Building Resilience to Climate Change in Papua New Guinea

Early Warning System

Building Resilience to Climate Change in Papua New Guinea

ADB-46495-002

Quick Facts

Countries	Papua New Guinea
Financial Institutions	Asian Development Bank (ADB)
Status	Approved
Bank Risk Rating	B
Voting Date	2015-10-21
Borrower	Independent Stata of Papua New Guinea, Office of Climate Change and Development
Sectors	Law and Government
Investment Type(s)	Grant
Grant Amount (USD)	$ 24.25 million

Project Description

The ADB is helping Papua New Guinea improve its capacity to assess and incorporate climate change risks in its development investment program. The project is supporting climate risk and resilience planning and vulnerability assessments for at-risk islands and atolls, as well as sustainable fishing activities and food security investments.

The proposed Building Resilience to Climate Change in Papua New Guinea (formerly Strategic Program for Climate Resilience Implementation Project for Papua New Guinea (PNG) (the Project)) aims to make PNG's development investments climate resilient and support the country's transition to _climate compatible development,' as outlined in its national medium- and long-term development strategies. The project impact is increased resilience to the impacts of climate variability and climate change.

Investment Description

- Asian Development Bank (ADB)

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
