| **Investment Type(s)** | Advisory Services |
| **Investment Amount (USD)** | $ 2.00 million |

## Project Description

According to ADB website, the TA aims to increase investments in farming and agri-logistics through increased knowledge of governments and ADB in identifying appropriate potential agriculture and natural resource investments. The TA is expected to deliver three key outputs: overall agricultural investment requirement and prioritized areas for investment identified in developing member countries; climate-resilient agricultural technology promoted and disseminated in selected developing member countries; and knowledge on customized wholesale markets improved. The activities and deliverables in support of these outputs are intended to address the lack of accurate data on investments in the agriculture and natural resources sector in the region, limited knowledge and information on existing and successful climate-smart technologies, and lack of information on wholesale markets models that could be effective in ADB's developing member countries.

**Investment Description**

- Asian Development Bank (ADB)

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
