Project Description

The Government of Mongolia requested technical assistance (TA) from the Asian Development Bank (ADB) for Supporting Financial Sector Development and Stability. ADB held a fact-finding mission in February 2016 to reach an understanding with the government as to the project's impact, outcome, outputs, implementation and financing arrangements, costs, and terms of reference for consultants. The design and monitoring framework is in Appendix 1. The TA is included in ADB's country operations business plan, 2016 for Mongolia.

The TA's five outputs will be (i) strengthening the government's financial stability framework, (ii) enhancing the financial consumer protection framework, (iii) promoting the sound and sustainable development of SCCs, (iv) identifying an effective NPL resolution mechanism, and (v) improving the disaster risk insurance sector's risk management capacity. ADB has previously supported building a resilient financial system and strengthening financial regulatory regimes through policy recommendations and capacity development. The proposed project would reinforce ADB's efforts to promote sound financial sector development, and the TA is consistent with ADB's country partnership strategy for Mongolia, 2012–2016 and interim country partnership strategy, 2014–2016.
