Project Description

Accodring to the ADB website, the project will increase the ongoing project's overall impact by further contributing to the vision of Greater Port Vila as a safe, inclusive, resilient, and vibrant urban hub, as articulated in the GPV RUDSAP. By constructing three new multipurpose emergency shelters and introducing a national emergency shelter strategic development plan, the project expands the reach and effectiveness of disasterresilient urban infrastructure systems, enhances resilience and inclusion of communities and vulnerable groups, and strengthens institutional capacity for longterm resilience planning. In addition, the project will also strengthen the PVMC's financial sustainability by supporting the improvement of its property tax system, which currently uses outdated valuation and billing systems and only covers a fraction of the population. While the ongoing project's outcome remains unchanged, the outcomelevel indicators have been revised and scaled up in the updated design and monitoring framework (Appendix).

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main.
