Project Description

According to the bank website, "the Project will provide financial and technical support to the National Disaster Risk Management Fund (NDRMF), which is being established as a government-owned non-bank financial intermediary with a corporate structure. The NDRMF will reduce the socio-economic and fiscal vulnerability of the country and its population to natural hazards by prioritizing and financing investments in disaster risk reduction and preparedness that have high economic benefits, taking into account climate change, as well as disaster risks and their impacts.

The government will pass on ADB loan funds to the NDRMF as a grant, for on-granting by NDRMF to eligible implementing partners. The NDRMF will finance up to 70% of the cost of eligible subprojects that will enhance Pakistan's resilience to extreme weather events and other natural hazards. The NDRMF will also enter into insurance arrangements to develop markets for the transfer of residual risks that cannot be mitigated."

Early Warning System Project Analysis

As stated by the ADB, the project will not finance any category A subprojects. No significant adverse environmental impacts are anticipated, as most civil works will involve retrofitting or rehabilitating existing facilities. Negative impacts during construction will likely be short term, site-specific, and mitigable. An ESMS document has been prepared. The project may finance subprojects classified as category B in line with the requirements set out in the draft ESMS document.
