

## Technical Assistance Summary for Public Disclosure

Project Name	Kohima Town Water Supply Augmentation Project
Country	The Republic of India
Type	Technical Assistance
Area of Operation	Water & Sanitation
TA Approval Date	16 August 2023
Limit of NDB Financing	USD 252,300
Recipient	The Republic of India
Project Entity	The Government of Nagaland
Project Context	<p>The existing water supply system in Kohima town is proposed to be upgraded to meet the present-day drinking water requirements. The key issues affecting water supply in Kohima town are inadequate infrastructure for water treatment and distribution, bacterial contamination of raw water sources, and high levels of water leakages.</p> <p>The Project's implementation will significantly improve the health and sanitary conditions, enabling an improvement in the quality of wellbeing of residents of Kohima town.</p>
Project Description	The Project comprises of drinking water supply infrastructure, water source development, intake works, gravity transmission mains, water treatment plant, balancing reservoirs, overhead tanks, distribution network and other allied works.
TA Objective	The TA is designed to support the preparation of Detailed Project Report which would enable feasibility assessment and prepare the Project up to the stage when it can be considered by external financiers to seek approval for its financing.
