Sectors Energy

Investment Type(s) Advisory Services
Investment Amount (USD) \$ 2.10 million
Project Cost (USD) \$ 2.20 million

ADB-49208-001

Integrated Resource Planning with Strategic Environmental Assessment for Sustainable Power

Project Description

According to the bank document, based on the recommendations and lesson learned of previous RETAs, the proposed RETA is designed to:

- (i) enhance the GMS countries' capacity in applying IRP with SEA in their PDPs;
- (ii) improve regulations, policies, programs and/or targets for RE and EE as necessary and as validated through the IRP; and
- (iii) support the cross-border interconnections as necessary and as validated through the IRP.

The RETA will particularly focus on Viet Nam as the country has greater potential for mitigating climate change impacts. The RETA outputs will be also disseminated through RPTCC meetings, which are organized twice a year. The TA activities will be closely coordinated with the GMS Environment Operations Center (EOC)'s Core Environment Program (CEP), which has provided assistance on the SEA for power development planning in Viet Nam.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more abo

ut the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
