Project Description

According to the bank document, the Asian Development Bank (ADB) and the government have agreed to adopt a framework approach. Priority is given to:

- (i) institutional strengthening and policy reform;
- (ii) ecosystem restoration, environmental protection, and management of water resources;
- (iii) inclusive green industrial transformation; and
- (iv) construction of an integrated multimodal transport corridor.

As the Ganzhou Municipal Government (GMG) is carrying out tests to determine the most effective types of vegetation and reforestation for water conservation and prevention of soil erosion, it aims to create an improved rural living environment and address the ecological and environmental issues resulting from economic development and population growth pressures in Ganzhou. It intends to apply water resource management, consistent with international best practice. In 2017, GMG established the Ganzhou Ecological Protection Center to strengthen its capacity, in line with the National Strategic Plan for Rural Vitalization, 2018-2022, the Jiangxi Provincial Government issued local implementation guidelines.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
