Project Description

According to ADB website, the ADB is helping the Solomon Islands respond to heavy rains and flooding associated with Tropical Cyclone Ita, which did extensive damage when it struck in April 2014. The project is providing medical kits, food and drinking water, and personal hygiene kits to people affected by the storm. The project is also supporting the removal of debris, the disposal of rubble, and the restoration communication services and roads.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
