Project Description

According to ADB website, ADB is helping Uzbekistan upgrade the Takhiatash thermal power plant to meet rising electricity demand in the western part of the country. The project will involve building two combined-cycle gas turbine units, decommissioning old and inefficient power generation units, improving energy efficiency, and increasing power supply to the Karakalpakstan and Khorezm regions.

The project, to be implemented in the Takhiatash thermal power plant (TPP), involves building two combined-cycle gas turbine (CCGT) units, decommissioning old and inefficient power generation units, improving energy efficiency, and increasing power supply to the Karakalpakstan and Khorezm regions. It includes a capacity development component to improve corporate performance and a social development component to foster gender equality.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
