Project Description

According to ADB website, the TA will help align Government of Indonesia and Asian Development Bank (ADB) systems—social and environmental safeguards, procurement, and project preparation and start-up—to improve project performance. The TA is innovative in its approach to improve project performance through (i) promoting the use of CSS for the first time with an ADB developing member country, (ii) initiating the use of the new risk based approach to adopt country procurement systems, and (iii) improving alignment between ADB and government business processes for project preparation and start up.

The impact will be greater efficiency and effectiveness in preparing and implementing ADB-financed infrastructure projects in Indonesia. The outcome will be increased alignment of ADB and government systems and procedures to prepare and implement projects.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
