Project Description

According to the bank document, the Emergency Assistance for Rehabilitation and Reconstruction (EARR) will support the government to build back better critical infrastructure damaged by the devastating disasters in Central Sulawesi province in September 2018, where a 7.4-magnitude earthquake triggered a near-field tsunami, landslides, and major liquefaction.

The EARR will rehabilitate and reconstruct education facilities, water supply, sanitation, and water resources infrastructure, ports, and an airport. he EARR will promote sustainability by:

(i) designing disaster resilient infrastructure by considering international good practices, new technology and alternative construction material;

(ii) strengthening capacity of national and sub-national agencies on constructing disaster and climate resilient infrastructure;

(iii) strengthening capacity and processes for better operation and maintenance (O&M) of restored infrastructure, including community-based approaches for routine maintenance, where applicable; and

(iv) introducing earth-observation technology to monitor reconstruction through ADB's partnerships including that with the European Space Agency.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: http://www.adb.org/site/accountability-mechanism/main
