Project Description

According to bank's document, the project will improve the quality and reliability of electricity service of Nauru Utilities Corporation (NUC), Nauru’s sole electricity utility, to its customers. This will be achieved through the delivery and installation of new diesel-fired generation to provide reliable base-load power for NUC, allowing NUC to retire older generation assets and perform scheduled refurbishment of existing units to extend their service lives. The project will also repair the roof of the existing structure housing NUC’s generators to shield them from the elements and provide a safer working environment for NUC employees. The project's impact will be improved power service for NUC customers.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
