Project Description

The proposed project will help strengthen the horticulture value chain in Afghanistan by (i) improving the processing efficiency and marketing capacity of domestic agro-business enterprises (ABEs); (ii) modernizing crop production through better planting material, trellising, modern greenhouses, and on-farm facilities; and (iii) contributing to the national effort in establishing internationally recognized brands of Afghan horticultural produce. It will increase value addition for horticultural commodities produced in 11 provinces in the central, southern, and eastern parts of Afghanistan. As such, the project will contribute to increasing the supply of fresh and processed fruit and vegetables, and expanding exports of high-value fruit, vegetables, and nuts in which the country has a comparative advantage.
