<b>Project Cost (USD)</b>	\$ 1.50 million

---

## Project Description

This technical assistance project establishes an electricity tariff mechanism, along with supporting policies, rules and regulations in the power sector. Components include: a) designing a new tariff structure for power generation, transmission and distribution; b) developing a financial recovery road map for gradual increase in tariffs; c) calculating the real cost of electricity supply; and d) mounting a campaign to inform the public on tariff reform, case studies of good practices, and institutional strengthening.

**ACCOUNTABILITY MECHANISM OF ADB**

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at:

<http://www.adb.org/site/accountability-mechanism/main>
