Quick Facts

Countries	China
Specific Location	Beijing, Hebei, Henan, Inner Mongolia, Liaoning, Shandong, Shanxi, Tianjin
Financial Institutions	Asian Development Bank (ADB)
Status	Approved
Bank Risk Rating	U
Voting Date	2017-12-14
Borrower	Government of the People's Republic of China
Sectors	Agriculture and Forestry, Climate and Environment, Energy, Infrastructure, Transport, Water and Sanitation
Investment Type(s)	Loan
Investment Amount (USD)	$ 499.00 million
Loan Amount (USD)	$ 499.00 million
Project Cost (USD)	$ 499.00 million

Project Description

According to the bank document, the project is the third in a multiyear, multisector Asian Development Bank (ADB) support program for air quality improvement in the greater Beijing Tianjin Hebei (BTH) region.

The first loan, approved in 2015, focused on reforming policy and strengthening regulatory capacity in Hebei province.

The second loan, approved in 2016, targeted better access to finance, especially for small and medium sized-enterprises, to scale up investments in pollution-reduction projects in the region.

This third project will complement the previous projects and will directly help remove barriers to deploying high technologies that could reduce air pollution from industries, urban infrastructure, and agriculture.

Early Warning System Project Analysis

The ADB categorized the project E&S risks as 'FI'. As stated by the ADB, subprojects classified category A for the environment and category A and category B for involuntary resettlement and indigenous peoples are excluded from ADB financing.

Investment Description

- Asian Development Bank (ADB)

Loan 3629-PRC: Air Quality Improvement in the Greater Beijing-Tianjin-Hebei Region Regional Emission-Reduction and Pollution-Control Facility

Ordinary capital resources US$ 499.00 million

Financial Intermediary

Financial Intermediary: A commercial bank or financial institution that receives funds from a development bank. A financial intermediary then lends these funds to their clients (private actors) in the form of loans, bonds, guarantees and equity shares. Financial intermediaries include insurance, pension and equity funds. The direct financial relationship is between the development bank and the financial intermediary.

- China Energy Conservation & Environmental Protection Group (Financial Intermediary)

Private Actors Description

As stated by Bloomberg, China Energy Conservation and Environmental Protection Group offers energy saving and environmental protection services. The Company conducts energy conservation, environmental protection, clean energy, and resources recycling businesses. China Energy Conservation and Environmental Protection Group provides services for industrial, construction, and flue gas treatment areas.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
