Project Description

According to the bank document, the proposed project aims to rehabilitate the barrage structure including civil, mechanical and electric works in order to improve the capacity and modernization of gates. The project design is at final stage and the key improvement works include the following:

- Lowering of subsidiary weir by 1-ft to enhance the discharge capacity of existing barrage. i.e. from 311,000 cusecs to 332,000 cusecs (100-year return period discharge).
- Structural rehabilitation / upgrading of existing component of the barrage i.e. concrete overlay on U/s & D/s floors of barrage and subsidiary weir.
- Rehabilitation / replacement of gates and provision of motorized control of gates
- Rehabilitation of left and right guide banks.

Investment Description

- Asian Development Bank (ADB)

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
