Project Description

According to ADB website, the Project will support the construction and operation of a series of WTE plants with advanced clean technologies including flue gas emission control to meet EU standards in multiple municipalities throughout Viet Nam. The design of the proposed Project in Viet Nam took careful consideration of the experience from previous WTE projects. ADB supported municipal and agricultural waste to energy projects in the PRC in 2009 and 2012. ADB's portfolio approach has also facilitated the financing of multiple subprojects too small to be financed alone. This has contributed to PPP developments in municipal environmental infrastructure sector and has effectively mitigated GHG emissions.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
