Study on the Single Environmental Information System's webpage; if there is a web portal, it must also be published online on the Bidder's page. Citizen observations, comments, and recommendations shall be collected on the SUIA page, which shall be incorporated into the Environmental Studies if they are technically and economically viable. The Bidder

shall upload the Environmental Study of the project, work, or activity on the SUIA page, with all corresponding annexes, the executive summary describing the main characteristics of the project, work or activity using an understandable and simple language, as well as its impacts and the proposed Environmental Management Plan.

❖ **Article 28.-** Once the Environmental Study, its annexes, and the online executive summary have been published, the Bidder of the project, work, or activity shall inform this to the population using the following outlets:

1. Publication in a mass media outlet with coverage in the areas of influence of the project, work, or activity (press, radio, or television).
2. Informative posters in the place of implementation of the project, work, or activity, on the billboards of the sectional governments, and in the places of highest traffic in the communities involved.
3. Written notifications addressed to the subjects of social participation indicated in the regulation for the Implementation of the Social Participation mechanisms set forth in the Environmental Management Law, attaching the executive summary of the Environmental Study, and in compliance with the principles of legitimacy and representativeness. The following shall be taken into account to issue said notifications:
 - a) Central Government and Sectional Government Authorities related to the project, work, or activity;
 - b) Members of community, indigenous, Afro-Ecuadorian, and gender organizations that are legally in existence and are duly represented; and,
 - c) People living in the area of direct influence of the project, work, or activity that may cause an environmental impact.

The notification shall include an extract of the project, work, or activity, and the webpage address where the Environmental Study and the executive summary will be published.

The Bidder shall submit the means of verification of this announcement for review by the competent Environmental Authority, who shall confirm that it has been carried out in accordance with the provisions of this Instruction. The Environmental Study shall be published 7 days from the date of notification to the social stakeholders of the project, work, or activity, during which the observations, comments, and recommendations of the general public will be collected online.

- ❖ **Article 29.-** The competent Environmental Authority, considering the level of impact of the project, work, or activity, may additionally require the Bidder, through the SUIA, to carry out an Informative Meeting in the area of influence of the project, which shall be held under the supervision of the Competent Environmental Authority. The social stakeholders related to the project, work, or activity shall be summoned to the meeting in accordance with the provisions of Art. 29 of this instrument. The place and date of the Informative Meeting shall be included as indicated in the aforementioned article.

The developer of the project, work, or activity must submit a report of the Informative Meeting to the competent Environmental Authority, including the questions and answers, and the systematization of the community's observations, comments, and suggestions, as well as all supporting documentation to verify compliance with this social participation mechanism: meeting minutes, attendance records, photographic evidence, among others.

- ❖ **Article 30.-** During the review of the Environmental Study, the competent Environmental Authority, shall ensure that the criteria, observations, and recommendations that are technically and economically viable are considered by the developer of the project, work, or activity, and included in the Environmental Study with its corresponding technical support.

4.- SOCIAL PARTICIPATION PROCESS METHODOLOGY

To execute this Participation Process, a previous meeting was held with the Environmental Authority (Secretariat of Environmental Management of the Autonomous Provincial Government of El Oro), the project developer (YILPORTECU SA), and Environmental Consultant Ecosfera Cia. Ltda.

Coordination Minutes were signed at the meeting held on Thursday, October 5, 2017, proposing the following mechanisms to be applied:

4.1.- PUBLICATION ON THE WEBPAGE

The Draft Environmental Impact Study of the ***"ENVIRONMENTAL IMPACT STUDY AND ENVIRONMENTAL MANAGEMENT PLAN FOR THE CONSTRUCTION AND OPERATION OF THE PUERTO BOLÍVAR PORT TERMINAL OPERATED BY YILPORT TERMINAL OPERATIONS YILPORTECU SA"*** is to be published on the following webpages from October 13, 2017 to October 21, 2017:

- Autonomous Provincial Government of El Oro (<http://eloro.gob.ec>)
- Developer Company, YILPORTECU S.A. (<http://www.yilport.com>)
- Consultancy Company, Ecosfera Cia. Ltda. (<http://www.ecosferaconsultora.com>)

(Annex 2)

4.2.- BROADCASTING IN ORAL PRESS

The Announcement was broadcasted on Radio Gaviota 105.1 FM in the city of Machala on Friday, October 13 and Saturday, October 14, 2017.

(Annex 3)

4.2.- PUBLICATION IN WRITTEN PRESS

Newspaper La Opinion of the city of Machala was selected as the written press to disseminate the Announcement for the Social Participation Process, published on:

- Friday, October 13, 2017
- Saturday, October 14, 2017

(Annex 4)

5.- OBSERVATIONS COLLECTED ON THE WEB PAGES

No comments or observations were recorded on the web pages during the time assigned for this purpose, from October 13 to October 21, 2017.

(Annex 5)

6.- CONCLUSIONS AND RECOMMENDATIONS

The Social Participation Process was carried out jointly with the Secretariat of Environmental Management of the Autonomous Provincial Government of El Oro, represented by sociologist Hugo Espinoza, the Project Developer YILPORTECU S.A., represented by Eng. Santiago Aguilar, and the consultancy company Ecosfera Cía. Ltda., represented by Eng. Harry Veintimilla.

All activities carried out in the Social Participation Process were executed as established by the Environmental Regulations and the respective Ministerial Agreements.

The Project Developer shall fully adhere to the Environmental Management Plan to avoid environmental impacts, and comply with current Environmental Regulations.

ANNEXES

- ❖ **ANNEX 1:** Coordination Minutes of the Social Participation Process

- ❖ **ANNEX 2:** Proof of publication of the Environmental Impact Study and the Environmental Management Plan on the indicated web pages

- ❖ **ANNEX 3:** Publication invoice of the announcement broadcasted on Radio Gaviota

- ❖ **ANNEX 4:** Publication Invoice of the announcement printed in La Opinion Newspaper and clippings of said publications

- ❖ **ANNEX 5:** Record of Observations received via email and the webpage

El Oro, vuelve a brillar!

los registros mundiales, unieron los científicos de la NASA.

caros el jueves en la revista Science. Esa alza de 3.000 millones tes por millón. (I).

CONVOCATORIA

El Gobierno Provincial Autónomo de El Oro como Autoridad Ambiental Competente y la empresa YILPORT TERMINAL OPERATIONS (YILPORTECU) S.A. como Proponente del Proyecto, en cumplimiento del Reglamento de Aplicación de los Mecanismos de Participación Social establecidos en la Ley de Gestión Ambiental en su Art. 28, Decreto Ejecutivo 1040, y Acuerdo Ministerial N° 103, invitan al público en general y en especial a las Autoridades del Cantón Machala y moradores adyacentes a la Parroquia Puerto Bolívar, cantón Machala, provincia de El Oro, a participar en el:

PROCESO DE PARTICIPACIÓN SOCIAL DEL BORRADOR DEL
"ESTUDIO DE IMPACTO AMBIENTAL DE LA CONSTRUCCIÓN Y OPERACIÓN DEL
TERMINAL PORTUARIO DE PUERTO BOLÍVAR OPERADO POR YILPORT TERMINAL
OPERATIONS (YILPORTECU) S.A."
CÓDIGO MAE-RA-2017-309603.

Extracto del Proyecto

YILPORTECU es un especializado Operador Portuario en puertos multipropósito, que opera 20 puertos y terminales alrededor del mundo. A través de un Acuerdo de Asociación Público-Privada con la Autoridad Portuaria de Puerto Bolívar (APPB), se encuentra desarrollando un programa de Modernización de la Infraestructura y las Facilidades de Puerto Bolívar.

Este programa incluye la Construcción y Operación de Puerto Bolívar, para lo cual YILPORTECU construirá un nuevo Muelle #6, Pátios para Contenedores, facilidades y equipos para la manipulación de diferentes tipos de carga, así como las redes y servicios auxiliares.

Para ello, ha preparado un Estudio de Impacto Ambiental objeto de esta convocatoria, que se encuentra publicado en la página web del Gobierno Provincial Autónomo de El Oro y en la página web de YILPORT.

Publicación en página web y recepción de observaciones

El Borrador del Estudio de Impacto Ambiental estará disponible en las siguientes páginas web:

- Gobierno Provincial Autónomo de El Oro

- YILPORTECU

www.eloro.gub.ve

www.yilport.com

Fecha: a partir del 13 de Octubre de 2017 al 23 de Octubre de 2017.

Los comentarios y observaciones se recibirán en las páginas web hasta el día 23 de Octubre de 2017.

Agradecemos su participación
