### Project Description

According to the bank document, the knowledge and support technical assistance (TA) will provide knowledge-based solutions in the health sector to support inclusive growth in the People's Republic of China (PRC). It will

(i) address institutional challenges, and

(ii) promote digital technology and eventually generate regional public goods.

The TA will reduce rural-urban disparity of health service delivery and will support the achievement of Sustainable Development Goal 3 (to ensure healthy lives and promote well-being for all at all ages) and universal health coverage.

The project outcome is expected to improve GZAR's rural primary health system planning and management.
