Gansu Baiyin Integrated Urban Development Project

Early Warning System

Gansu Baiyin Integrated Urban Development Project

ADB-46062-002

Quick Facts

Countries	China
Specific Location	Baiyin City, Gansu Province
Financial Institutions	Asian Development Bank (ADB)
Status	Approved
Bank Risk Rating	A
Voting Date	2014-11-28
Borrower	People's Republic of China, Baiyin Municipal Government
Sectors	Education and Health, Transport, Water and Sanitation
Investment Type(s)	Loan
Loan Amount (USD)	$ 100.00 million
Project Cost (USD)	$ 212.70 million

Project Description

According to ADB website, Baiyin is a medium-sized city in Gansu province, one of the 12 less-developed provinces and autonomous regions targeted under the Western Development Strategy of the People's Republic of China. The city was originally established as a national copper mining base in the 1950s but its socioeconomic development suffered major setbacks after continuous copper exploitation and depletion, and environmental degradation. Since the Eleventh Five-Year Plan 2006-2010, Baiyin received special support from the national and provincial governments to jumpstart its industrial transformation. The goal was to transform Baiyin from a resource-exhausted mining city into a new industrial center through technology upgrading and diversification of existing production chains, while achieving efficient use of resources and reducing adverse impacts on the environment. In 2008, the Gansu Baiyin Urban Development Project (Phase I project) was approved by ADB, providing timely assistance on urban road construction and district heating supply to support the initial stage of economic diversification in two urban centers Baiyin district and Pingchuan district.

The project will further scale up the outcome of the Phase I project by accelerating environment-friendly and human-centered industrial transformation in eastern Baiyin urban area. The impact of the project will be inclusive and environmentally sustainable urban development in Baiyin.

Investment Description

- Asian Development Bank (ADB)

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
