Project Description

According to the bank document, the proposed small-scale knowledge and support technical assistance (TA) will test new approaches to provide strategic country-specific knowledge solutions that support the country's development priorities and strategies, and ADB's operations. The TA will operationalize the knowledge elements of ADB's Strategy 2030 and the President's Planning Directions for 2019 through strategic application of its research and analytical capabilities to strengthen national planning in the DMCs.

This will also help improve business development within these countries based on enhanced investment quality and policy dialogue. The TA will implement a country-focused approach using the CPS as the main platform to define customized knowledge support, promote the use of innovative technologies, and deliver integrated solutions through cross-sector expertise.

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
