## **Brazilian Nickel**

Potential Sponsor / January 2022

## 1. Context

In May 2022, TechMet's Head of ESG conducted a monitoring visit to Brazilian Nickel. This visit aimed to ascertain the company's alignment with the IFC Performance Standards. The below Environmental and Social Action plan has been developed to record current ESG performance at the company and to detail the schedule of work that will need to be completed at the company moves towards construction of the full scale- project and aims to meet Good International Industry Practice.

Action items within the plan have been assigned by priority. 1 being highest priority and 5 being least.

Potential Sponsor / January 2022

| Ref<br># | Standard(<br>s) | Issue and Current Status   | Action/ Requirement   | Prioritisa<br>tion | Timeline  | Resources require/<br>budget | Statu<br>s          |
|----------|-----------------|--|---|--------------------|---|------------------------------|---------------------|
| ESG      | Commitmen       | nts / Policies and Capacity  |   |                    |   |                              |                     |
|          | IFC PS 1        | Environmental and Social Policy Statement (s) cover  E&S matters H&S HR including zero tolerance for discrimination Security and human rights AML D&I Bribery and anti corruption.  Statements should be adopted formally (some on website haven't been formally approved or are in final draft stage.) Policies are available publicly on BRN website.  | There is need to ensure that all PNM policies and BRN policies correspond with one another and are in alignment.  All policies need to be reviewed by management on an annual basis.  Policies on website should be reviewed annually, uploaded in their final version and the ones that are not currently approved need to be done so. Name of chairman in some policies also need updating. | 5                  | Annual/<br>rolling                                | 5 hours                      | Open                |
|          | IFC PS 1        | Organisation cap & comp roles and responsibilities for ESG (including HR) are identified and defined, and a training programme on material matters is implemented for workers and management, alongside a well-developed training and competencies matrix.  Personnel managing E&S have the knowledge, skills and necessary experience to manage E&S risks and implement the ESMS.  Job descriptions and organisational charts are readily available, and all staff understand their roles and responsibilities. | Continue training and induction programme with all new staff and provide refresher training for all current staff.  There may be the need to build out the ESG function at BRN as the projects expands and this should be determined prior to construction of the full-scale project  | N/A<br>5           | As constrcution for full-scale project commences. | N/A TBD                      | Ongoi<br>ng<br>Open |

|-----------------------|---|---|--------------------|-------------------|------------------------------|------------|
| IFC PS 5              | It is understood that there will not be any physical resettlement as part of project development.  However, the company is planning to rent and buy land from local landowners on a 'willing buyer, willing seller' basis, which does present some risk.  | Should any resettlement issues be identified this would need to be agreed with TechMet and comply with national law and PS5. Prior to land acquisition the company will need to undertake a socio-economic baseline survey. This will identity any vulnerable (single headed, female headed, widowed or disabled) landowners/ households and be used as baseline for ongoing monitoring and any required livelihood restoration. Regardless of land acquisition being voluntary, the company should aim to conduct land acquisition and any resettlement (economic or physical)within the spirit of PS5. (i.e., in kind compensation, monitoring and livelihood restoration programmes.) The work should be overseen by a suitably qualified and experienced external specialist. | 1                  | End of Q4<br>2022 | <\$100,000                   | Open       |
| IFC PS 5              | Confirmation that there has not been any previous resettlement undertaken by any previous lease holder or company.  | No action needed.   |                    |                   |                              |            |
| PS 6 Biodiversity     | y Conservation and Sustainable Management of Living Na  | atural Resources  |                    | 1                 |                              |            |
| IFC PS 6              | ESIA contained a Biodiversity impact assessment. The Project area will intercept 132 ha of permanent protected areas (PPA) covered by caatinga in different stages of regeneration and conservation. The project has the required license to intersect this protected area and the project meets all of its license conditions. | Develop Bio- diversity management plan to sustainably conserve biodiversity in the project area.  | 2                  | End of Q4<br>2022 | <\$10000                     | Open       |
