## Project Description

According to the project document, the project aims to promote the use of advanced and innovative technologies across ADB operations and provide capacity-building support to developing member countries (DMCs).

TA Subproject 2 aims to support ADB's developing member countries' objective to introduce high-level technology solutions to energy-related development challenges.

There are three concrete challenges in which TA Subproject 2 aims to find new solutions for

(i) increasing clean energy use for heating and cooling,

(ii) advancing efficient renewable energy-based microgrids, and

(iii) efficiently improving energy demand management. To this end, TA Subproject 2 will support achieving economic development while meeting nationally determined contributions pledged under the Paris Agreement.

**ACCOUNTABILITY MECHANISM OF ADB**

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
