Project Description

A project preparatory technical assistance (PPTA) is required to finalize due diligence on technical and safeguard aspects of the project and to provide procurement-related support to the executing agency. A feasibility study for the pilot was prepared under TA 8407-INO: Planning a Pilot Carbon Capture and Storage Activity, which includes a detailed technical analysis and site suitability assessment, cost estimates and financial analysis, and a risk analysis. A draft initial environmental examination was also prepared in conjunction with the development of the feasibility study. Additional safeguards, procurement, and technical due diligence is being supported under TA 8714-REG: Promoting Carbon Capture and Storage in the People's Republic of China and Indonesia and a direct charge facility provided by the Carbon Capture and Storage Fund.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
