Project Description

According to the bank website, "technical and capacity constraints in Afghanistan have inhibited electrification rate at 32%, which is among the lowest 5% globally. 20 out of 34 provinces are not connected to grid supply which increases cost of doing business, deteriorates environment, and subdues sustainable development indicators. This constrains growth; creates disparities; and fuels ethnic and regional tensions, insecurity, and discontent. The proposed tranche will extend the national grid into eastern provinces with a population of nearly 2 million, and will allow evacuation of indigenous generation and extension of power interconnection towards Pakistan. The Tranche 4 will construct a 220-kilovolt (kV) transmission line between Kabul and Jalalabad. An additional transformer of 200 MVA (megavolt ampheres) will be installed at this substation."

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
