### Project Description

According to ADB website, the knowledge and support technical assistance (TA) to Bangladesh's energy agencies will help strengthen their planning and technical skills in preparing a renewable energy investment plan that complements both the government's climate change commitments and energy sector interventions by the Asian Development Bank (ADB). The TA will eventually contribute to:

- (i) improving the country's fuel mix
- (ii) creating jobs, supporting inclusive growth and poverty reduction
- (iii) mitigating environmental degradation and climate change vulnerabilities; and
- (iv) strengthening the capacity of Bangladesh's energy agencies and other stakeholders to plan and implement large-scale grid-connected renewable energy projects.

## ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
