Project Description

This project provides technical assistance to prepare adaptation guidelines to advance the issue of climate change into the mainstream policy of coastal protection and management. This assistance complements the Asian Development Bank's MFF Sustainable Coastal Protection and Investment Management Program and will ensure greater consideration of climate change impacts in the planning and design stages of the rest of the project. This project analyzes existing sources of climate change-related impacts and drafts guidelines for adaptation applicable to the local geography. It also increases the scale of climate change adaptation in government institutions and provides awareness materials and training in the guidelines' application.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
