Project Description

According to the bank document, the Technical Assistance (TA) subproject will provide support to the drafting of the RPJMN20 and link it to the objectives and guiding principles of the National Energy Policy, the General Energy Plan, the General Electricity Development Plan, and other energy-related government plans and hence coordinate with the Ministry of Energy and Mineral Resources, the National Energy Council (DEN), and the State Electricity Corporation (PLN).

The TA subproject will contribute to ADB's new country partnership strategy 2020 -2024. Key focus areas will be the electricity sector, with increased focus on renewable energy, sustainable energy pricing and supply cost, and the identification of financial mechanisms to support renewable energy development.

The TA subproject will highlight the opportunities from energy efficiency measures and identify technological and regulatory innovation, for example for the newly identified Special Economic Zones, to help the government address the energy trilemma of security, sustainability and affordability. The TA subproject will support the government in reviewing its results indicators under the RPJMN20 to better assess achievements towards inclusive and sustainable growth under its energy targets.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
