Project Description

The transaction TA facility will help prepare the program of interrelated projects and TA under the Yangtze River Economic Belt (YREB) strategic framework. The TA facility is suitable to ensure a consistent approach to the YREB strategic framework by addressing cross-sectoral themes, developing local capacity for improved project implementation, enhancing project readiness, and strengthening the overall coordination and cooperation for sustainable green development and environmental protection of the Yangtze River.

The Yangtze River is the People's Republic of China's (PRC's) longest river, covers more than 2 million square kilometers, one-fifth of the country geographically, and accounts for over 40% of PRC's total population and about 45% of the gross domestic product. The Yangtze River, one of the busiest inland rivers for freight traffic worldwide, is home to the largest hydropower plant in the world and is the source of water for the South North water transfer project.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
