Project Description

According to the bank document, the subproject will enable smooth and timely implementation of the ESP by providing significant resourcing, capacity building, information technology equipmen, and project management tools to the PCO. With coordination with PCO, the subproject will also support other technical assistance and activities identified by PMOs and PIUs, which are not covered under the ESP, such as sector-specific oversight experts (e.g. sewerage, dam, value engineering), and capacity building for new engineering technology (e.g. value engineering road program, new sewerage treatment plan, long-segment road preservation, sustainable water resources management).

The subproject is consistent with the Indonesia Country Partnership Strategy 2016-2019 priority of improved infrastructure service, through the ESP. The proposed subproject will support the SGO and PCO to:

(i) strengthen the ESP implementation arrangements by coordinating, analyzing, presenting, monitoring, reporting, facilitating, and capacity building; and

(ii) supporting the project management offices (PMOs) and project implementation units (PIUs) in each DG in preparing and implementing the IDC panel arrangements, while ensuring overall compliance with ADB's Guidelines on the Use of Consultants and other fiduciary arrangements detailed in the Project Administration Manual (PAM).

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
