## Project Description

According to ADB website, the proposed TA will further enhance awareness of the benefits of trade facilitation among all stakeholders, provide a platform to share trade facilitation practices and knowledge among countries, improve capacities to introduce and implement trade policy reforms through the conduct of forums and meetings and training provision, and improve understanding and monitoring of trade facilitation by the conduct of a research study. It will build on past and present ADB interventions on trade facilitation by choosing topics and areas of study where additional work is needed such as looking at areas where trade facilitation can contribute to attaining sustainable development goals, studying previously employed methodologies and assessing their suitability, constructing a trade facilitation index for better monitoring, and assessing the impact on FDI, poverty reduction, and economic growth.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
