Project Description

According to ADB website, the Project Preparation Technical Assistance (PPTA) for $500,000 will enable preparation of a $17 million grant project aimed at reducing emissions from deforestation and forest degradation (REDD+) in West Kalimantan, one of the top five provinces contributing to greenhouse gas (GHG) emissions in Indonesia with a mean deforestation rate of 132,500 ha per year. The project will address drivers of forest loss, such as commercial and illegal logging, forest conversion to agriculture, mining and uncontrolled fires, by (i) implementing community-focused REDD+ pilots, (ii) strengthening forest management units (FMUs) in the province through enhancing capacity for spatial planning and livelihood support, and (iii) harmonizing provincial and national policies for forest carbon stock improvement.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
