Building Climate Change Resilience in Asia's Critical Infrastructure

Early Warning System

Building Climate Change Resilience in Asia's Critical Infrastructure

ADB-49158-001

Quick Facts

Financial Institutions	Asian Development Bank (ADB)
Status	Active
Bank Risk Rating	B
Voting Date	2016-10-19
Borrower	Regional
Sectors	Climate and Environment, Water and Sanitation
Investment Type(s)	Advisory Services
Investment Amount (USD)	$ 1.50 million

Project Description

According to ADB website, this proposed technical assistance aims to increase knowledge, promote innovation and good practice, and identify priorities for scaling up climate resilient investments in the Asia and Pacific region. The TA will improve understanding of climate risks and identify investment priorities to increase resilience to climate variability and change of existing and planned critical infrastructure in the region. It will cover developing member countries in South and Southeast Asia, and will assess vulnerabilities of infrastructure in the transport, energy and water sectors in the rural and urban context. Furthermore, the TA will also assess technology, policy and knowledge solutions that will increase resilience of infrastructure investments, including engineering measures, ecosystem based adaptation, financial delivery mechanism, insurance and risk transfer mechanisms.

Investment Description

- Asian Development Bank (ADB)

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
