Project Description

According to the bank's documents, "The proposed project will help strengthen livestock value chain development in key intensive livestock industries (dairy and poultry) in selected regions of Afghanistan. It will strengthen the value chain by targeting input suppliers, intensive producers (fodder producers and commercial poultry and dairy farmers), product aggregators, and agro-processors involved in adding value to livestock products. The project will finance the development and refinement of Afghanistan's regulations to improve the quality and safety of production inputs. It will provide grant assistance for the establishment and upgrading of agro-processing facilities to enhance quality, hygiene and food safety of processed livestock products while promoting backward linkages with producers to more efficiently relay market signals through the price mechanism.

The proposed project will have two outputs: (i) regulatory and institutional capacity in the livestock subsector strengthened; and (ii) livestock farm and agribusiness enterprise facilities established and/or upgraded."

ACCOUNTABILITY MECHANISM OF ADB

The Accountability Mechanism is an independent complaint mechanism and fact-finding body for people who believe they are likely to be, or have been, adversely affected by an Asian Development Bank-financed project. If you submit a complaint to the Accountability Mechanism, they may investigate to assess whether the Asian Development Bank is following its own policies and procedures for preventing harm to people or the environment. You can learn more about the Accountability Mechanism and how to file a complaint at: <http://www.adb.org/site/accountability-mechanism/main>
