## Project Description

According to bank documents, the proposed Mortgage Market Sector Development Program aims to establish a new institutional infrastructure and financing mechanism to promote market-based mortgage finance in Uzbekistan and expand residential mortgage product availability to broader segments of the population. These measures will allow to provide long-term funding to banks, promote competition, and remove inefficient and market-distorting elements in the housing finance environment. The program will also support the Government of Uzbekistan in reforming some of the parameters of the existing government housing subsidy programs, so as to ensure the efficient use of public resources, strengthen fiscal sustainability, and improve the housing policy and subsidy framework.

The proposed sector development program (SDP) aims to develop a market-based residential mortgage market by (i) designing and implementing a new housing policy, reforming housing subsidies, and reviewing the legal and regulatory framework; (ii) strengthening the institutional framework to administer housing policy and subsidies by establishing a Housing Assistance Unit (HAU) in the Ministry of Finance (MOF); and (iii) making long-term fixed-rate local currency funds available to banks to enable them to expand their range of residential mortgage loan products through the establishment of the Uzbekistan Mortgage Refinancing Company (UMRC).
